

► Examples across the just transition landscape, a perspective from the ILO

Camilla Roman, Sr Technical Specialist, International Labour Organisation

Advancing just transition: levers and areas of action

Sectoral approaches

Decent work and just transition in climate policies & investments

Climate and JT considerations in economic, employment, social policies & programmes

Just transition strategies, Green Jobs strategies

Financing

Social dialogue & stakeholder engagement

Gender equality & non-discrimination

Examples of ILO's support to countries – 1

Addressing just transition in climate plans (NDCs, LT-LEDs, Climate Change Laws)

Development of **just transition strategies** and **governance systems**

Sectoral plans and measures: renewables- skills & job placement; circular economy – formalization & OSH

Strengthening **social dialogue & stakeholder engagement** processes and institutions

Examples of ILO's support to countries – 2

Economic diversification and just transition plans in coal regions

Social protection systems for just transition and climate resilience

Upskilling and reskilling pathways for affected workers & sectoral skills strategies for emerging industries

Just transition framework in nature-climate investments & green jobs measures in NbS

Modalities and types of support

Assessments and diagnostics

Capacity development: governments and social partners

Knowledge-sharing and Peer-to-peer learning

Technical assistance

Just transition in finance & investments

Just Transition Policy Gateway: the offer

A Global Platform

that connects constituents and partners with a curated, searchable collection of just transition policies

**Policies,
Strategies**

**Policy position
papers, CBAs**

**Frameworks,
Action plans**

A Policy Help Desk

that enables countries and constituents to access tools and tailored support to advance a just transition

powered by in-house expertise, selected internal and external resources, partnerships and broader communities of practice

Some reflections on the just transition landscape

Increasing uptake of just transition (e.g. 79% of NDCs 3.0 include just transition)

Growing demand for technical support with a stronger focus on implementation

Importance of systemic approaches vs ad hoc interventions and silos

Scope for greater connections between policies and finance

Promising international initiatives, need for upscaling and synergies
