Common time frames for nationally determined contributions referred to in Article 4, paragraph 10, of the Paris Agreement

Informal note by the co-facilitators

This informal note has been prepared by the co-facilitators of the negotiations on this agenda item under their own responsibility. It is based on Party interventions, previous submissions and previous informal notes. This informal note does not imply a consensus and does not prejudge the views of Parties.

At this May-June 2021 session, Parties made progress in their deliberations on common time frames. They underscored the importance of concluding this item at COP 26 and exchanged views on many aspects pertaining to common time frames, including within the scope of the following questions:

- 1. For NDCs communicated by 2025, which time frame should Parties apply? Of the various options put forward, which option or combination of options would work best for all Parties?
 - 2. How strong should the call be (e.g. shall, invite, encourage)?
- 3. For NDCs communicated in 2030, 2035, 2040, etc., what guidance should the decision on common time frames provide? Specifically, for Parties supporting the option of a 10-year time frame (whether 10 years, 5 years plus 5 years, or 5 or 10 years), what will Parties communicate in 2030?
- 4. Should there be a call for Parties to review and update existing NDCs every five years?

This informal note contains elements for Parties' further consideration, along with an annex that compiles Parties' proposals on this matter to date.

Elements for further consideration
