

THE GLOBAL WOMEN'S NETWORK FOR THE ENERGY TRANSITION (GWNET)

GWNET aims to advance the global energy transition by empowering women in energy through interdisciplinary networking, advocacy, training, and mentoring.

GWNET seeks to address the current gender imbalances in the energy sector and to promote gender-sensitive action around the energy transition in all parts of the world.

Advocacy

We generate and disseminate information on the role of women in the energy transition as well as organise conferences, seminars, webinars, and workshops that foster discussions and promote gender-sensitive action around the energy transition.

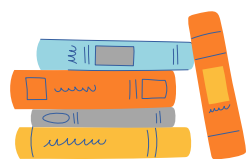

Networking

We facilitate connections among women working in the fields of renewable energy and energy efficiency to advance the energy transition, through events and the cutting edge Women in Energy Expert Platform.

Mentoring

We lead the development of several regional and global women mentoring programmes, with the goal of advancing the role of women as agents of change in society and promoting best practices within the sustainable energy sector.

Join Our Women in Energy Expert Platform

Our [Women in Energy Expert Platform](#) connects and empowers women working in sustainable energy with the aim to encourage greater visibility, networking opportunities and professional connections between women.

The platform has over 2000 members from 100+ countries and demonstrates the diversity of roles and skills of women already active in the sector, refuting the claim that there are no women in renewable energy.
