

Colombia's NDC 3.0 Update Process

Juan Pablo Benavides Peña

Biologist

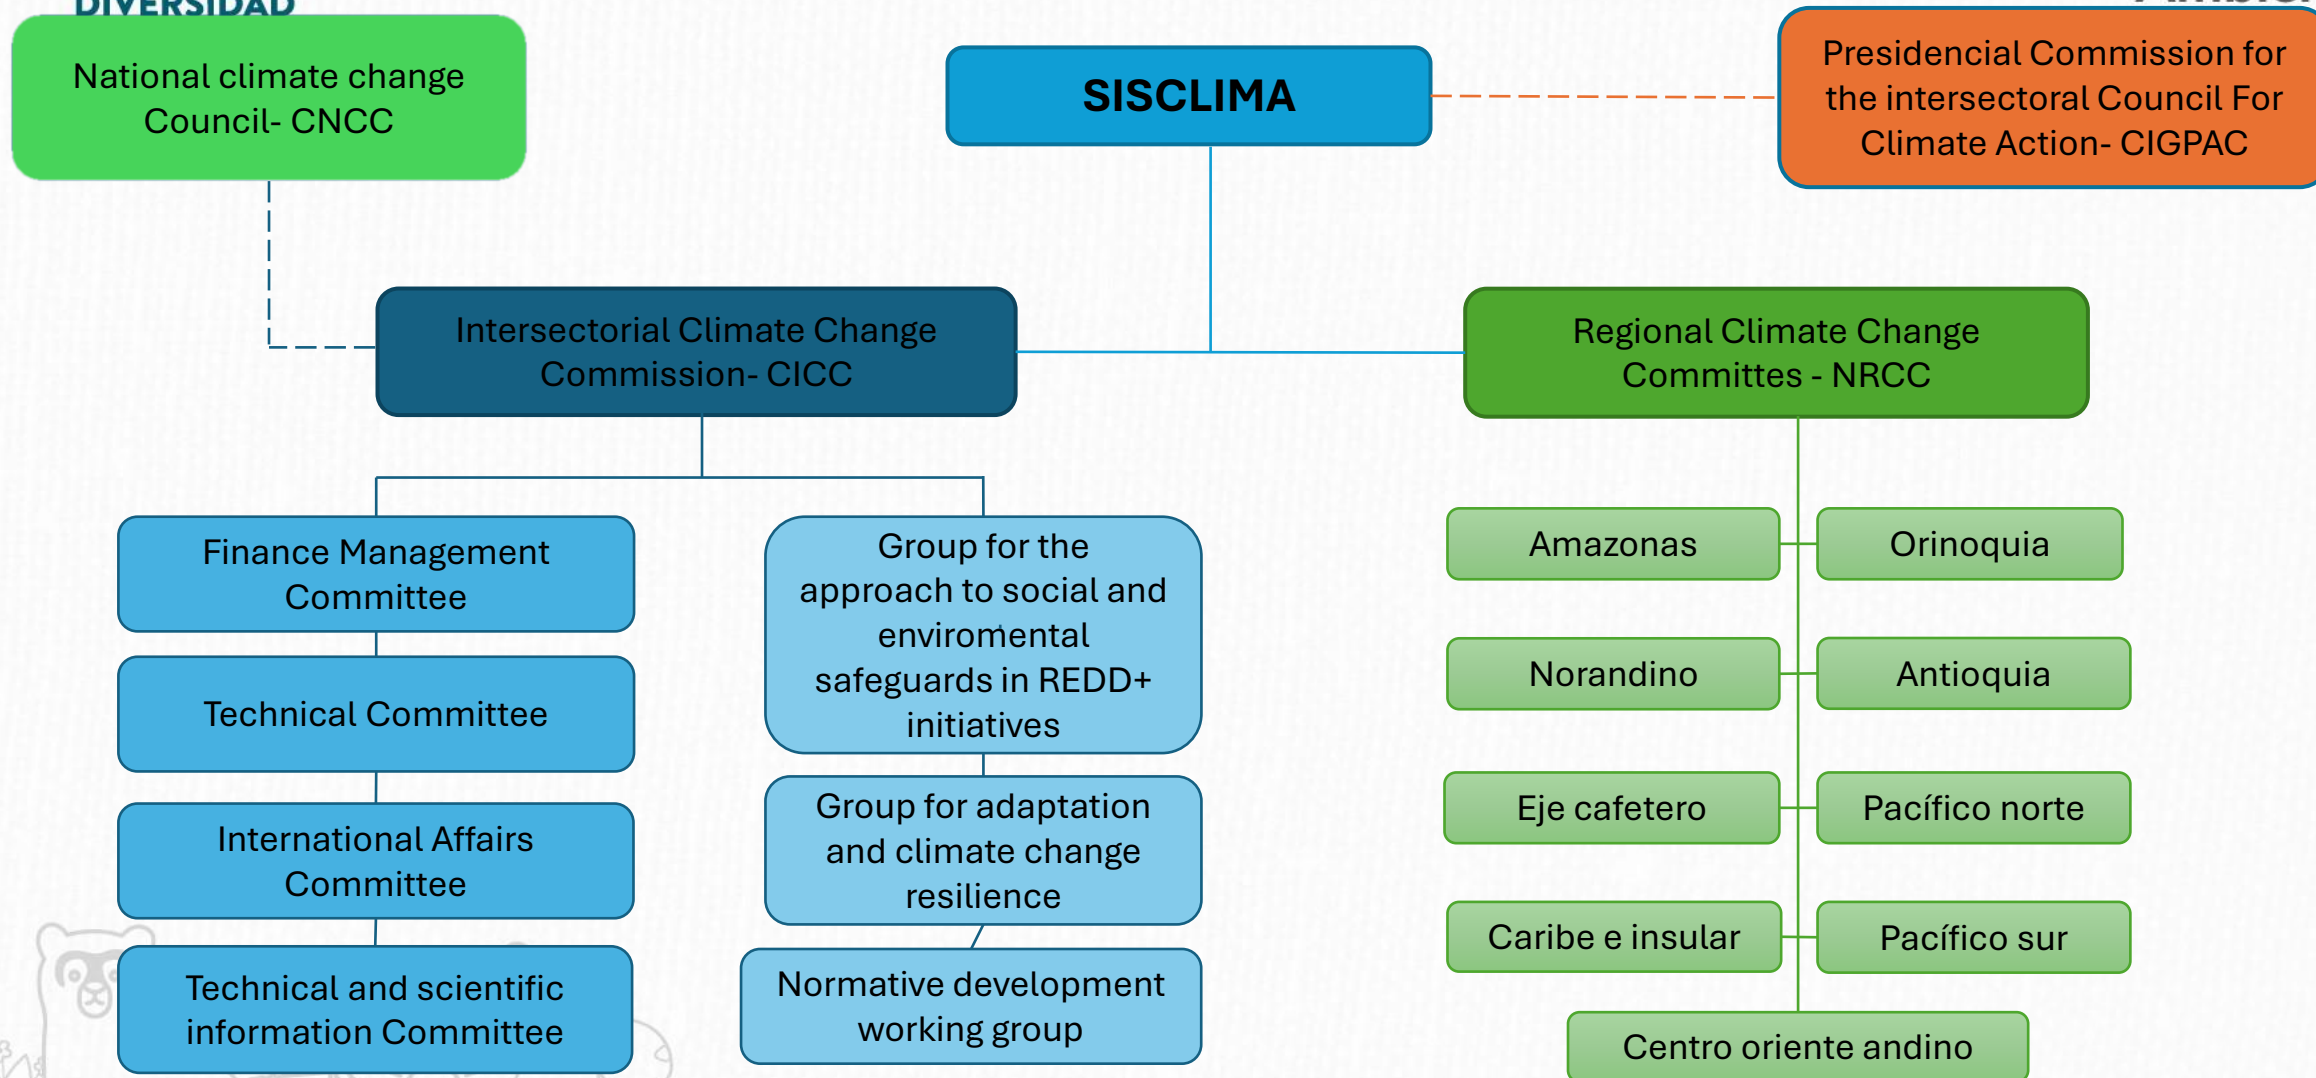

Former NDC Consultant to the Ministry of Environment and
Sustainable Development of Colombia

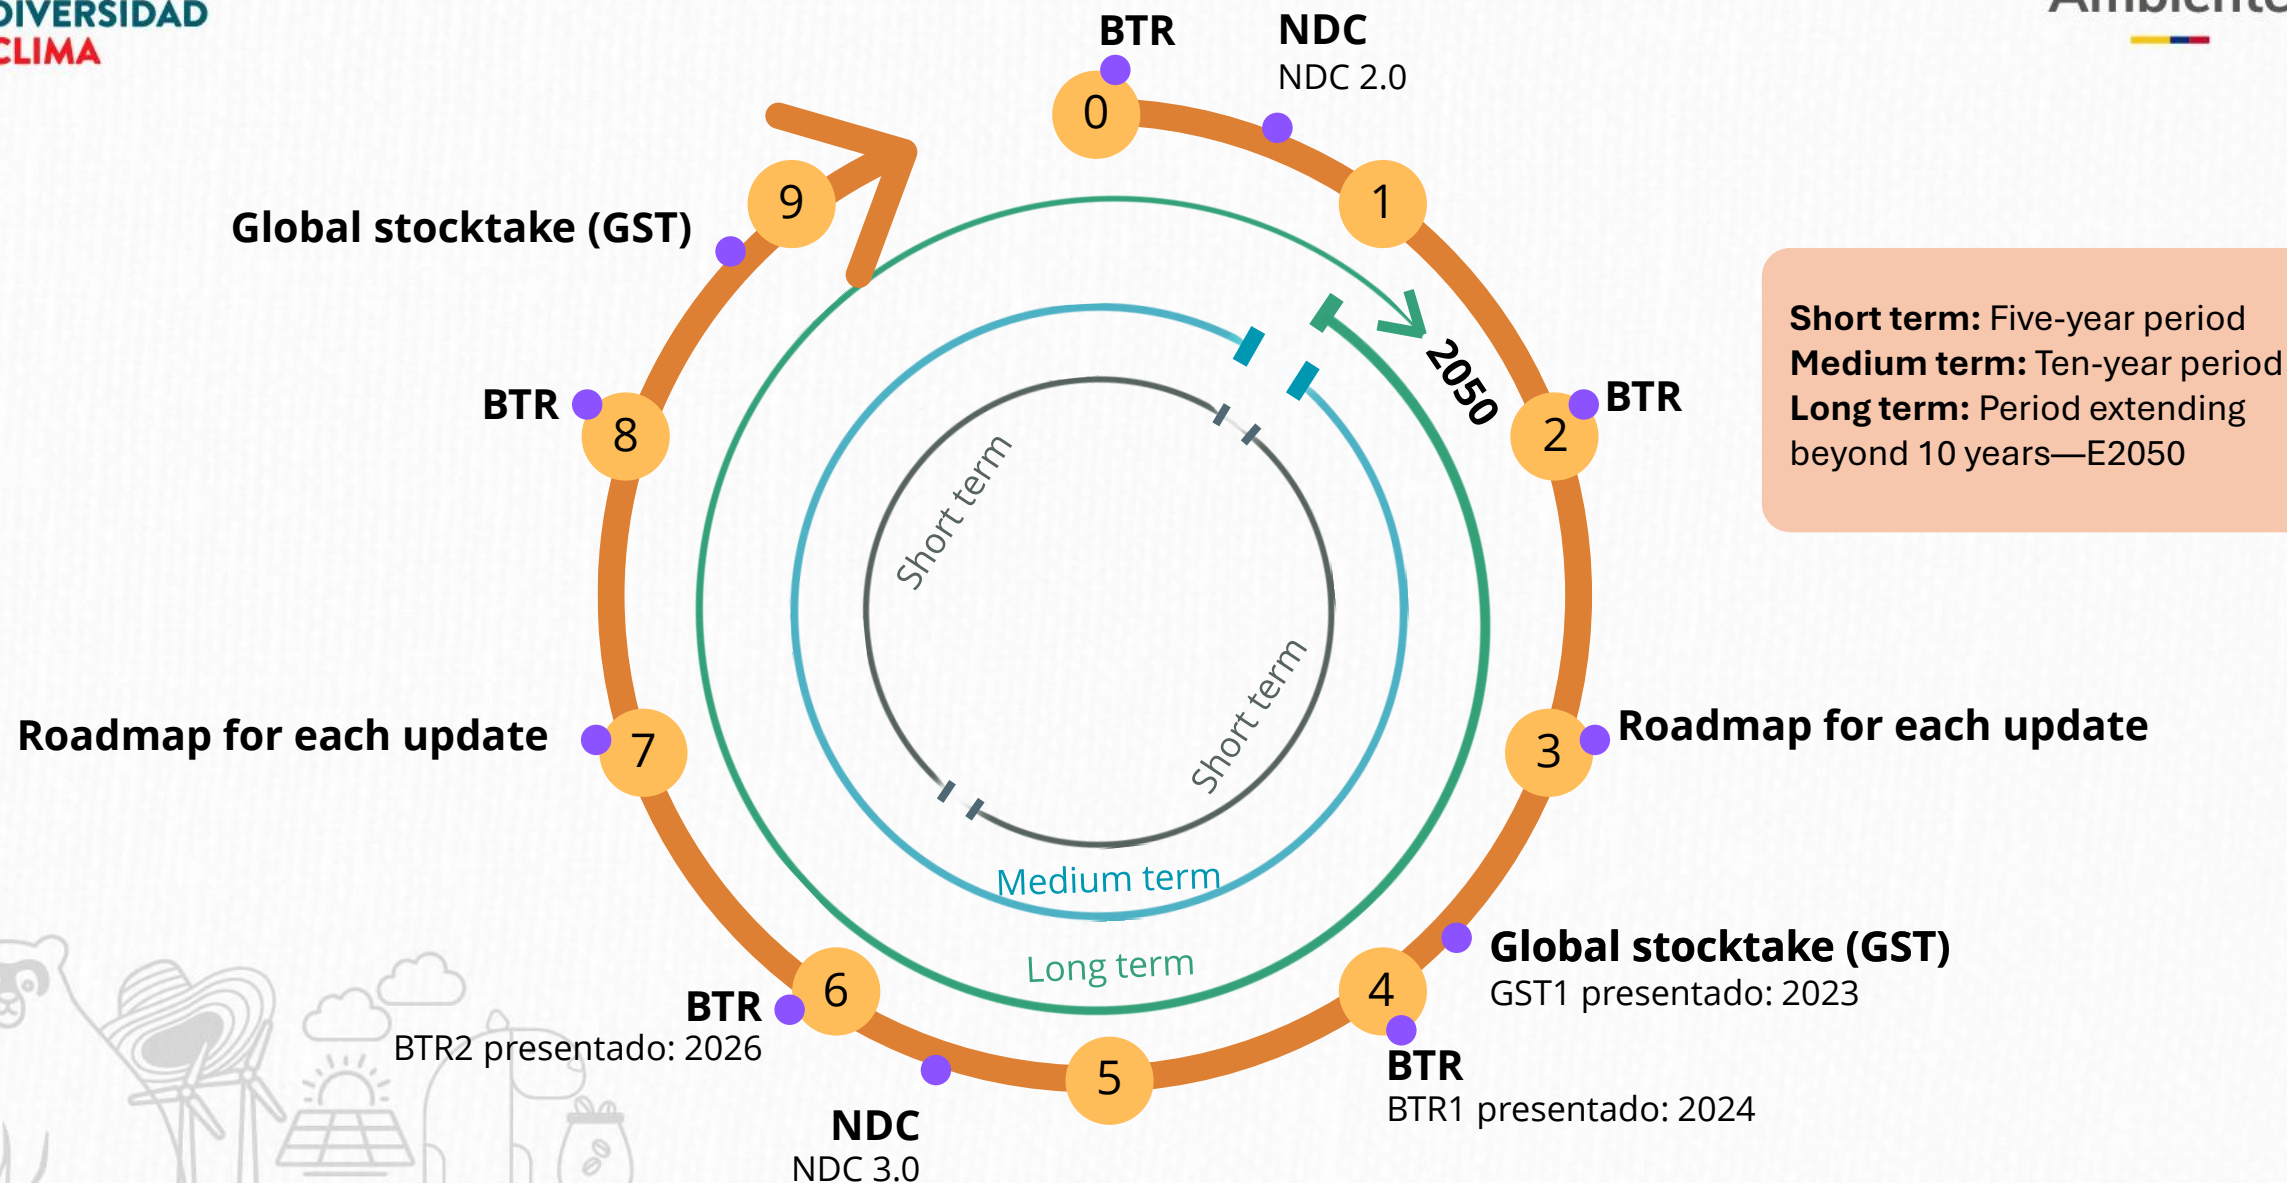

National Climate Change System - SISCLIMA

Ambiente

National Ambition Cycle (Decree 971 of 2016)

Stakeholder engagement:

Territorial Spaces

Regional Nodes
Intersectoral participation
Territorial entities
Subnational employment potential

Afro Communities

Initial space with representatives
Space for dialogue with them
Recommendations in the process

Indigenous Population

Initial space with representatives
Space for dialogue with them
Recommendations in the process

Peasant Communities

Initial space with representatives
Space for dialogue with them
Recommendations in the process

People with Reduced Capacities

Review of media and goals
Interest groups articulation
Diligence – Implementation plan

Women

Rural campaigning women
Indigenous women
Afro-descendant women

Boys, Girls and Adolescents

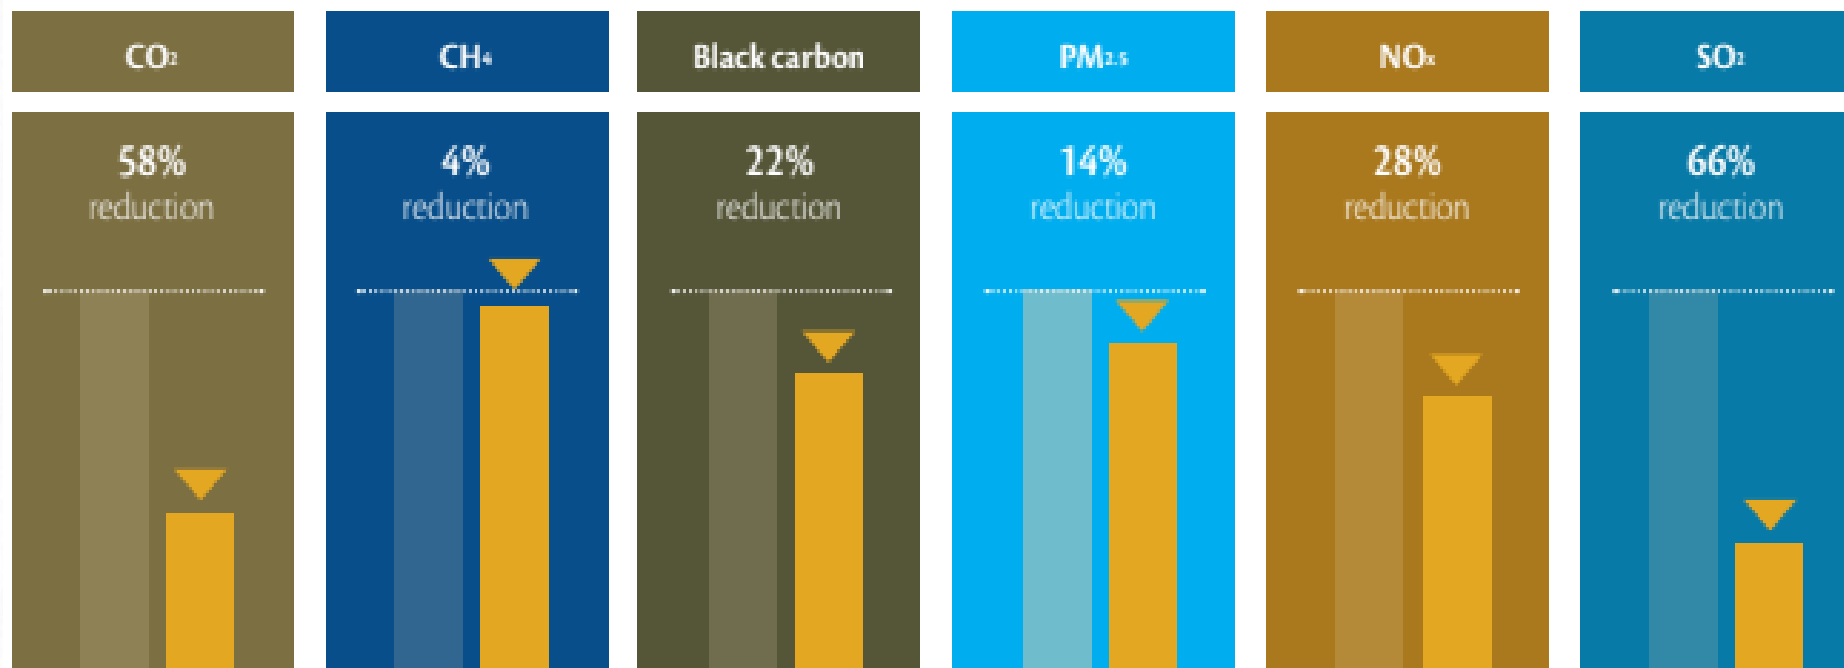

Participation in territorial workshops
Potential work with the Youth Network

Other Spaces

Digital – Virtual sessions
Citizen participation

Health benefits of raising ambition in Colombia's Nationally Determined Contribution (NDC) WHO technical report

Key outcomes

These GHG emissions reductions would be accompanied by significant air quality improvements that could:

- prevent more than 3 800 premature deaths annually from ambient air pollution in 2030
- in economic terms, this result represents an annual cost of US\$1.9 billion (2017 prices) (0.64% of Colombia's projected GDP in 2030).

Peace and Climate Action Methodology in Colombia's NDC 3.0

A practical bridge from international peace frameworks to measurable climate implementation

POSITIVE PEACE

IEP pillars translated into governance, human capital, equitable opportunity and constructive relations

HUMAN SECURITY

UN people-centred lens across economic, food, health, environmental, personal, community and political security

PEACEBUILDING

Participation, legitimacy, local capacity, conflict prevention and transformation, trust and do-no-harm safeguards

OPERATIONAL LOGIC

Official NDC measure • assigned peace line(s) • expected peace outcome • implementation action
actors and instruments • indicator • means of verification

FIVE OPERATIONAL PEACE LINES

1

Governance & transparency

2

Human rights & social empowerment

3

Human security & community resilience

4

Sustainable development & Positive Peace

5

Innovation & cohesion for capacity building

CROSS-CUTTING ALIGNMENT

Just Transition, SDGs, human rights, gender and children

RESULT

Climate outcomes and social outcomes reinforce each other: the NDC 3.0 Peace Dividend

Application rule: preserve the peace lines already assigned in official sectoral records; operationalize them through traceable actions and sector-level indicators.

¿What is the Country Platform??

It is a portfolio management strategy that prioritizes high-impact, multisectoral projects that contribute to climate change adaptation and mitigation goals.

maximizing

Its distinguishing feature is

The ability to align

Priorities

Methodologies

Eligibility Criteria

Ensuring that international and private investment aligns with a sovereign and comprehensive vision of climate action, environmental justice, and the country's socio-ecological transition

The Just Energy Transition

Biodiversity Protection

Resilient infrastructure

Sustainable territorial development

Gracias!!
