

THE NDC PARTNERSHIP IS CREATING COLLECTIVE IMPACT THROUGH COLLABORATIVE ACTION

To enhance the NDCs and accelerate implementation:

- The NDC Partnership launched the **Climate Action Enhancement Package (CAEP)** in July 2019, implemented through 2020.
- Through the common framework provided by CAEP, **40 implementing partners** are covering **755 activities** across **65 countries** on raising ambition and accelerating implementation.
- Over **\$40 million in support** - \$25 million from TAF and over \$15 million from partners own resources - are being planned and programmed through CAEP.

To ensure the NDCs are at the heart of COVID-19 recovery:

- The Partnership is working with **ministries of finance and planning to deploy economic advisors** for recovery planning that encompasses sustainable development and national climate agendas.
- On June 29, the NDC Partnership will host a **high-level forum** to build momentum and support for green recovery efforts.
