

Lisa-Maria Rebelo is the Lead Scientist for Digital Earth Africa, where she provides leadership and strategic guidance to the scientific, research and technical operations of the Program. She has 20 years of experience working in the Earth observation sector across Africa and Asia. Lisa's work has focused on the provision of spatial information, metrics and indicators to inform land and water management strategies, and the integration of science-based outputs into policy processes targeting both national and international agenda's.
