

How to find your index code on the ROE website

1. Go to the ROE website: <https://www4.unfccc.int/sites/roestaging/Pages/RosterOfExperts.aspx>
2. Type your party (country) in the search box:

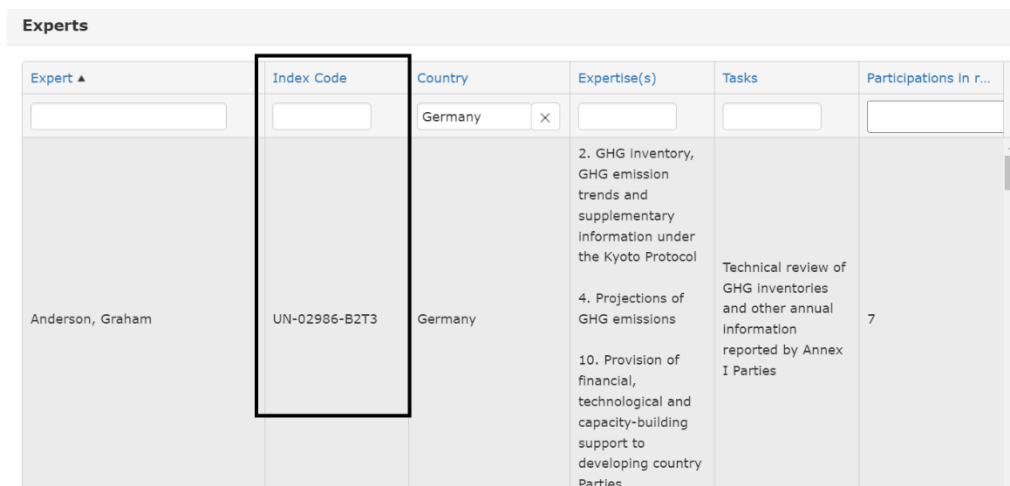

The screenshot shows the United Nations Framework Convention on Climate Change website. The header includes the UN logo and the text "United Nations Framework Convention on Climate Change". A navigation menu on the left lists "Home", "National Focal Points", "Nominated Experts", and "Access Instructions". The main content area is titled "Parties" and features a search box containing "Germany" with a left-pointing arrow. Below the search box is a table with two columns: "Name ▲" and "Total number of experts". The table contains one row: "Germany" with the value "32".

3. Use the cursor to double click on the country name in the box:

This screenshot shows a close-up of the search results table. The search box above contains "Germany". The table has two columns: "Name ▲" and "Total number of experts". The row for "Germany" is highlighted in blue, and a left-pointing arrow points to the "Germany" text in the "Name" column.

4. It will show the results of the experts under the party as the following screenshot with the index code:

The screenshot shows the "Experts" table. The table has six columns: "Expert ▲", "Index Code", "Country", "Expertise(s)", "Tasks", and "Participations in r...". The first row is a header row. The second row is a filter row with a search box in the "Expert" column, a search box in the "Index Code" column, a dropdown menu for "Germany" in the "Country" column, and empty search boxes in the "Expertise(s)", "Tasks", and "Participations" columns. The third row is the first data row, which is highlighted. The "Index Code" column for this row is highlighted with a black box. The data in the third row is as follows:

Expert ▲	Index Code	Country	Expertise(s)	Tasks	Participations in r...
Anderson, Graham	UN-02986-B2T3	Germany	2. GHG inventory, GHG emission trends and supplementary information under the Kyoto Protocol 4. Projections of GHG emissions 10. Provision of financial, technological and capacity-building support to developing country Parties	Technical review of GHG inventories and other annual information reported by Annex I Parties	7
