

## **Katowice Committee of Experts on the Impacts of the Implementation of Response Measures**

**Third meeting, Bonn,**

**Virtual Meeting, 5–9 October 2020**

### **Proposed plan to implement activities 3(d) and 3 (e) during the KCI meeting**

**Proposed Plan:** The KCI holds its discussion around following questions. The observers will also provide their responses on the same questions through Mentimeter. After the meeting observers' responses will be compiled and included in meeting report and future activities as relevant.

**Activity 3(d):** Explore approaches to inform the development and implementation of climate change mitigation strategies, plans, policies and programs, including Nationally Determined Contributions (NDCs) and/or long-term low greenhouse gas emission development strategies that maximize the positive and minimize the negative impacts of response measures.

#### **Guiding questions:**

Q1: As countries are preparing their revised NDCs and LEDS and preparing to recover from the global COVID-19 pandemic, how should climate mitigation policies and strategies be planned and implemented to allow countries to achieve the dual purpose of maximizing the positive and/or minimizing the negative impacts of these policies whilst at the same time contributing to broader national sustainable development benefits?

Q2: What approaches are valuable and should be the primary focus to inform the development of climate change mitigation policies?

**Activity 3(e):** Enhance capacity and understanding of Parties, through collaboration and input from stakeholders, on the assessment and analysis of the impacts of implementation of response measures to facilitate the undertaking of economic diversification and transformation and just transition

#### **Guiding questions:**

Q1: From your experience at country level, what kind of programs are or can be effective in enhancing the capacities and understanding of the impacts of implementation of response measures? In this respect, what role can the KCI play in enhancing the capacity of Parties in the assessment and analysis of impacts of implementation of response measures?

Q2: There are many organizations which already undertake activities in related areas e.g. development of tools, development of guidelines, undertaking assessment, offering training programs, etc. In your view, which type of stakeholders should KCI engage with to enhance capacity and understanding of Parties on the assessment and analysis of the impacts of the implementation of response measures to facilitate the undertaking of economic diversification and transformation and just transition?
