

Work Programme on the New Collective Quantified Goal on Climate Finance

Information about the resource persons

John B. Echauz

Chairman and CEO, Insurance Support Services International (ISSI) Corp.

John B. Echauz is Chairman and CEO of Insurance Support Services International (ISSI) Corp., a business process outsourcing company serving the global insurance sector. ISSI Corp. is currently building its practice supporting climate finance and sustainability. To contribute to global decarbonization, John co-founded Nascent Technologies, the Philippines first and only electrochemical engineering battery R&D company, and CCCO2 Corp., a reforestation company. He also leads the development of Metro Pacific Investment Corp.'s large-scale municipal solid waste-to-energy project serving Quezon City, the Philippines' largest local government unit. He also works towards reduction of malnutrition in pregnant mothers and children below three years old as the Philippines' chairman for the Scaling Up Nutrition (SUN) Business

Network, convened by the World Food Program. His other interests are in increasing the country's economic complexity and environmental restoration and conservation.

He has a BS in Industrial Engineering minor in Chemical Engineering from De La Salle University Manila and an MBA from Columbia University, New York (Honors). He is married with four children.
