

Informal note by the Co-Chairs

on

SBSTA 56 agenda item 14 Work programme under the framework for non-market approaches referred to in Article 6, paragraph 8, of the Paris Agreement and in decision 4/CMA.3

Version 2 (corrected) as at 15 June 2022 (01:30)

The Party views contained in this informal note have been prepared by the Co-Chairs of the 1st meeting of the Glasgow Committee on Non-market Approaches under their own responsibility. The informal note is based on Parties' views and further discussion among Parties at the 1st meeting of the Glasgow Committee on Non-market Approaches at the fifty-sixth session of the Subsidiary Body for Scientific and Technological Advice (SBSTA). These Party views are preliminary, not exhaustive and have no formal status. They are intended to assist Parties in advancing discussions on this matter and do not prejudge further work or prevent Parties from expressing their views at any time.

Parties' views that are not specific to the draft elements on a schedule for implementing work programme activities referred to in paragraph 4 of decision 4/CMA.3, such as elements related to reporting to the Conference of the Parties serving as the meeting of the Parties to the Paris Agreement, review of the work programme and examples of additional focus areas, are not covered in this note. The informal note reflects all of the views expressed by Parties in relation to the paragraph 4 of decision 4/CMA.3. The Co-Chairs noted that some Parties expressed that some of the views contained in this note are not within the scope of the provisions referred to in Article 6, paragraph 8, of the Paris Agreement or decision 4/CMA.3.

1. Schedule for implementing work programme activities

A. Period of the schedule

- Four years consisting of two periods of two years each (2022–2023 and 2024–2025)
 - The schedule includes two phases of work: phase I and phase II. Phase I “Identification phase” (2022–2023), focuses on the activities referred to in paragraph 8(a) and (b)(i) of chapter V in the annex to decision 4/CMA.3, with the aim of providing Parties an opportunity to establish a better understanding of existing and possible non-market approaches (NMAs). Phase II, “Implementation phase” (2024–2025), focuses on activities referred to in paragraph 8(b)(ii–iii) of chapter V in the annex to decision 4/CMA.3
 - First cycle (2022–2023): Year 2022: Emphasis on the identification and framing of all relevant elements of the work programme activities referred to in the annex to decision 4/CMA.3; Year 2023: Emphasis on the implementation of all elements of the work programme activities, with an assessment of the first cycle at the end of 2023. Second cycle (2024–2025): Full implementation, through learning by doing approach, reinforced by inputs from the first cycle
 - The identification and implementation phases can advance in parallel starting in 2022
 - Assessment cycles are included, with the first cycle to be concluded at the end of 2023 and the second cycle to be concluded in 2025 in order to provide a sound basis for the review to be concluded in 2026
 - No assessment is included at the end of phases or cycles
 - Work programme activities do not include assessment

B. Timeline and expected outcomes of each work programme activity referred to in Chapter V of the annex to decision 4/CMA.3

Activity	Expected outcomes ¹			
	2022	2023	2024	2025
A: Identifying measures for enhancing existing linkages, creating synergies and facilitating coordination and implementation of NMAs				
A1: Identification of NMAs				
A1.1: Identifying focus areas of the work programme activities	<ul style="list-style-type: none"> • Submissions on examples of potential additional focus areas are made by Parties and observers {para. 6(b)} • A synthesis report on the examples of potential additional focus areas is prepared by the secretariat {para. 7} • An in-session workshop is organized by the secretariat and a workshop report on the examples of potential additional focus areas is prepared {para. 8} • Focus areas including initial and additional focus areas are established • Any additions to the list of focus areas for phase I are finalized at the 2nd meeting of the Glasgow Committee 	<ul style="list-style-type: none"> • Any focus areas in addition to the initial focus areas listed in decision 4/CMA.3 are confirmed by the Glasgow Committee • Informal note on the outcomes of workshops and other work programme activities referred to in paragraph 8(a) and (b)(i) of the annex to decision 4/CMA.3 is developed at the 3rd meeting of the Glasgow Committee • Identification of focus areas of the Glasgow Committee must be concluded and focus areas are adopted at CMA 5 	<ul style="list-style-type: none"> • Call for submissions to identify additional focus areas for phase II is launched at the 5th meeting of the Glasgow Committee • Informal note on the outcomes of workshops and other work programme activities referred to in paragraph 8(a) and (b)(i) of the annex to decision 4/CMA.3 is developed at the 5th meeting of the Glasgow Committee • Additional focus areas for phase II are finalized at the 6th meeting of the Glasgow Committee 	<ul style="list-style-type: none"> • Review of the current focus areas (including the initial and additional lists) is conducted, as part of the review of the work programme at CMA 7 (November 2025)
A1.2: Identifying existing NMAs under the framework that are in accordance with the provisions referred to in chapter II of the annex to decision 4/CMA.2	<ul style="list-style-type: none"> • Submissions on existing non-market approaches in the initial focus areas are made by Parties and observers {para. 6(a)} 	<ul style="list-style-type: none"> • Informal note on the outcomes of workshops and other work programme activities referred to in paragraph 8(a) and (b)(i) of the annex to decision 	<ul style="list-style-type: none"> • Informal note on the outcomes of workshops and other work programme activities referred to in paragraph 8(a) and (b)(i) of the annex to decision 	<ul style="list-style-type: none"> • Call for submissions for Parties to identify NMAs to inform work programme activities to be discussed at the subsequent meeting of the Glasgow Committee is launched at the 8th

¹ If the references to the same elements (e.g. informal note) are provided in more than one activity (e.g. A1.2 and A1.3), those elements cover the different activities.

	2022	2023	2024	2025
mitigation, adaptation, finance, technology development and transfer, and capacity-building, as appropriate		<ul style="list-style-type: none"> • No coordination network of UNFCCC entities and other related actors is established 	<ul style="list-style-type: none"> • No coordination network of UNFCCC entities and other related actors is established 	<ul style="list-style-type: none"> • developed at the 7th meeting of the Glasgow Committee • Coordination network of UNFCCC entities and other related actors meets in conjunction with each session of the SBSTA • No coordination network of UNFCCC entities and other related actors is established
B3.2: Mapping the initiatives, programmes and projects at the local, subnational and national level, including those that support Parties in meeting the requirements for receiving support and provide capacity-building for the implementation of NMAs		<ul style="list-style-type: none"> • Financial and technical cooperation both public and private in nature at different levels (national, regional and global) (existing initiatives throughout the world (within and outside the UNFCCC) is mapped • Financial and technical cooperation both public and private in nature at different levels (national, regional and global) (existing initiatives throughout the world (within and outside the UNFCCC) is not mapped. 	<ul style="list-style-type: none"> • Financial and technical cooperation both public and private in nature at different levels (national, regional and global) (existing initiatives throughout the world (within and outside the UNFCCC) is mapped • Financial and technical cooperation both public and private in nature at different levels (national, regional and global) (existing initiatives throughout the world (within and outside the UNFCCC) is not mapped. 	<ul style="list-style-type: none"> • Informal note on outcomes of workshops and other work programme activities in paragraph 8(b)(ii–iii) is developed at the 7th meeting of the Glasgow Committee • Financial and technical cooperation both public and private in nature at different levels (national, regional and global) (existing initiatives throughout the world (within and outside the UNFCCC) is mapped • Financial and technical cooperation both public and private in nature at different levels (national, regional and global) (existing initiatives throughout the world (within and outside the UNFCCC) is not mapped.

2. Specifications for the UNFCCC web-based platform

A. Functions

1. Recording information on non-market approaches

- (a) Registering/recording non-market approaches, including through links to related web-based platforms on the UNFCCC platform:
- Identification / registration of:
 - NMAs and actions based on NMAs
 - NMAs based on submitted NDCs with information related to the NDCs
 - Information hub to support the registration/recording of NMAs
 - Registering/recording activities submitted by:
 - More than two Parties consistent with the mandate
 - More than one participating Party
 - Parties and observer organizations – including existing activities
 - Not registering/recording proposals, ideas or concepts for non-market approaches that have not been voluntarily identified by the Parties involved
 - Recording information on NMAs that:
 - Is identified by the participating Parties on a voluntary basis
 - Involves more than one participating Party;
 - Does not involve the transfer of any mitigation outcomes;
 - Facilitates the implementation of NDCs of host Parties and contributes to achieving the long-term temperature goal of the Paris Agreement;
 - Is conducted in a manner that respects, promotes and considers respective obligations of Parties on human rights, the right to health, the rights of indigenous peoples, local communities, migrants, children, persons with disabilities and people in vulnerable situations and the right to development, as well as gender equality, empowerment of women and intergenerational equity, consistently with the eleventh preambular paragraph of the Paris Agreement;
 - Minimizes and, where possible, avoids negative environmental, economic and social impacts Registering/recording non-market approaches, by linking to other related websites to avoid duplication:
 - NMAs should not be copied and pasted from their own websites into the web-based platform
 - Link to existing external platforms and websites with additional information to facilitate access to these with a view to identifying synergies and co-benefits
- (b) Recording lessons learned and best practices in developing and implementing non-market approaches by:
- Facilitating learning by doing
 - Facilitating exchange of lessons learned
 - Facilitating exchange of good/best practices
 - Including new, ongoing and past cooperation, and highlighting best practices and lessons learned
- (c) Recording impacts of non-market approaches:
- A record of the quantum of emissions reductions achieved from a project
 - Non-carbon benefits, including adaptation and other co-benefits, as appropriate

- Recording impacts of non-market approaches voluntarily identified by Parties
- Recording the information identified through the work programme

2. Exchanging information on non-market approaches

- (a) Exchanging information on identifying, developing and implementing non-market approaches:
- The ability to contact potential partners
 - Knowledge sharing
 - Bringing together ideas for, and examples of, non-market approaches
 - Easy sharing/exchange of information about NMAs
 - Replicating successful NMAs, including in the local, subnational, national and global context
 - Facilitating enabling environments and successful policy frameworks
 - Enhancing the engagement in NMAs by the private sector, civil society organizations and vulnerable and impacted sectors and communities
 - Leverage and generate mitigation co-benefits resulting from adaptation actions and/or economic diversification plans that assist the implementation of NDCs
 - Promoting cooperation on NMAs between Parties that supports the implementation of ambitious NDCs contributing to the achievement of the long-term temperature goal of the Paris Agreement, including in relation to the development of NMAs
 - Estimating and report the impacts of NMAs on mitigation and adaptation
 - Establishing guidelines, procedures and safeguards to facilitate NMAs
- (b) Searching recorded information on non-market approaches on the UNFCCC web-based platform:
- Sorting information
 - Searching and filtering by:
 - Key words
 - Tags
 - Categorization between mitigation and adaptation, including joint mitigation and adaptation
 - Categorization by focus area
 - Participants, including Parties and regions, in non-market approaches
 - Information by work programme activity
 - Information should be easily searchable by any end user
- (c) Linking the platform and the centralized accounting and reporting platform of Article 6.2 to ensure that there is no transaction or possibility of transaction of mitigation outcomes
- (d) No linking the platform and the centralized accounting and reporting platform of Article 6.2

3. Supporting identification of opportunities for participating Parties to identify, develop and implement non-market approaches

- (a) Matching needs for support for identifying, developing and implementing non-market approaches with opportunities:
- Matching function between:
 - Needs and the provision of means of implementation (finance, technological transfer and capacity building) to support initiatives
 - Needs of NDCs and means of implementation from existing cooperative sources (both public and private) and generating new programmes
 - The platform can function in a way similar to the NAMA registry or the CDM bazaar recognizing that the framework in itself is not a funding mechanism
 - Important to specify correct definition of the matching function as it will be key to starting to direct the use of resources from the supply and not from the demand side

- Have an administration to ensure the matchmaking of needs and initial existing initiatives within the platform and periodic reporting on the achievements to the Glasgow Committee
- (b) No matching functionalities on needs for support for identifying, developing and implementing non-market approaches and opportunities:
- Matchmaking can be self-directed by Parties on the basis of information captured on the web-based platform, which could include needs for expertise, capacity building, technical support, finance, or technology
 - As NMAs are being identified by the participating parties on a voluntary basis and involve more than one participating party, all NMAs reflected on the web-based platform will already be matched with at least two Parties who have voluntarily identified that NMA
- (c) Supporting identification, development and implementation of NMAs
- Tools and knowledge products that describe best practice and lessons learned for NMA identification
 - Tools and knowledge products that describe best practice and lessons learned for NMA development
 - Tools and knowledge products that describe best practice and lessons learned for NMA implementation
- (d) Mapping opportunities for support to NMAs:
- Identify, register/record and map NMA financial and technical cooperation throughout the world:
 - Initiatives, programmes and projects
 - Public and private sources
 - Bilateral and multilateral channels
 - At different levels (national, regional/multiparty, and global/multi-region)
 - Within/outside the UNFCCC
 - Modalities of access
 - Do not identify, register/record or map NMA financial and technical cooperation throughout the world
 - Mapping opportunities according to the criteria to be developed for the framework
 - Virtual tools to support the mapping of NMA actions' needs and initiatives, programmes and projects for the provision of means of implementation
 - No virtual tools to support the mapping of NMA actions' needs and initiatives, programmes and projects for the provision of means of implementation
 - Identifying virtual tools to support the mapping of NMAs
- (e) Providing information on NMAs:
- If there are initiatives that match NMAs, estimate outcomes achieved from an NMA project
 - Information for framing the scaling up of the NMA process through the formulation of country, national and regional profiles based on NDC needs
 - Focus area of NMA
 - General description of NMA
 - Positive and other experiences of existing linkages, synergies, coordination and implementation in relation to NMAs
 - Opportunities to scale or replicate NMAs
 - Description of how the NMA is conducted in a manner that respects, promotes and considers respective obligations of Parties on human rights, the right to health
 - Description of how the NMA minimizes and, where possible, avoids negative environmental, economic and social impacts
 - Description of how the NMA aims to promote mitigation and adaptation ambition
 - Description of how the NMA aims to enhance participation of public and private sector and civil society organizations in the implementation of NDCs
 - Description of how the NMA aims to enable opportunities for coordination across instruments and relevant institutional arrangements

- (f) Inviting support for developing and implementing non-market approaches:
 - Open invitations to create, join, or contribute to NMA approaches, potentially as an open forum
- (g) Not inviting support for developing and implementing non-market approaches
- (h) Inviting engagement in identifying, developing, and implementing NMAs
 - Open invitations to create, join, or contribute to NMA approaches, potentially as an open forum
- (i) Facilitating networking between stakeholders:
 - Facilitating connections by including contact information and easily navigable/searchable content, as well as links to existing bodies, institutions, programmes, initiatives and websites that are relevant to the given NMA
 - Enhancing regional and global agreements/alliances
 - Not enhancing regional and global agreements/alliances
- (j) Facilitating coordination between Parties and other relevant actors, including civil society and the private sector
- (k) Providing learning materials for identifying, developing and implementing non-market approaches, including for the development of new initiatives, programmes and projects

4. Other/cross-cutting

- (a) Providing information on conditional elements of NDCs and/or long-term low-emission development strategies that require support from other Parties as a function of the UNFCCC web-based platform:
 - Governments as main users to register NDC (prioritizing conditional part) in order to receive support with means of implementation through NMA
- (b) Not providing information on conditional elements of NDCs and/or long-term low-emission development strategies that require support from other Parties as a function of the UNFCCC web-based platform
- (c) Providing information on elements of NDCs and/or long-term low-emission development strategies that require support from other Parties as a function of the UNFCCC web-based platform:
 - Governments as main users to register NDC in order to receive support with means of implementation through NMA
- (d) Providing information on NDCs and long-term strategies where ambition could be enhanced through the facilitation and coordination of an NMA
- (e) Working with Indigenous peoples with regard to NMAs for enhancing climate actions, through representatives chosen by themselves in accordance with their own procedures
- (f) Registering sectoral, regional or global profiles of the needs for preparing corresponding initiatives:
 - Article 6.8 does not contain a registry and it is not a financial mechanism, therefore registration is not a function of the Platform and there is no provision of support or means of implementation through the Platform.
 - Scaling up the process through the development of country, national and regional profiles on the basis of NDC needs
 - Supporting the development of country profiles, regional profiles (multi-party) and global profiles (multi-region)
 - Mapping public and private financial and technical cooperation at different levels (national, regional/multi-party, and global/multi-region) (existing initiatives throughout the world (within and outside the UNFCCC)
- (g) Article 6.8 does not contain a registry, therefore registration is not a function of the Platform.
- (h) NMAs are not necessarily programmes or projects.
- (i) Not registering sectoral, regional or global profiles of the needs
- (j) Proposing and generating new programmes:
 - Administration of the platform can also propose and generate new programmes according to NDC needs identified at different levels (taking into account country, regional and global profiles)
- (k) Working with indigenous peoples and local communities:

- Working with indigenous peoples and local communities with regard to NMAs for enhancing climate actions, through governmental initiatives and programmes

B. Target users

- (l) Participating Parties:
 - Governments could register their NDCs to receive support with means of implementation through NMA
- (m) Non-Party stakeholders:
 - Accessible to non-Party stakeholders
 - International cooperation (technical and financial) to register initiatives, programmes and projects, with a focus on how to scale up initiatives and develop new ones on the basis of country needs
 - Private sector to strengthen cooperation and support for NDCs and climate change action, through intergovernmental initiatives and programmes related to NMAs
 - Access by any end-user, including private sector, civil society and NGOs
- (n) Relevant bodies, institutional arrangements and processes under or related to the Convention and the Paris Agreement:
 - Platform designed to support and strengthen the work of the Glasgow Committee and its institutional arrangements, in order to fully operationalize NMAs under the UNFCCC
 - Facilitating the establishment of linkages between UNFCCC entities and other related entities
- (o) Other stakeholders, including indigenous peoples and local communities:
 - Indigenous peoples and local communities, cities, youth, women, and other relevant actors, in order to make alliances with the support of national governments for receiving international cooperation to strengthen climate action

C. Information to be contained

- Information provided may be reflected in a standardized format and may include the elements in paragraph 3 (a-f) of the annex to decision 4/CMA.3, and other information identified by Parties that will support the facilitation of implementation and coordination of the non-market approach identified

D. Form

- Accessibility:
 - User friendly website / interface
 - Easy to navigate, with logical functions, including easily searchable information
 - Accessible to non-technical audiences including governments, NGOs, civil society and the private sector and users from mobile devices and with slow internet connections
 - Available in all six United Nations languages
- Relation to other sites/sources:
 - Consider existing UNFCCC platforms with similar objectives which have not met expectations
 - Operate in a similar way to the NAMA registry or the CDM bazaar
- The web-based platform should be updated regularly as opportunities for cooperation are identified or developed

E. Other

- Process for revising administrative processes and format as well as type of information registered/recorded
- Capture lessons learned from existing platforms within and outside the UNFCCC as well as from past experience, such as with NAMA registries and the CDM bazaar
