

## **3<sup>rd</sup> Capacity-building Hub PCCB Focus Area Day**

### **Climate and Development Knowledge Network (CDKN) Capacity-building, Does One Size Fit All? The Effectiveness of Varied Approaches to Supporting the Implementation of NDCs Concept Note**

#### **Background:**

The Climate and Development Knowledge Network (CDKN) works to enhance the quality of life for the poorest and most vulnerable to climate change. We support decision-makers in designing and delivering climate compatible development.

We do this by combining knowledge, research and technical advisory in support of locally owned and managed policy processes. We work in partnership with decision-makers in the public, private and non-governmental sectors nationally, regionally and globally.

Since 2018, CDKN has been led by South Africa-based SouthSouthNorth (SSN), working closely with its partners Fundación Futuro Latinoamericano (FFLA) in Quito, ICLEI – Local Governments for Sustainability, South Asia in Delhi, as well as ODI in London. See [www.cdkn.org](http://www.cdkn.org) for information.

#### **Objectives:**

- Demonstrate the benefits of choosing capacity-building approaches that are appropriate to the context and stakeholders
- Improve the effectiveness of capacity building practice in order to better implement NDCs.
