

Global Climate Action High-Level Event, December 11, 2023

Closing segment

Statement by Peru

- Thanks to the high-level champions for setting up this closing event and for your leadership.
- COP 20 in Lima started the Lima-Paris action agenda and defined the appointment of high-level champions. Since Paris, the role of cities, business, regions, indigenous peoples and others has grown exponentially. Under the leadership of the high-level champions new initiatives and campaigns mobilized non-state actors in mitigation, adaptation, and finance. All the initiatives and campaigns under the leadership of the high-level champions and the Marrakech Partnership are convening and mobilizing non-state actors under a common goal, accelerating action and supporting parties.
- We appreciate the contribution of Dr. Mohieldin, COP 27 high-level champion on adaptation and finance. We welcome the leadership of her excellency Razan Al Mubarak on nature and inclusion.
- Peru expects to see progress at this COP on the integration of nature and climate. The GST has to give clarity in the contribution of high-level champions in the way forward, as it is critical to have an “all of society” approach to reach the goals of the Paris Agreement.
- Thank you.
