## OECD DAC External Development Finance Statistics:

<http://www.oecd.org/dac/financing-sustainable-development/development-finance-topics/climate-change.htm>

Relevant information, such as:

- Year
- Provider
- Amounts
- Scope
- Sector/sub-sector
- Financial instrument
- Short description
- ...

## Development Finance for Climate and Environment

Development finance from bilateral and multilateral institutions supports climate change mitigation and adaptation, as well other environmental objectives such as biodiversity.

Succinct analysis of the latest trends of bilateral climate finance is available below, together with the full dataset on climate-related development finance, a data explorer tool and methodological documents.

### Climate-related official development assistance

[View charts in full screen](#)

### Volume and share of ODA with climate change adaptation and/or mitigation as a policy objective (2013-21)

■ Climate
 ■ Volume of ODA with climate as a principal objective
 ■ Volume of ODA with climate as a significant objective

### Trends in bilateral climate-related ODA

After a peak in 2020, bilateral allocable official development assistance (ODA) from Development Assistance Committee (DAC) members pursuing climate objectives decreased to levels recorded between 2015 and 2019.

The 2020 peak was mainly due to a few large activities reported that year by some DAC members.

### Climate-related development finance datasets

**Recipient perspective** [xlsx, 4-6 MB each]

**Provider perspective** [xlsx, 4-6 MB each]

**Other datasets**

- Imputed multilateral shares (xlsx)
- Climate-related bilateral development finance by objective (xlsx)
- Private finance mobilised on OECD.stat
- Environment-related ODA from DAC members on OECD.stat (biodiversity, climate change adaptation, climate change mitigation, desertification, environment)

### Where do you start if you don't have any data?

1. Option 1: open your last BUR, NC or other report and search for “support received”
2. Option 2: open the link <http://www.oecd.org/dac/financing-sustainable-development/development-finance-topics/climate-change.htm> and **download** the OECD DAC Climate-related development finance datasets – recipient perspective
  - Filter “recipient” and choose a project line from your own country
  - Use the available data to fill in the BTR reporting table
  - Communicate back to plenary on your observed challenges and considerations regarding to the topics of the presentation

## Download OECD DAC statistics (OECD DAC External Development Finance Statistics)

Financial Support Received | technology support received | Capacity support received

## The other day: Get prepared for the plenary discussion

1. Which sources of information did you use?
2. What challenges did you encounter during this exercise?
3. Which information could you not find in your national reports or the OECD DAT datasets?
4. Would you consider and feel comfortable using your existing national reports and/or this OECD DAC database for reporting/cross-checking the data reported in the relevant CTFs?

...

Any other question related to reporting on support needed in the BTR & CTFs?

### ***Potential challenges and considerations regarding:***

- *Completeness and clarity of data, and ability to respond to BTR requirements*
- *Definition of climate finance support “climate-specificity”*
- *Identifying financial support vs technology and capacity-building support*
