Subject: RE: Call for inputs by the Katowice Committee of Experts on Impacts relating to activities to be implemented at its next meeting

Dear Mr. Grabert,

In response to the call for inputs by the KCE on the impacts of the implantation of response measures issued on 6 August, the Global Water Partnership (GWP) would like to avail itself of this opportunity to stress the importance of implementing sustainable and resilient water resources management as a response measure supporting economic diversification and call for the inclusion of water resources management within the capacity building focus area.

To this end, we are pleased to be able to share with you the following knowledge products that we have been producing of late.

- Water, climate and development programme training Initiatives across Africa and in the Caribbean:

GWP would be pleased to be able to support the UNFCCC's continued efforts in this domain through its regional and country workshops, organized in partnership with other entities, as a tool to enhance implementation, in particular as related to sustainable and resilient water resources management and access to climate finance. We look forward to being able to collaborate on this very important element.

With my best regards,
Dani
