

**UNFCCC COP 27**  
**Sharm El -Sheikh, Egypt**

**“Financing Resilience” Implementation Lab**  
**Guest Attendees’ Notes**

Marrakech Partnership for Global Climate Action

DATE: 9<sup>th</sup> November

TIME: 2.30pm – 4pm

LOCATION: Lotus Room, Blue Zone, Sharm El Sheik International Conference  
Centre

Organised by Mahesh Roy (IIGCC & MPGCA Finance Focal Point), Hugh Garnett (IIGCC), Hannes Graef (Scale for Resilience), Sabrina Nagel (Scale for Resilience)

HLCC team: Hanan Sakr (Resilience Finance lead), Marcia Toledo (Resilience Lead), Veronica Chau (BCG)

Thank you for your acceptance of our invitation to attend the Implementation Lab as a guest. Below is an outline of the event.

## Event Overview

*The lab will bring together ‘macro’ institutional efforts to address Physical Climate Risk, ‘micro’ solutions that are already being demonstrated in this area, particularly in the global south, along with innovative financing vehicles and projects that help funds flow in between the macro and micro – with the hope that this dialogue can further enable bringing these actors together – that is to scale up the lessons learned from the micro solutions, to be addressed at the macro level where risks are aggregated and enable the flow of data and capital between the two.*

*The following will be presented by participants in a ‘Ted Talk’ format, with emphasis on delivery as opposed to slides, with breakout groups reporting feedback to the broader group and next steps being discussed and decided by a facilitated roundtable discussion at the end.*

- *Outline of Macro solutions and framework for financial institutions (CRIF & PCRAM)*
- *Showcase of data and digital solutions to address physical climate risk using financial technology in the global south*
- *Examples of funds and innovative solutions*

*The roundtable discussion at the end will look to address:*

1. *A program to design elements of a common taxonomy/lexicon for A&R linking local to global*
2. *Ways to measure progress towards the ‘Sharm El Sheikh Adaptation Outcomes’ for financial institutions and public finance*
3. *Means and ways of scaling of local solutions throughout the world*

## Keeping in touch

This is an opportunity for you to connect with investors and other A&R leaders. We encourage you to connect and stay in touch with one another and keep the conversations going beyond the event and COP27. We will therefore end on next steps for increased collaboration and speakers and participants will be followed up with a survey to gather reflections.

## ‘The Sharm El Sheikh Adaptation Outcomes’ for financing resilience

The high-level climate champions have worked with BCG in formulating a number of adaptation outcomes to be released at COP 27. This implementation lab will look to address the following solution.

*‘Private sector integrates physical climate risks into investment decisions and continues to innovate mechanisms for financing A&R so as to enable the mobilization of the \$140 to \$300B by 2030 that will be needed across both public and private sources’*

## Context

*Context:* This event hopes to provide a rapid-fire overview of action across the globe on financing adaptation and resilience with interested actors from diverse backgrounds in the hopes of achieving radical collaboration that will last well beyond the session in working to achieve the adaptation outcomes.

## Speaker presentations

The format of this event will include speakers presenting a 2-3 minute 'Ted Talk' style presentation on their contribution to financing resilience and adaptation. Speakers will also be acting as a participant in commenting and asking questions of the other presentations and in the ensuing roundtable.

## Roundtable

Participants of the roundtable discussion will intervene following each speaker presentation by commenting and asking questions of the presenters and in the roundtable discussions.

## Run of show

Time	Activity	Who	Notes
1400 – 1430	Set up and arrival – <u>all speakers are kindly requested to arrive outside the Lotus Room no later than 1410 and participants no later than 1425</u>	Speakers, Co-Facilitators, organisers, participants	Observers may enter the room
1430 – 1435	Opening Remarks	Nigel Topping, High Level Climate Champion	
1435 – 1437	Introduction & House Keeping	Mahesh Roy, Director IIGCC	Welcome and format of event to described
1437 – 1440	The Sharm El Sheik Adaptation Outcomes	Veronica Chau, Partner BCG	Outline the solution we're working towards and its development. Handover to John Haley.
1440 – 1445	Presentation on CCRI	John Haley, Chair, CCRI	3-5 minutes, TED style, max. 3 slides
1445 – 1450	Presentation on CRIF	Danielle Boyd, Senior Programme Manager, IIGCC	3-5 minutes, TED style, max. 3 slides
1450 – 1455	Presentation on Yapu	Christoph Jungfleisch, Managing Director & Founder, Yapu	3-5 minutes, TED style, max. 3 slides
1455 – 1500	Q&A on Presentation	All participants Moderated by Veronica Chau	3 questions at a time will be aggregated,

			facilitators will ensure diverse views
1500 – 1505	Presentation on GAWA Capital	Luca Torre, Founder & Co-CEO, GAWA Capital	3-5 minutes, TED style, max. 3 slides
1505 – 1510	Presentation on Blended finance vehicles for A&R	Ariane Pevide, Director MUFG	3-5 minutes, TED style, max. 3 slides
