26. Togo - March 2022
27. Guinea-Bissau-Apr 2022

NAP IMPLEMENTATION

NAP implementation is supported through the Readiness Programme, the Project Preparation Facility, and the funding proposal window (SAP and PAP).

- If a country already has a NAP, the country may access the \$3m USD from GCF for subnational or sectoral adaptation planning, or for NAP implementation.
- NAP implementation can be funded through readiness, if the intended activities align with the RPSP objectives (capacity building, strategic frameworks, pipeline development and knowledge management).
- PPF support may be accesses to develop funding proposals from concept notes drafted during the NAP process.
- Simplified and regular funding proposals may be submitted to access funds for implementation of priority adaptation actions identified in the NAP.
- Of the 35 developing countries that have submitted NAPs to UNFCCC:
 - 20 countries have GCF Adaptation Planning and/or Readiness grants supporting further advancement of the NAP process and/or decentralization to subnational or sectoral levels.
 - 14 countries have funded projects in the GCF portfolio that support implementation of priorities in their NAP.
