

ANNUAL REPORT

Thank you for participating in the Climate Neutral Now initiative. As committed in your pledge, you must report annually on your climate actions. To do so, please fill in this Report and send it back to us via email (climateneutralnow@unfccc.int). If you report to CDP, this report is not necessary and in this case, please advise us via email.

3.What are the challenges and opportunities to climate action that might affect the financial or strategic plans of your business?

Please describe here.

More and more of our customers and partners are looking for companies with a real consideration of the climate issues to collaborate with

4.Have climate-related risks and opportunities been considered in your organization's strategy and/or financial planning? *Please describe here.*

Risks are to loose strategic partnership because of a lack of action towards climate issues and opportunities is the differentiation versus the competitors by showing real action.

☐ Do no engage

7.Please indicate any awareness raising or advocacy initiatives that were active within the reporting year. *Note that this can include those in the planning and/or implementation phases.*

Our team is committed to offering unique products made from natural raw materials and with lower environmental impact. We are also working to reduce our carbon footprint over the entire life cycle of our products. We have therefore joined the Climate Neutral Now approach.

15.How much of the total emissions (metric tons of CO2 equivalent) correspond to Scope 1?

Confidential

16.How much of the total emissions (tons of CO2 equivalent) are corresponding to Scope 2 using the Market Approach?

A market-based method reflects emissions from electricity that companies have purposefully chosen (or their lack of choice).

Confidential

17. How much of the total emissions (tons of CO2 equivalent) are corresponding to Scope 2 using the Location Approach?

A location-based method reflects the average emissions intensity of grids on which energy consumption occurs (using mostly grid-average emission factor data).

N/A

18. How much of the total emissions (tons of CO₂ equivalent) are corresponding to Scope 3?

Scope 3 includes indirect emissions that occur in your organization's value chain. If you are not measuring this scope, answer with "0", please.

Confidential

19. Please select the categories included in your Scope 3, and their status

You can find a detailed description of the categories on the Corporate Value Chain (Scope 3) Accounting and Reporting Standard, p. 34 (<https://ghgprotocol.org/standards/scope-3-standard>)
