

## **NATIONAL STATEMENT**

**VICE PRESIDENT  
OF THE REPUBLIC OF INDONESIA  
H.E. MA'RUF AMIN**

**HIGH-LEVEL SUMMIT COP 27**

**SHARM EL-SHEIKH  
NOVEMBER 7<sup>TH</sup>, 2022**

Excellencies,

1. The world is currently facing the **triple planetary crisis...** climate change... pollution... and biodiversity loss.

→ These three are interrelated and very urgent to overcome.

2. Amidst such crisis... there is no other choice... but to cooperate.

3. **Paradigm of collaboration** must be put forward.

4. Allow me to share three things.

5. **First, COP-27 in Egypt must be the COP of implementation.**

6. One year after Glasgow... there has been no significant global progress.

7. For this reason, COP-27 must be used ...

→ not only to enhance **ambition**, but also **implementation...**

- including the fulfillment of **support from developed** to developing countries.
- 8. **Second**, we all must be **part of the solution** ...
- 9. Every country must contribute... in accordance with their respective capacities...
  - with the spirit of *burden-sharing* instead of *burden-shifting*
  - more capable countries should support and empower the other countries.
- 10. **Third**, Indonesia continues its efforts to ***lead by example***.
- 11. Two months ago, we have submitted ***Enhanced Nationally Determined Contribution (Enhanced NDC)***
  - which consists of the **enhanced target of Indonesia's emission reductions** ...
  - to 31,89% with its own capacity, and ...
  - 43,20% with international support.

12. Such increase is coherent with significant progress of our policies, including among others...

→ expansion of **nature conservation and restoration**,

→ implementation of **carbon tax**,

→ achieving **FOLU Net Sink 2030**,

→ development of **electric vehicle environment**, and

→ initiation of **biodiesel B40** program

13. To ensure the financing of energy transition ...

→ Indonesia has launched the ***Country Platform for Energy Transition Mechanism***.

14. All of these national efforts... need to be complemented by clear international supports...

→ including the establishment of an effective, and equitable carbon market,

→ investment for energy transition,

→ and financing for climate action.

15. As the **G20 Presidency**, Indonesia continues to push for green recovery... as well as strong and inclusive climate action.

16. In the future, through the **ASEAN Chairmanship** in 2023 ...

→ Indonesia will continue to pay attention to strengthening climate action.

Excellencies,

17. We must take **concrete actions**... and strengthen **collaboration** based on dialogue and trust,

→ to create a better and more sustainable world.

Thank you.
