Global Enabling Sustainability Initiative

Global Implementation Accelerator

INTENDED PARTNER DETERMINED CONTRIBUTION

Global Enabling Sustainability Initiative ("the Partner"),

Recalling decision 1/CMA.7, *Global Mutirão: Uniting humanity in a global mobilization against climate change*, by which the Global Implementation Accelerator ("the Accelerator") was launched,

Supporting the mandate of the Accelerator to accelerate climate implementation, enhance international cooperation across all actors, and support countries in delivering on their nationally determined contributions and national adaptation plans, with a view to keeping 1.5 °C within reach,

Noting that the Accelerator is cooperative, facilitative and voluntary,

Considering the call by the COP30 and COP31 Presidencies for partners to join the Partner Network of the Accelerator, each contributing what it can through its time, expertise and resources, with the highest possible ambition, in the spirit of the Global Mutirão,

States the following:

1. Intent to join the Partner Network. The Partner expresses its intent to join the Partner Network of the Accelerator and to contribute, in accordance with its capacities, to the acceleration of the solutions selected by the Accelerator from Plans to Accelerate Solutions (PAS) under the Global Climate Action Agenda.

2. Contribution. The Partner makes the following offers to the Accelerator:

2.1 As a strategic partner of the Global Implementation Accelerator (GIA), the Global Enabling Sustainability Initiative (GeSI) can play a key role in mobilising digital technologies, industry expertise and international partnerships to accelerate the implementation and scaling of high-impact climate solutions. Building on its Intended Partner Determined Contribution (PDC), GeSI can leverage its programmes, platforms and global network to provide both core and tailored support to the selected Plans to Accelerate Solutions (PAS). In particular, the United Nations Sustainability Hub (UNSH) can serve as a strategic platform for identifying, mapping and connecting digital solutions, technology providers and implementation partners capable of addressing the specific challenges of each

accelerated project. By matching identified needs with existing and emerging digital capabilities, UNSH can help translate acceleration priorities into actionable solutions, facilitating their deployment, replication and scaling across different geographical and sectoral contexts;

2.2 Measuring and demonstrating impact will be another essential dimension of GeSI's contribution. Drawing on the methodologies and principles developed under the European Green Digital Coalition (EGDC), GeSI can support the establishment of robust frameworks to assess, monitor and report the environmental impacts of the digital technologies deployed within each accelerated solution. This would include defining relevant indicators, establishing baselines, assessing both the positive environmental effects and the footprint of digital technologies, and monitoring progress against expected climate and sustainability outcomes. By promoting transparent, consistent and evidence-based impact measurement, GeSI can help demonstrate the contribution of accelerated solutions to emissions reductions, resource efficiency, resilience and other relevant sustainability objectives, while strengthening their credibility with governments, investors and implementation partners.

2.3 International visibility and strategic outreach can be significantly enhanced through GeSI's Digital with Purpose conferences and associated international engagement activities. These platforms can provide an effective foundation for an international roadshow showcasing the solutions selected by the Accelerator, bringing together policymakers, business leaders, technology providers, investors, international organisations and other relevant stakeholders. Dedicated sessions, solution showcases, matchmaking opportunities and high-level dialogues could be organised around the specific requirements and achievements of each accelerated project. By integrating the Accelerator's priorities into the Digital with Purpose agenda and broader international events, GeSI can help attract new partners, generate political and institutional support, encourage investment opportunities and stimulate demand for replication in additional markets.

2.4 Technology mobilisation and tailored implementation support can be facilitated through GeSI's member companies and its wider digital ecosystem. Based on the needs identified in each Acceleration Brief, GeSI can engage relevant members to explore the provision of suitable technologies, digital infrastructure, data solutions, technical expertise and implementation capabilities. These contributions could encompass artificial intelligence, connectivity, cloud and data infrastructure, digital monitoring systems, smart-city technologies and other digital enablers, depending on the requirements of the selected solutions. GeSI can act as a bridge between project promoters and technology providers, facilitating the co-design, adaptation,

testing and deployment of solutions that are technically appropriate, economically viable and capable of being scaled. Such contributions would be developed on a case-by-case basis, through voluntary commitments aligned with the capacities and priorities of participating members.

2.5 Scaling through partnerships and capacity-building represents a further area where GeSI can bring significant added value. Through its extensive network of academic institutions, research centres, international organisations, city networks, public authorities, businesses and other strategic partners, GeSI can facilitate access to new implementation environments, technical knowledge, institutional capabilities and potential adopters. These partnerships can support pilot projects, knowledge transfer, capacity-building programmes and the development of replicable implementation models adapted to local needs. GeSI can also contribute directly to the preparation and implementation of Acceleration Briefs, providing strategic and technical mentoring to PAS hosts and the GIA Coordination Hub. This support could include identifying critical implementation barriers, assessing digital opportunities, defining measurable outcomes, mapping relevant stakeholders, structuring partnership opportunities and establishing practical roadmaps and milestones for scaling.

2.6 GeSI can contribute to the Accelerator's longer-term ambition by facilitating the development of larger-scale Digital Public Infrastructure (DPI) in collaboration with governments, international institutions, development partners, technology companies and other stakeholders. Building on lessons learned from the accelerated solutions, GeSI can help identify opportunities to move beyond individual projects towards interoperable, inclusive and reusable digital infrastructures that enable climate action and sustainable development at scale. This may involve supporting common data-sharing frameworks, open and interoperable digital platforms, digital public services and collaborative technology ecosystems that can serve multiple countries, cities and sectors. By linking technological innovation, measurable sustainability outcomes, institutional cooperation and scalable digital infrastructure, GeSI can help transform the Accelerator's selected solutions into broader systemic opportunities, contributing to the achievement of nationally determined contributions (NDCs), national adaptation plans (NAPs) and the wider objectives of the Global Mutirão.

The Partner may add to its offers at any time by communicating an updated Intended Partner Determined Contribution to the Coordination Hub of the Accelerator.

3. Baseline engagement. As a member of the Partner Network, the Partner will endeavor, in accordance with its capacities, to:

3.1 Contribute in good faith and in the spirit of the *Global Mutirão*;

3.2 Designate a focal point for the Accelerator;

3.3 Work with the Coordination Hub and the PAS hosts to deliver on its offers;

3.4 Provide, on request, brief information on contributions delivered to inform the mid-cycle and completion reports for each acceleration cycle;

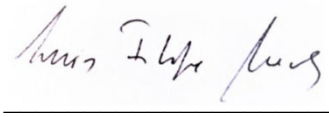

3.5 Inform the Coordination Hub in good time of any material change to a contribution.

4. Recognition and visibility. The Partner consents to the publication of this Intended Partner Determined Contribution and to be publicly identified as a member of the Partner Network.

5. General provisions. This Intended Partner Determined Contribution is a voluntary expression of intent. It does not create legal or financial obligations and represents only a political and institutional commitment to cooperate in advancing the Accelerator's objectives. Offers requiring a legal or financial instrument may be formalised through separate arrangements with the host institution of the Coordination Hub and remain subject to the Partner's internal approvals and applicable rules.

6. Acceptance and acknowledgement. The Accelerator will confirm receipt of this Intended Partner Determined Contribution and communicate its acknowledgement to the Partner, which thereby becomes a member of the Partner Network.

Signed in Antalya on 11 November 2026.

Luis Neves
Global CEO, Global Enabling Sustainability Initiative
