SBSTA 11 (c): Common tabular formats for the electronic reporting of the information on financial, technology development and transfer and capacity-building support provided and mobilized, as well as support needed and received, under Articles 9–11 of the Paris Agreement

I.   **Cross-cutting issues**
   - In sections where the list of reporting elements for a tabular format is non-exhaustive (e.g., "including") how to accommodate reporting on additional elements?

II. **Section-specific issues**

Chapter V Tables

Support provided via bilateral, regional and other channels
   - Existing reporting table provide sufficient basis to develop this table.
   - Whether activities reported in finance tables that are denoted as contributing to support technology development and transfer and/or capacity-building objectives will be auto-populated in technology and capacity building tables.

Support provided via multilateral channels
   - Further discussion needed on best way to reflect reporting of inflows and /or outflows, as applicable.
   - How to accommodate potential reporting on "core-general" or "climate-specific", as applicable.
   - Further consideration needed on how to accommodate reporting on channel (multilateral, multi-bilateral).
   - Further discussion needed on how to best capture whether the support contributes to capacity-building and/or technology development and transfer objectives, as applicable, as available (e.g., check box).

Support mobilized through public interventions through bilateral, regional, and multilateral channels
   - Noting that reporting Parties have the option to report this information in either textual or tabular format.
   - Are there any design implications of accommodating reporting on both bilateral and multilateral mobilization by a Party?

CHAPTER VI TABLES

Information on financial support needed (program, estimated amounts, timeframes, sector, expected use) AND Information on financial support received

   - Whether activities reported in this table that are denoted as contributing to support technology development and transfer and/or capacity-building will be auto-populated in other relevant tables.

Summary information on support needed and received for implementing Article 13 and transparency-related activities

- How to reflect the status of an activity as it is reported across stages (e.g., as it transitions from planned, ongoing, to completed)?
- How to design tables for capturing information on transparency-related capacity-building separate and distinct from capacity-building as reported in tables above?
- How to accommodate both support needed and received in the table?
