

Information request on your EoI to collaborate with KCI to develop a case study

First of all, the KCI would like to thank you for expressing your interest in collaborating with KCI in the development of the case study in line with the concept note (attached). In order to for the KCI to have more clarity on your interest and to consider it to the next step, we would like to request you to kindly respond to following questions:

Questionnaire

1. If you haven't done so, please indicate which of three option you choose from the concept note to develop the case study in collaboration with KCI:
 - a. ***Option 1- Country-specific case study:*** Assessing the effects of the global energy transition (such as the reduction of hydrocarbon demand due to global energy transitions and rising climate policies) in a fossil-fuel dependent economy, taking into account people in vulnerable situations, as well as efforts toward economic diversification and transformation and just transition.
We would like to do a country specific case study.
 - b. ***Option 2- Region-specific case study:*** Assessing impacts of the implementation of emissions reductions climate policies, on economies, taking into account people in vulnerable situations, as well as efforts toward economic diversification and transformation and just transition.
 - c. ***Option 3- Sector and region-specific case study:*** Assessing impacts of increasing fuel costs on resource-dependent, carbon-intensive tourism sectors, taking into account people in vulnerable situations, as well as efforts toward economic diversification and transformation and just transition.

2. If possible, kindly provide brief description of the case study for the chosen option, e.g. the sector, the climate policy, the country/region, etc.

We proposed to conduct a case study to assess the domestic and international mitigation policies and the impacts it will have on our economy with some recommendations for policy considerations. The case study should consider economy-wide mitigation policies. Existing domestic mitigation policy measures and options such as use of fuel subsidies, renewable energy and energy mix could be studied. Maldives being an import dependent economy, cross-border policies such as from the IMO and CORSIA could also be considered during the case study.

3. What is the status of the assessment of impacts for the specific case study? Choose from below, and elaborate as necessary:
 - a. Assessment of impacts is complete for the case study (published/unpublished)
The assessment is in final draft form and unpublished yet. KCI can assist to complete.
 - b. Assessment of impacts is in progress/ partially complete for the case study and will be developed together with KCI
 - c. The study will be initiated in collaboration with KCI
 - d. Other.....(specify)

4. If the case study is already available, please provide the link to the case study.

It is not online yet, but the document could be shared via email.

5. If you would like to develop or initiate a case study, or further develop your existing case study, in collaboration with the KCI, how can you contribute? (for example: by providing resources, by developing the case study itself, etc.)? Do you have adequate financial and human capital to prepare the case study in collaboration with KCI?
