“Access of women to ICT, empowerment and
the achievement of SDGs - Examples of
good practices from Bulgaria”

6th Dialogue on Action for Climate
Empowerment
8-10 May 2018, Bonn, Germany

The trend: ICT sector in Europe

In Europe - the share of men working in the digital sector is 3.1 times more than the share of women.

There are four times more men than women graduated ICT-related studies.

Bulgaria – 27.7% women and girls are working in ICT sector - highest percentage among the EU member states. The country is also at the top of the ranking for female IT professionals with 30%, almost double to the 16% average.

ICT sector – the best performing industry in Bulgaria

- ❑ **almost 20 000 people occupy ICT positions today compared to 5 000 in 2016, which is 300% growth.**
- ❑ **600% income growth for 10 years**
- ❑ **women professionals are 30% - highest for Europe.**
- ❑ **over 90% are young professionals up to 35 years of age**
- ❑ **ICT sector employs are some of the most highly-skilled and well-paid professionals in Bulgaria**

The topic of climate change
The project **SAME WORLD**
(Sustainability, Awareness,
Mobilization, Environment) is a
large-scale project that includes
10 EU countries – Italy, Germany,
Greece, Bulgaria, Estonia, Spain,
Portugal, Slovenia, Slovakia,
Hungary and partnerships from
Mozambique, Kenya, Tanzania and
Myanmar

The core focus is a large
scale public awareness
through education for
development focused on:

- climate change;
- environmental migration
- environmental justice

The project products are:
**Educational kit – more than
30 contributors, translated
into 12 languages;**
**Digital Blended Course for
teachers and parents from 10
EU countries;**
**Digital Environmental
Observatory**
Digital Environmental Game

**One of the main target group was
teachers that in Bulgaria is highly
feminized profession**
**The most aware institutions about
CC in Bulgaria are schools – public
and private.**
**-Young people are more active and
the skeptics on CC among them
are lowest %**

**The SAME WORLD in Bulgaria:
Target – more than 20 000 people
(authorities, teachers, students
from secondary schools, parents, NGOs, media and civic activists)
35 trained teachers and parents;
150 schools reached in Bulgaria
More than 2000 publications in social media
Engagement of authorities to open more space for
education for development devoted to climate
change and gender in Bulgarian schools;**

Edu-Kit

A Digital educational kit for teachers and educators with 13 teaching units and many class activities to raise students awareness on Climate change, Environmental Justice and Environmental Migration, you can also download the pdf activities here.

Online Lessons

Online lessons designed by international experts to learn more on global environmental issues affecting our planet and societies, an easy and engaging way to provide teachers, educators and parents with new insights and information.

Online Game

The game "130 perfect future" was up the challenge of saving the planet from destruction due to pollution and climate change. With the help of a group of students, the player will go back in time and visit different places in order to prevent people to carry out actions which damage the planet and are unfair.

School Workshop

Workshops names educational activities, workshops and roleplaying games managed by educators in European schools on the topic of environmental justice, climate change and environmental migration. They show how students have shared their thoughts on these topics through different, interactive tools and methods.

Videos

Gifs

The videos and gifs have been created to support the viral awareness-raising campaign through sharing on social networks. They can be used by educators, teachers, and parents as an input for debate. Thanks to the power of images, videos receive stories of hope and take awareness on the topics of environmental justice, climate change and the rights of environmental migrants. The gifs summarize these topics in a simple, fun, and easy way.

Theme play

The theme play "Deep view" is an interactive theme performance which requires data and facts, tackling the topic of environmental justice with humor.
