

Second Plan of Action of the Action and Support Expert Group for Sep/October 2026– Sep/October 2028 as at 17 September 2026 17:15 RMI
(UTC+12)

The table below sets out the plan of action of the Action and Support Expert Groups, covering *Sep/Oct 2026 to Sep/Oct 2028*, which identifies the work of the expert group that will contribute to the implementation of the work of the Executive Committee related to enhancing action and support, including finance, technology and capacity-building, to address loss and damage associated with the adverse effects of climate change, including by maximizing synergies among relevant stakeholders and processes. The expert group will review progress in implementing this plan of action at its regular meetings and update the plan of action as needed, including working with experts as needed to refine deliverables and knowledge products (*this could be an additional ASEG decision point*).

Desired impact	Deliverables	Description of deliverables	Lead(s)	Indicative time frame
<i>Describe the impact that the expert group is seeking to achieve by the suggested deliverables</i>	<i>Insert concrete outputs/deliverables that directly contribute to the desired impact. There can be more than one activity contributing to the same desired impact. When proposing knowledge products as output, indicate whether it is envisioned to be a type A or non-type A product</i>	<i>Provide further details of the proposed deliverables</i>	<i>Insert the names of members who will lead the work to complete the delivery of outputs. All deliverables should have a lead appointed.</i>	<i>Insert the expected time frame for delivering the outputs</i>
1. Strengthened countries' ability to develop and integrate consideration of loss and damage into national response plans³	1 a) Type A deliverable: Voluntary, discretionary and non-prescriptive guide on integrating considerations of loss and damage into national response plans and accompanying complementary 'toolbox' as its annexes	The development of this practical guide and toolbox will be informed by the following: i. Online survey/questionnaires of countries and other relevant stakeholders. The content will be developed by the co-leads, endorsed by the ExCom and administered by the secretariat; and ii. Analysis of the results arising from the survey mentioned in (a) above, and stocktaking of existing response plans and country approaches to respond to loss and damage Technical work of (b) above will be undertaken by ExCom or collectively from multiple perspectives. Inputs (a)	UNICEF, UNDRR, Santiago Network Secretariat	Completion of i) and ii) by September 2027 Completion of the 1. a) Type A deliverable by September 2028

		and (b) are non-consecutive, and non-type A (i.e. not requiring all-ExCom endorsement). Information arising from (a) and (b) will inform the development of an outline and content of the Type A deliverable “voluntary, discretionary and non-prescriptive guide and accompanying complementary ‘toolbox’ as its annexes” in line with the principles of the Convention and the Paris Agreement.		
	Non-Type A deliverables: 1. b) Set of case studies on technical assistance requests and implementation 1. c) Analysis of key lessons learned from TA processes	1. b) The development of these products will be informed by an analysis of the current and future technical assistance pipeline under the Santiago Network. 1. c) Technical work will be undertaken to provide inputs and evidence for the development of the type A product listed above	Santiago Network Secretariat	Completion of 1. b) by December 2027 1. c) by April 2028
2. on Knowledge products on existing methodologies and approaches for assessing economic and non-economic loss and damage are developed for the purpose of informing the development of context-specific national methodologies and approaches for responding to loss and	2. a) Type A deliverable: Methodologies for assessing Economic and Non-Economic Loss and Damage		UNICEF, Global Shield	Completion of the Type A deliverable by September 2028
	2 b) Type A/B Technical paper: From technical assistance to funding for responding to loss and damage.	A paper examining how technical assistance can support countries to identify, prioritise, develop and strengthen loss-and-damage response needs and funding requests	AAI	tbc
	2 c) Explore the development of populated model templates for different hazards to support			

damage at the national level and supporting developing countries in preparing technical assistance and funding requests⁴	developing countries in the preparation of requests for support, including to the SNLD and FRLD.			
Placeholder for further deliverables pending the Executive Committee's guidance, including following future decisions by the governing body or bodies of the WIM
