

What is your background, and did you hear about CGE before?

Have you or your colleagues attended any CGE capacity building events, online courses, or used any CGE guides/materials

Are these CGE activities and materials helpful to your country's MRV and transparency work?

How do you like these activities and materials? – what works and what can be further improved?

More hands-on training workshops

More workshops and training

There should be further emphasis on national GHG Inventories

They were good

Email me

More sharing across countries.

More in-person trainings

Good

Sharing, leason learned how to transfer into BTR

How do you like these activities and materials? – what works and what can be further improved?

well-done.

Tailored for each need

To have one to one meeting with countrie still struggling to perform normally

No engagement before

More applied and interactive regional workshops

The materials provide good guidance in strengthening institutional arrangements.

Régional or national capacité building trainings

I am just familiar with the publication on institutional arrangements and found it very useful. Never attended any training

Workshops are good in terms of updates and sharing experiences

How do you like these activities and materials? – what works and what can be further improved?

More physical engagements with countries

Need more info and training

Easily accessible

Focusing on BTR for developing countries

Most of the activities recently has been virtually which for capacity point of view is not idea for better understanding. So in person workshops do help a lot in collaboration and to further improve.

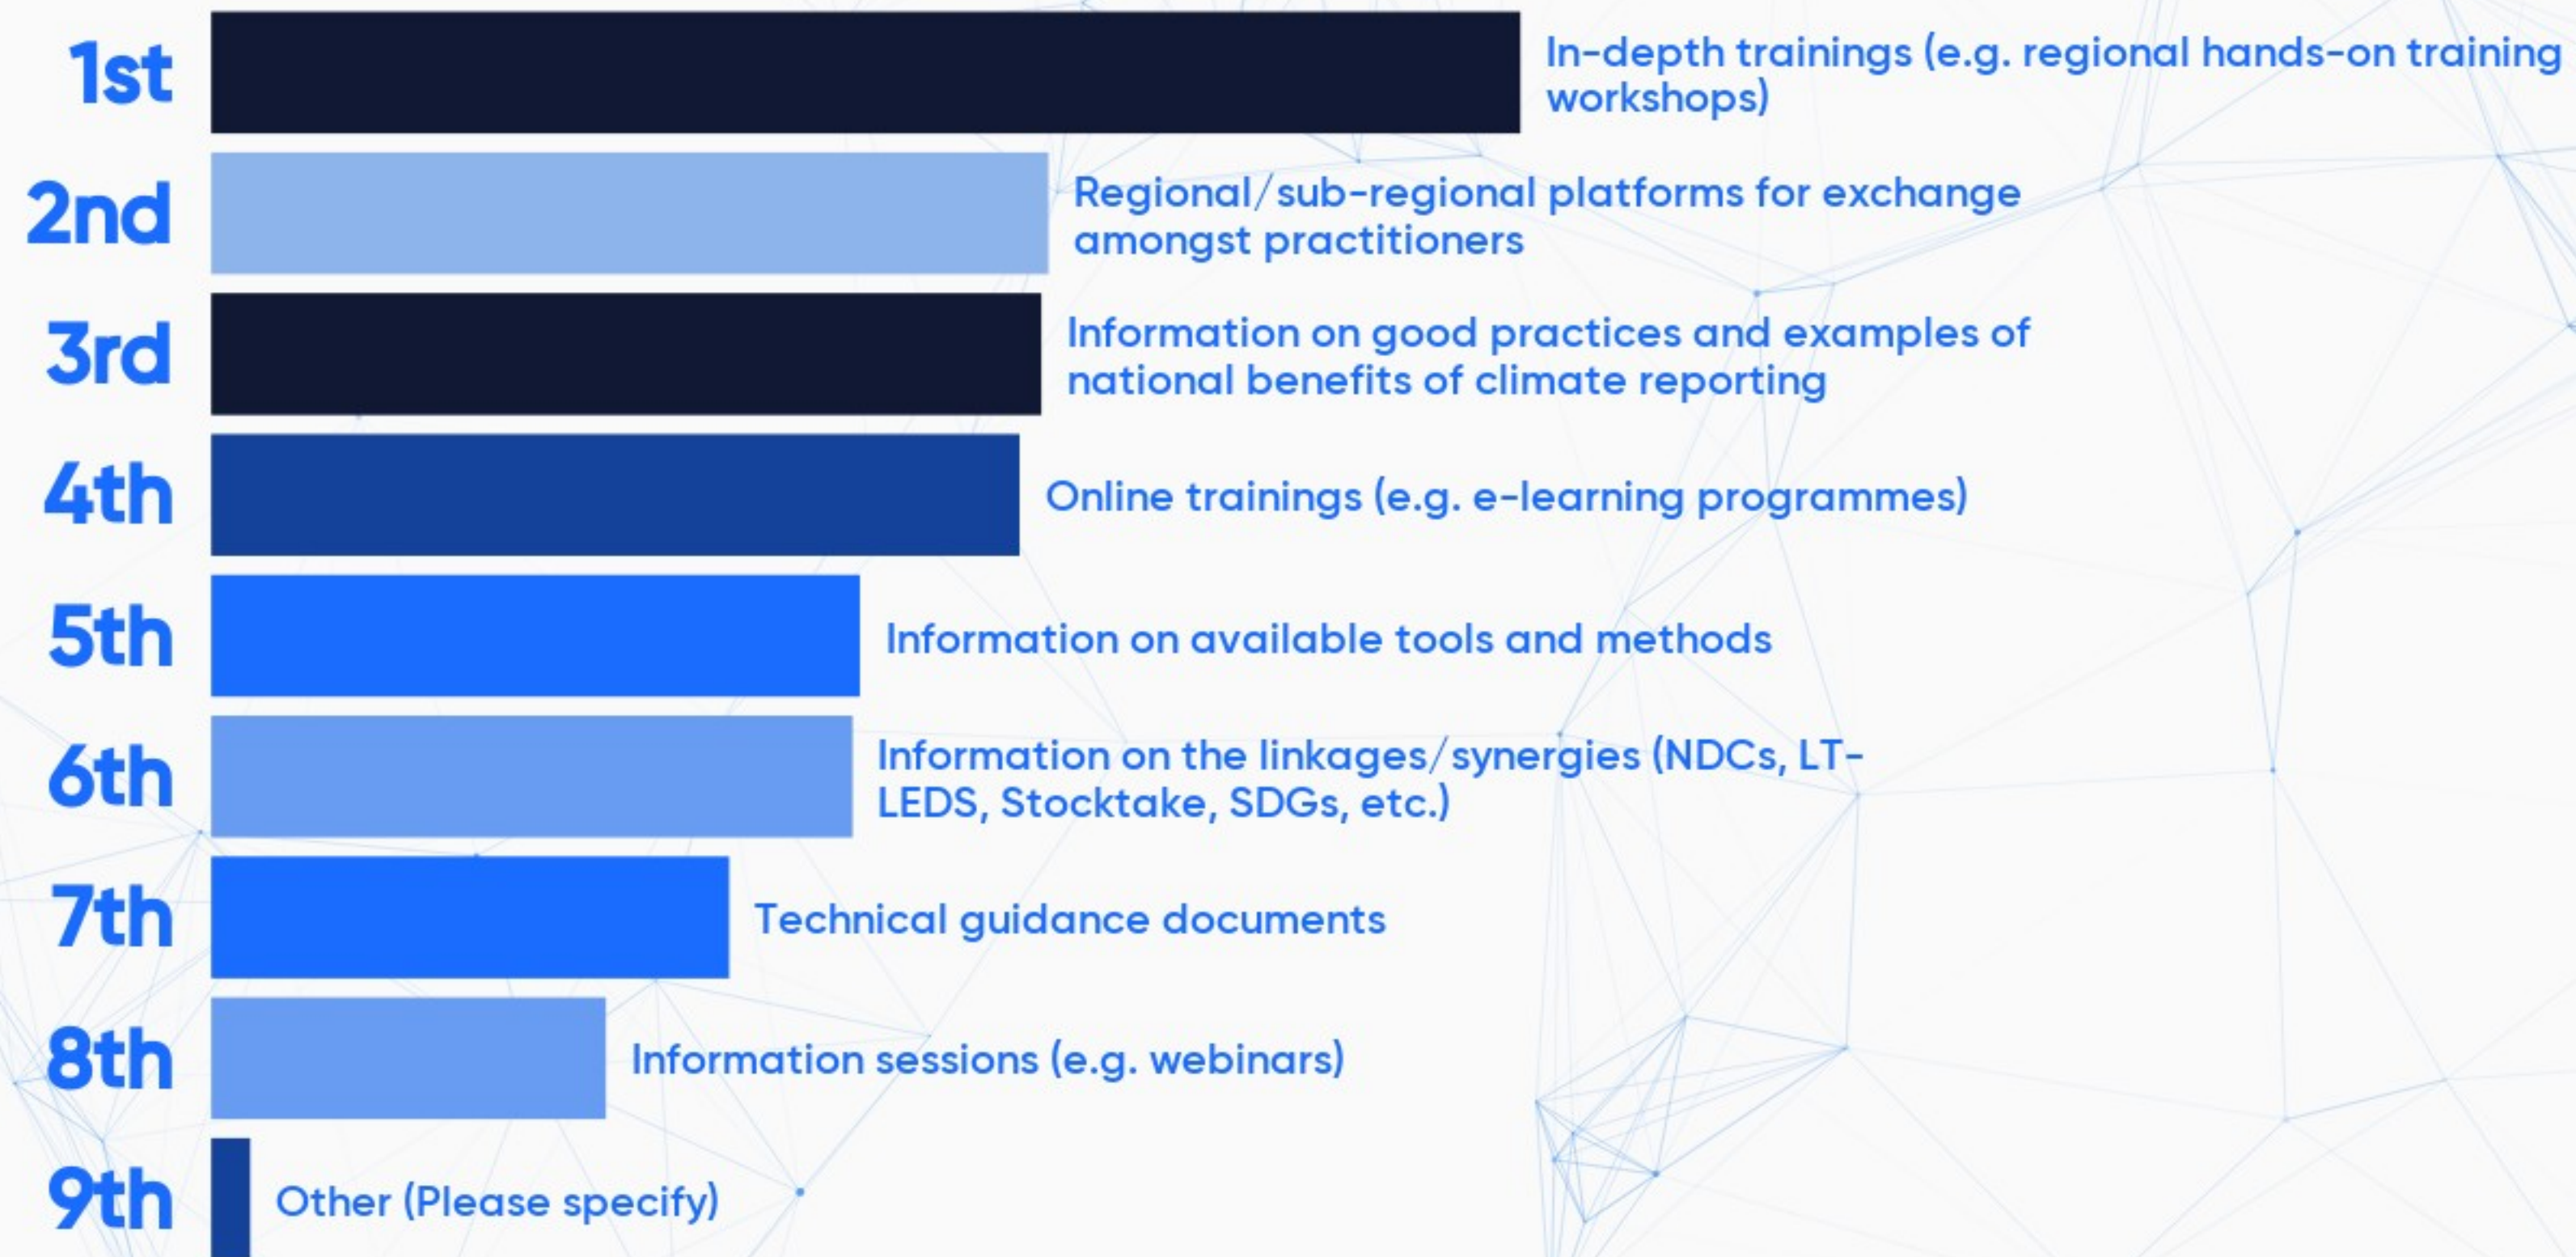

Model of information Système for all sectors concerned by the inventory

Uncertainty analysis

Basic and simple level of information with visual graphics will be the most useful.

Very useful material. The hand book is very huge and need to be more easy

What are the priority areas in terms of technical support?

Topics of interest for CGE training, handbooks, online courses, or webinars mentioned in the CGE presentation?
