# 1. Overview

The NDC Navigator is an analytical tool that supports Technical Review Officers and Technical Review Experts during the BTR review process. It enables users to explore NDC Progress data submitted by Parties in line with Decision 5/CMA.3 using CTF submissions. **Only submissions successfully ingested into the Climate Data Hub are available in this analytical tool.**

## Nationally Determined Contributions (NDCs) Progress Navigator Tool Structured Summary

This Tool focuses on the quantified commitments made by Parties under their NDCs. It includes details such as Target types (e.g., absolute reduction, intensity-based reduction). Key indicators and their definition Implementation periods and baselines. Scope and coverage, including gases, sectors, and cooperative approaches. The Tool allows stakeholders to filter data by Party, target year, and type, enabling comparative analysis across Parties. It also supports direct export of tables and charts for integration into the synthesis report.

## 1.1 Access:

Log in using your registered email address.

If you need access, contact:

- [tools.support@unfccc.int](mailto:tools.support@unfccc.int)
- Or request access through the Technical Review Officers (TROs).

Once access has been granted, you can use the NDC Navigator space via:

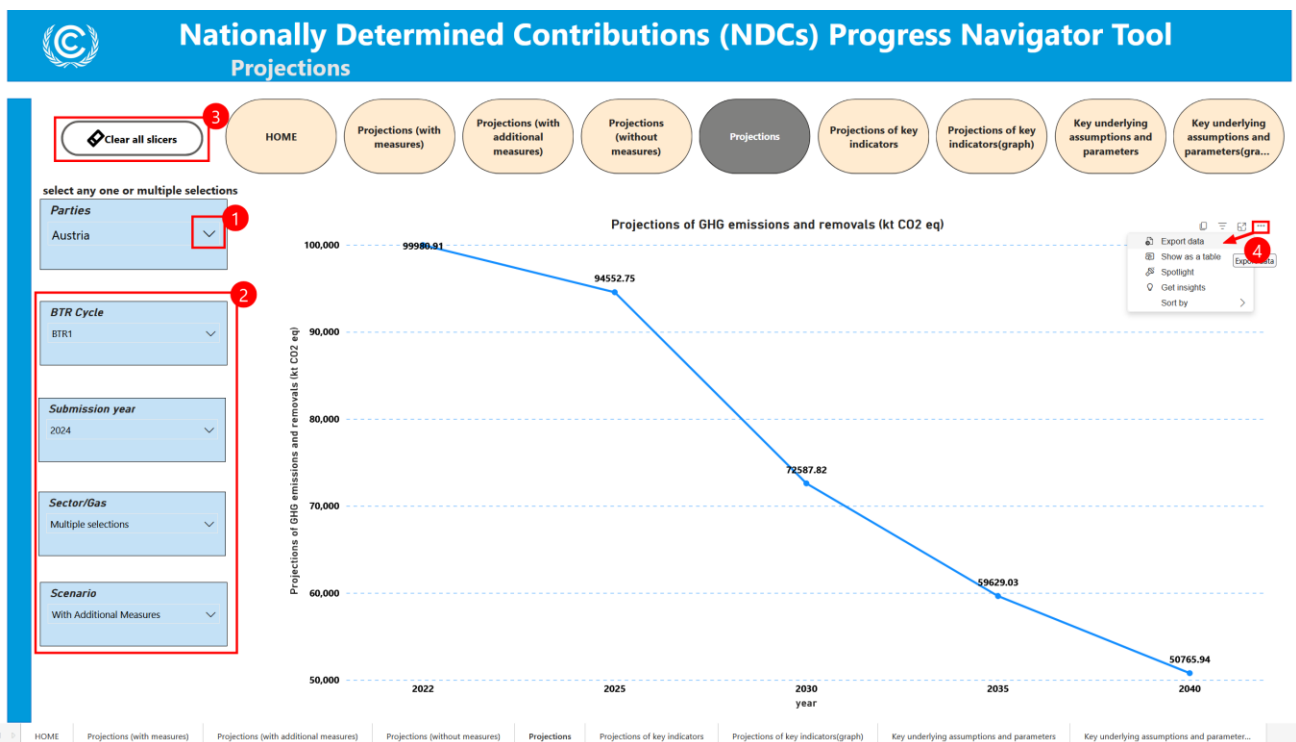

- The BTR Review Collaboration Tool
- Structured Summary – [Access here](#)
- Policies and Measures – [Access here](#)

- Projections – [Access here](#)

## 1.2 What can users do:

1. Select Party, Compare Party Submissions
2. Filter by BTR Number, Submission year, Type of instrument, Status of implementation, Sectors, Gas, Start year of implementation, Estimates of GHG emission reductions, Projection years
3. Selected parameters or filters can be removed with Clear all slicers
4. Selected parameters can be exported and downloaded as excel

You may also follow our video tutorial, which is available [here](#).
