

IIGCC

We unlock investor action on climate

We bring the investment community together in making significant progress towards a net zero and climate resilient future by 2030.

iigcc.org

Here's how:

350
investors

Inspiring investors to take action towards a net zero and climate resilient future, with more than 350 investors having made a net zero by 2050 commitment under Net Zero Asset Managers or Paris Aligned Asset Owners initiatives.

160
investors

Leading development of frameworks and tools such as the Net Zero Investment Framework – the most widely used methodology for aligning investments with net zero, used by over 160 investors managing more than US\$ 12 trillion in assets.

250
companies

Accelerating real world decarbonisation by supporting investor engagements with companies through initiatives like Climate Action 100+ and the Net Zero Engagement Initiative, which cover more than 250 companies worldwide.

Convening productive and fruitful discussions, bringing the investment community together through regular events and drop in sessions to share knowledge and examples of best practice.

Enabling further momentum by identifying barriers and opportunities to progress and engaging with stakeholders across the market to shape a supportive environment.
