

March 2024

Regional webinars: Support ecosystem for next round of NDCs

Support for 2025 NDC preparation Initiative for Climate Action Transparency

Celeste Gonzalez
Programme Officer

ICAT provides support to 50+ partner countries

Status

-  Country project(s) in progress
-  Country project(s) completed
-  Country project(s) completed with new project(s) in progress

Regional Hubs

-  Country belonging to a Regional Hub
-  Country belonging to a Regional Hub with separate ICAT country project(s) completed or in progress

Enhancing the impact of climate action

A

Direct country support

Hands-on support tailored to a country's needs and priorities

B

Support through regional hubs

Build capacity through a peer-to-peer network and a centre of expertise in the region

C

ICAT Toolbox

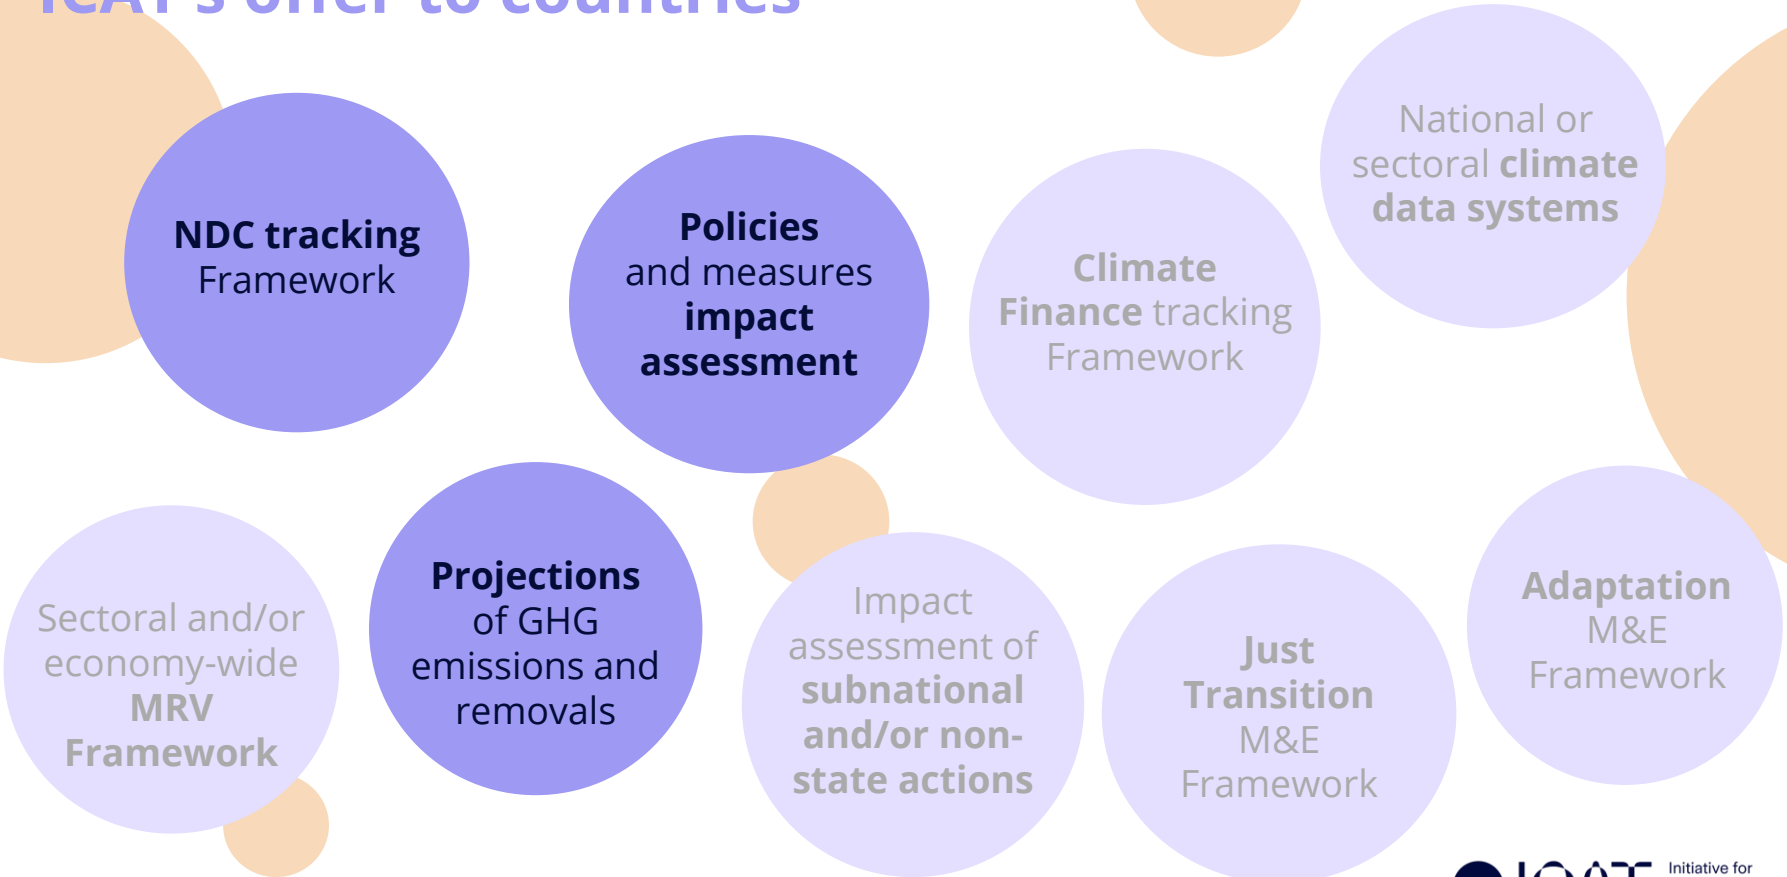

A suite of globally applicable tools and methodologies

D

Knowledge exchange

Access to knowledge products to support a global community of practice

ICAT's offer to countries

ICAT's toolbox meets country needs

Impact Assessment Guides

Greenhouse gas impacts

Agriculture

Renewable Energy

Forestry

Transport Pricing

Building Efficiency

Cross-cutting impacts

Sustainable Development

Transformational Change

Non-State and Subnational Action

Process Guides

Stakeholder Participation

Technical Review

Development of an NDC tracking framework for Cuba's energy sector

- 1 Improved GHG emissions projections for the energy sector
- 2 Calculated mitigation potential of energy measures for its new NDC
- 3 Designed the national MRV system for the energy sector

Steps to receive ICAT support

1
Expression of Interest from an official national entity

2
Selection process
(2-3 months)

3
Preparation
(2-3 months)

4
Project implementation
(12-18 months)
