Delivering a gender-responsive just transition for all

In-session workshop co-organized by ILO and UNFCCC
3 December 2023, Dubai
Feminist Advocacy at COP28

Women & Gender Constituency
WGC Priorities

Demanding feminist climate justice
#EndFossilFuels #FastFairForever

WGC is partnered across allied climate justice colleagues in an acceleration plan to end fossil fuels - building towards COP28 and keeping pressure on well beyond. In the coming months we will be working to showcase feminist fights to end fossil fuels.
Ensuring a gender just transition

WGC is bringing a feminist narrative around what a gender just transition looks like across countries and communities - as well as engaging in activities to showcase and uplift gender just climate solutions.

We know the real solutions to shift from an extractive to a regenerative economy already exist - and we need to move power, money and minds to scale and replicate them.

This will also inform our advocacy in the UNFCCC process around a just transition work programme as well as all aspects of financing such as negotiations around a new collective quantified goal on finance and financing for loss and damage.
Global Stocktake

The GST provides an opportunity for countries to assess the gender responsiveness of their climate policies and actions, and to identify ways to enhance gender equality by:

1. Assessing the gender-differentiated impacts of climate change
2. Highlighting the role of women and discriminated groups in climate action
3. Identifying gaps in gender mainstreaming in climate policies and programs
4. Ensuring gender-responsive means of implementation

**Cross-cutting:** Ambition, urgency, phase out of fossil fuels, financing

WGC GST September 2023 Submission

WGC GST Presentation

Synthesis Report
Finance: Loss and Damage

WGC collaborated across Constituencies during the Transitional Committee (TC) process, just concluded, on key asks regarding the operationalization of the new L&D Fund (LDF).

TC package sent to COP 28 (Draft Decision, Governing Instrument for LDF, funding arrangements) is disappointing compromise:
- lacks strong reference to human rights, but acknowledge gender equality, role of women as stakeholders (including as active observes), and need for small grant access for local communities.
- No CBDR-RC, reference to scale and obligation for developed countries

Some core asks of WGC are taken up in TC outcome WGC/CAN/DCJ Joint Submission
Advocating for a Gender-Just Transition

- Parties affirmed that sustainable and just solutions to the climate crisis must be founded on meaningful and effective social dialogue and participation of all stakeholders and noted that the global transition to low emissions provides opportunities and challenges for sustainable economic development and poverty eradication;
- There should be a negotiated outcome on just transition from this COP
  - The WGC supports a more comprehensive understanding of just transition, and how it does relate to gender.
- WGC Submission
Adaptation

Current state of negotiations...
- Year 2 of the GlaSS work programme with four workshops planned (Workshop 1 was in March 2023, Workshop 2 was at SB 58);
- Much of the work is likely to focus on agreeing the framework for the GGA by a decision at COP28 / CMA5;
- Choices need to be made around how the outcomes of the work of the GlaSS might be integrated into the GST as well as discussions on the NCQG;

Global Goal on Adaptation → doubling of adaptation finance (opportunities and challenges)
WGC Key Activities

Coordination
- Pre-session trainings and strategy meetings
- Morning caucus meetings (9 a.m. every day)

Advocacy
- Interventions (also a communications function)
- Actions / demonstrations
- Social media (also a communications function)
