## **MY WORLD. MY ACTION. OUR PLANET.**

We all have our own worlds. Our world could be the house we live in or the community we are part of, or it could be the family we love, the work we do, or the region we come from.

Whatever your world is, climate change is affecting it because of the impact on our environment that we are already experiencing, and because of the changes we need to make as a society to ensure a better future for everyone.

The good news is that each of us can do something in our own world every day to reduce the effects on the environment and to move towards living more sustainably – a shift that brings with it benefits and new opportunities. While many of our actions may seem small in isolation, taken together the impact is far bigger and as a result, every action counts.

The European Climate Pact is a movement of people united around a common cause, each taking steps in their own worlds to build a more sustainable Europe. Launched by the European Commission, the Pact is part of the European Green Deal and is helping the EU to meet its goal to become climate-neutral by 2050.

CLIMATE

PACT

## Who is the Pact for?

Everyone has a place in the Pact. You can get involved whether you are just starting out on your climate action journey or already working to make a difference in your world. You can take part as an individual or as an organisation for example, a city, a community or an association.

## How can I take part?

There are many ways to get involved. Some activities are unique to your country, while others bring together people from across Europe. The Pact is also partnering with other organisations and networks to build on the many initiatives already taking place.
