Background

Mandate

- Develop a toolbox customizable to local circumstances, including methodologies, for Parties to identify, assess and address impacts of response measures
- Build capacity and share experience on using the toolbox

Key Deliverables

- Two reports and recommendations under this activity
- Finalized toolbox with associated guidelines or manual for use
- First report to be finalized by SB 67

What was discussed

- The working group reviewed the mandate of Activity 10 and the progress made so far towards developing a toolbox for assessing and addressing the impacts of response measures.
- Members considered the tools, methodologies, guidance materials and practical applications already developed by the KCI under previous activities.
- The discussion focused on how the toolbox could build on existing KCI work, avoid duplication, and provide practical value to Parties.
- Members emphasized the importance of ensuring that the toolbox is accessible, user-friendly, customizable to national circumstances, and supported by real-world applications.

Way forward

- Expand the CPIA-GEM tool to cover additional policies and country contexts.
- Organize and consolidate existing KCI methodologies, tools and guidance materials into a structured and accessible entry point.

THANK YOU
