

We partner with governments to support analysis and capacity development to realize gender-responsive NAP processes.

This includes:

- Targeted **gender analysis** to support adaptation planning
- Helping countries develop **strategies** for ensuring that climate action is gender responsive
- Supporting establishment of **institutional arrangements** for gender-responsive climate action
- Working with partners to increase **participation** in adaptation decision making
- **Sharing learning and synthesizing progress** in integrating gender in NAP processes

Since 2017, we have worked with **13 countries** to make their NAP processes more gender-responsive.
