

International Wineries for Climate Action (IWCA)

UNFCCC Net Zero Recognition Framework (NZRF) Submission

IWCA Net Zero Commitment Criteria

Core Commitment:

- Achieve net zero by 2050 or earlier in line with a 1.5°C pathway
- Reduce emissions across the wine value chain

Science-Based Targets:

- Targets validated by SBTi
- Include Scopes 1, 2, and relevant Scope 3 emissions

Measurement and Reporting:

- Annual GHG accounting aligned with GHG Protocol
- Transparent disclosure via IWCA framework

Verification:

- Independent third-party verification required

Decarbonisation Approach:

- Focus on absolute emissions reductions
- Carbon removals only for residual emissions

Accountability:

- Annual progress required
- Maintenance of good standing status
