

List of possible pending non-editorial issues

General

- Category names – maintain names in the tables presented or align with the terminology in the IPCC Guidelines
- Reporting of amount captured/recovery (e.g. in tables 1.A(a)s4, 2(I).A-H, 5.B) – report as negative or positive number
- Inclusion of categories from the 2019 Refinement, and how to refer to the 2019 IPCC Refinement in footnotes
- Delete/retain rows for 4(I)–4(V) in summary and cross-cutting tables (e.g. rows 27–31 in Table4)

Energy

- Reporting of CO emissions from category 1.B.2.b (in Table1)
- Addition and deletion of columns in Table1.A(d)
- Disabling reporting of recovery/flaring from 1.B.1.a.i.4 (in Table1.B.2)
- Reporting of Venting and flaring in accordance with the 2006 IPCC Guidelines (in Table1.B.2)
- Inclusion of “Long-term” for injection and storage (in Table1.C)

IPPU

- Inclusion of some categories from the IPCC (e.g. in Table2(I)) in the dropdown list
- Level of disaggregation of categories in Table2(I).A-H
- Reporting of applicable methodological options in Table2 (II)B-Hs2

Agriculture

- Identify options to report on cattle
- Reporting of SO_x in Table3
- Inclusion of Pit storage as a manure management system in tables 3.B(a) and 3.B(b)
- Disabling reporting of N₂O in Table3.C to avoid risk of double counting
- Separation of reporting between Agriculture and LULUCF, including GL, in Table3.D or Table 4(III) or Table4(V)
- Reporting of emissions relating to loss of soil C – include losses even without “management change” (see footnote 5 in Table3.D)
- Delete/retain Table3.E

LULUCF

- Delete/retain Table4.1
- Deletion of Memo item on Natural Disturbances (in Table4)
- Deletion of footnote 5 in tables 4.A–4F
- Deletion of column for HWP in tables 4.A–4F
- Inclusion of subcategory 4.D.1 for coastal wetlands for consistency with 2013 Wetlands Supplement
- Separation of indirect N₂O emissions between atmospheric deposition and N leaching and run-off
- Delete/retain Table 4(IV)

Cross-cutting tables

- Re-insertion of Reference approach in Summary1
- Level of disaggregation in Table6
- Inclusion of threshold used to consider insignificance and report NE in Table9
- Reporting of totals in Table10 and Summary2 – two or four totals
