

## Multi-stakeholder Gender and Energy Compact

**Catalyzing action towards gender equality  
and women's empowerment to accelerate a just,  
inclusive and sustainable energy transition**

[www.genderenergycompact.org](http://www.genderenergycompact.org)

### Contributing to:

### Supported by the governments of:

Ecuador

Iceland

Kenya

### Outcomes:

- 1** Energy and time poverty, as well as drudgery of women are eliminated by increasing women's access to and control over sustainable energy products and services.
- 2** Countries and regions (re)formulate and adopt more inclusive and gender-responsive energy access and transition pathways, strategies and policies.
- 3** Women-owned and -led businesses have increased access to productive resources, such as finance, sustainable energy, entrepreneurial capacity and business development services.
- 4** Career advancement avenues for women working in the energy sector are created: women enjoy decent and productive employment; workplace policies and practices support recruitment and retention of women, as well as women are equally involved in policy- and decision-making fora and discussions.
- 5** Knowledge, mechanisms, tools, and sex-disaggregated data are more available and of higher-quality. This supports gender-responsive Monitoring and Evaluation processes and policy formulation, as well as gender mainstreaming of private and public sector initiatives, projects, programmes and policies.

Nepal

Sweden

**Signed by more  
than 35 entities**

Bringing together governments, private sector, academia, civil society, financial institutions, youth, and international organizations

### Development process:

- Ideation and formulation Call to Action, Vienna Energy Forum
- Survey and development of the Gender and Energy Compact based on research, empirical data, experience and lessons learnt
- Gender and Energy Compact launched at HLDE, September 2021

### Initiated by:
