

UN Women's work on the gender and climate nexus

Gender Equality and Climate Policy Scorecard

A unique new tool

Tracks where countries stand on gender-responsive climate policies (NDCs) across **six gender dimensions**

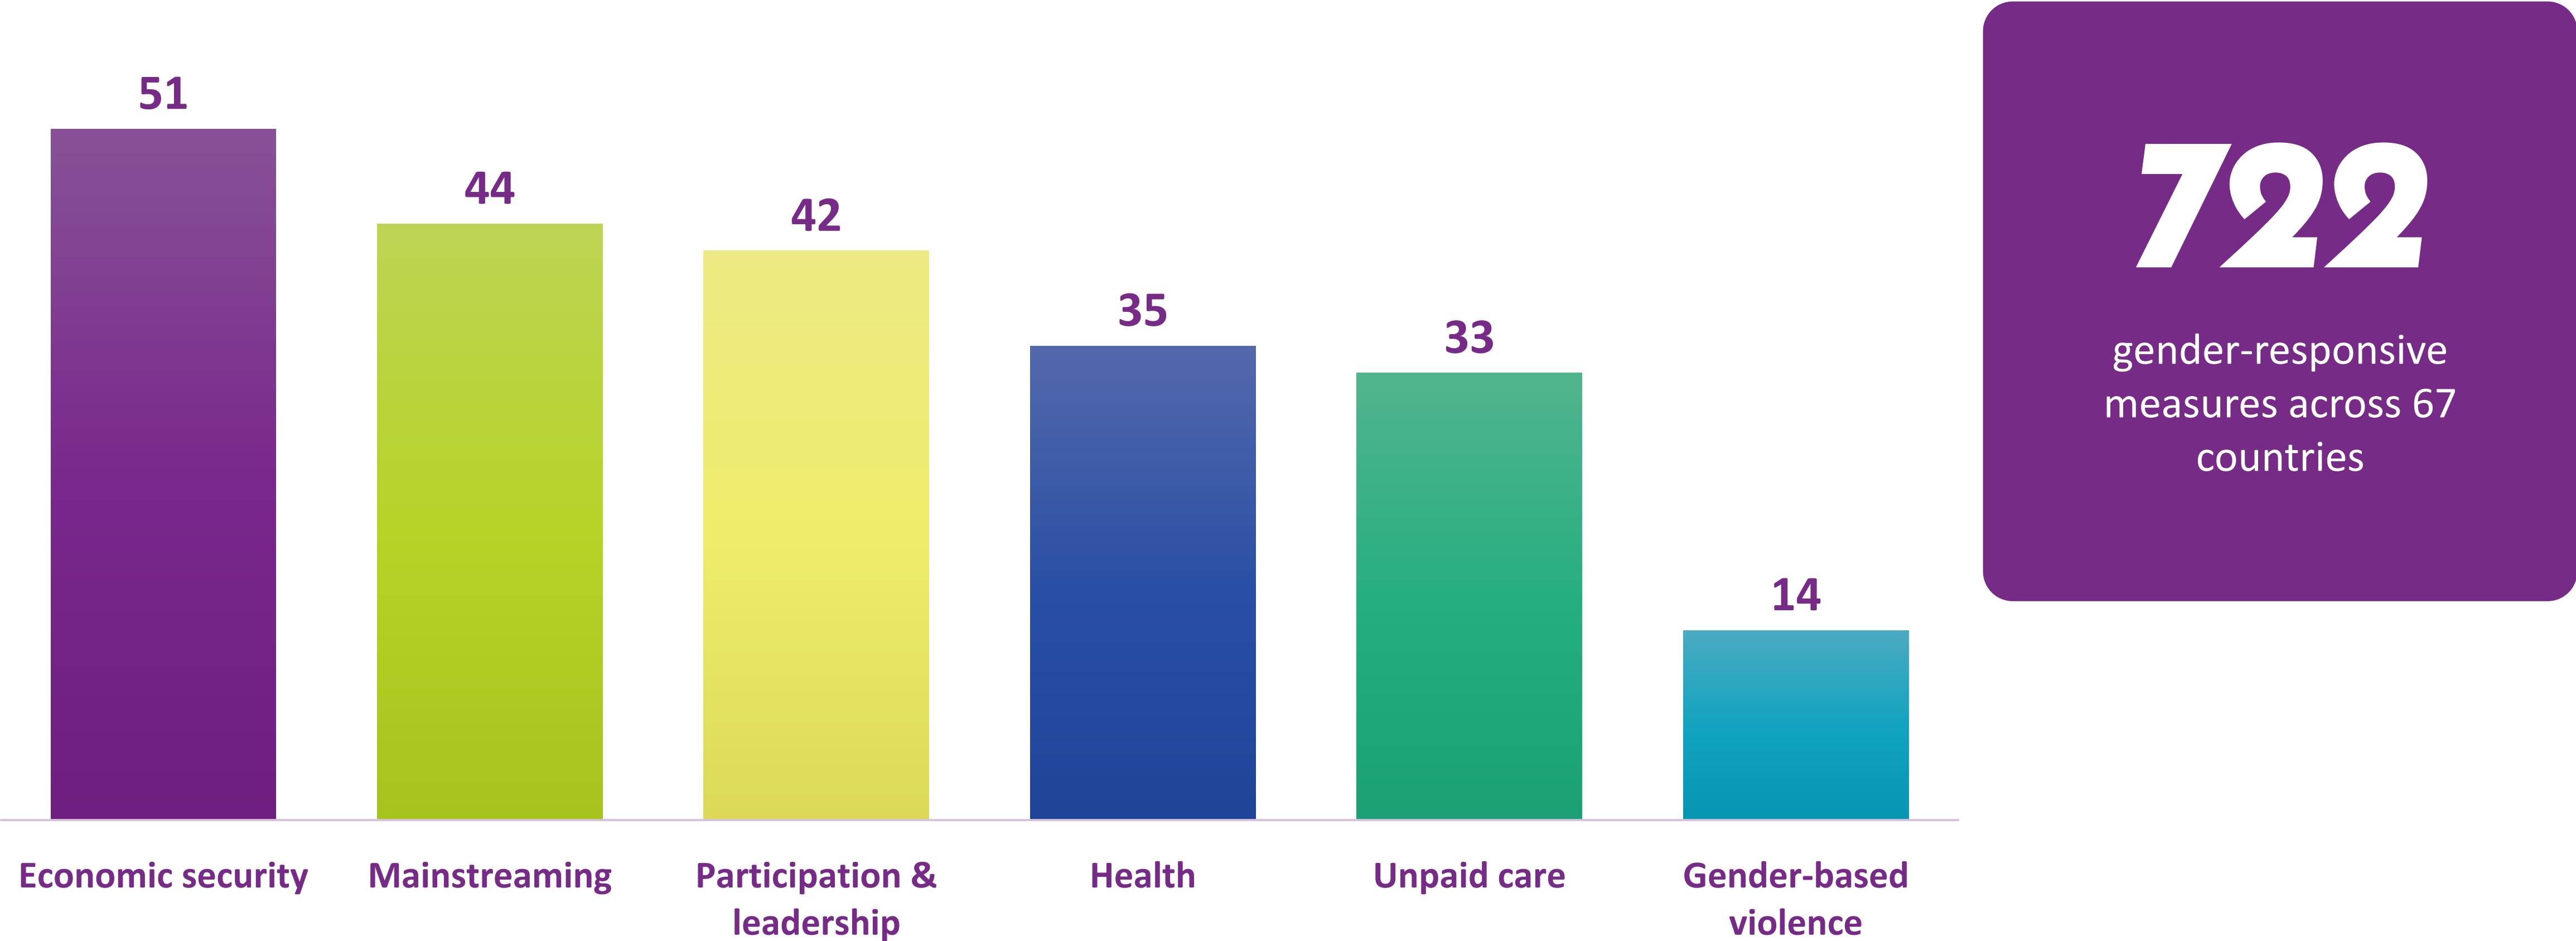

Per dimension, it evaluates if the NDC:

- 1 Identifies gendered risks
- 2 Recognizes women's contributions
- 3 Commits to action

Compiles all commitments to action into a database, and classifies each measure by **climate policy area** (e.g. adaptation/mitigation/L&D) and **sector** (e.g. agriculture, energy)

Care remains under-prioritized

Number of countries with at least one measure, by gender dimension

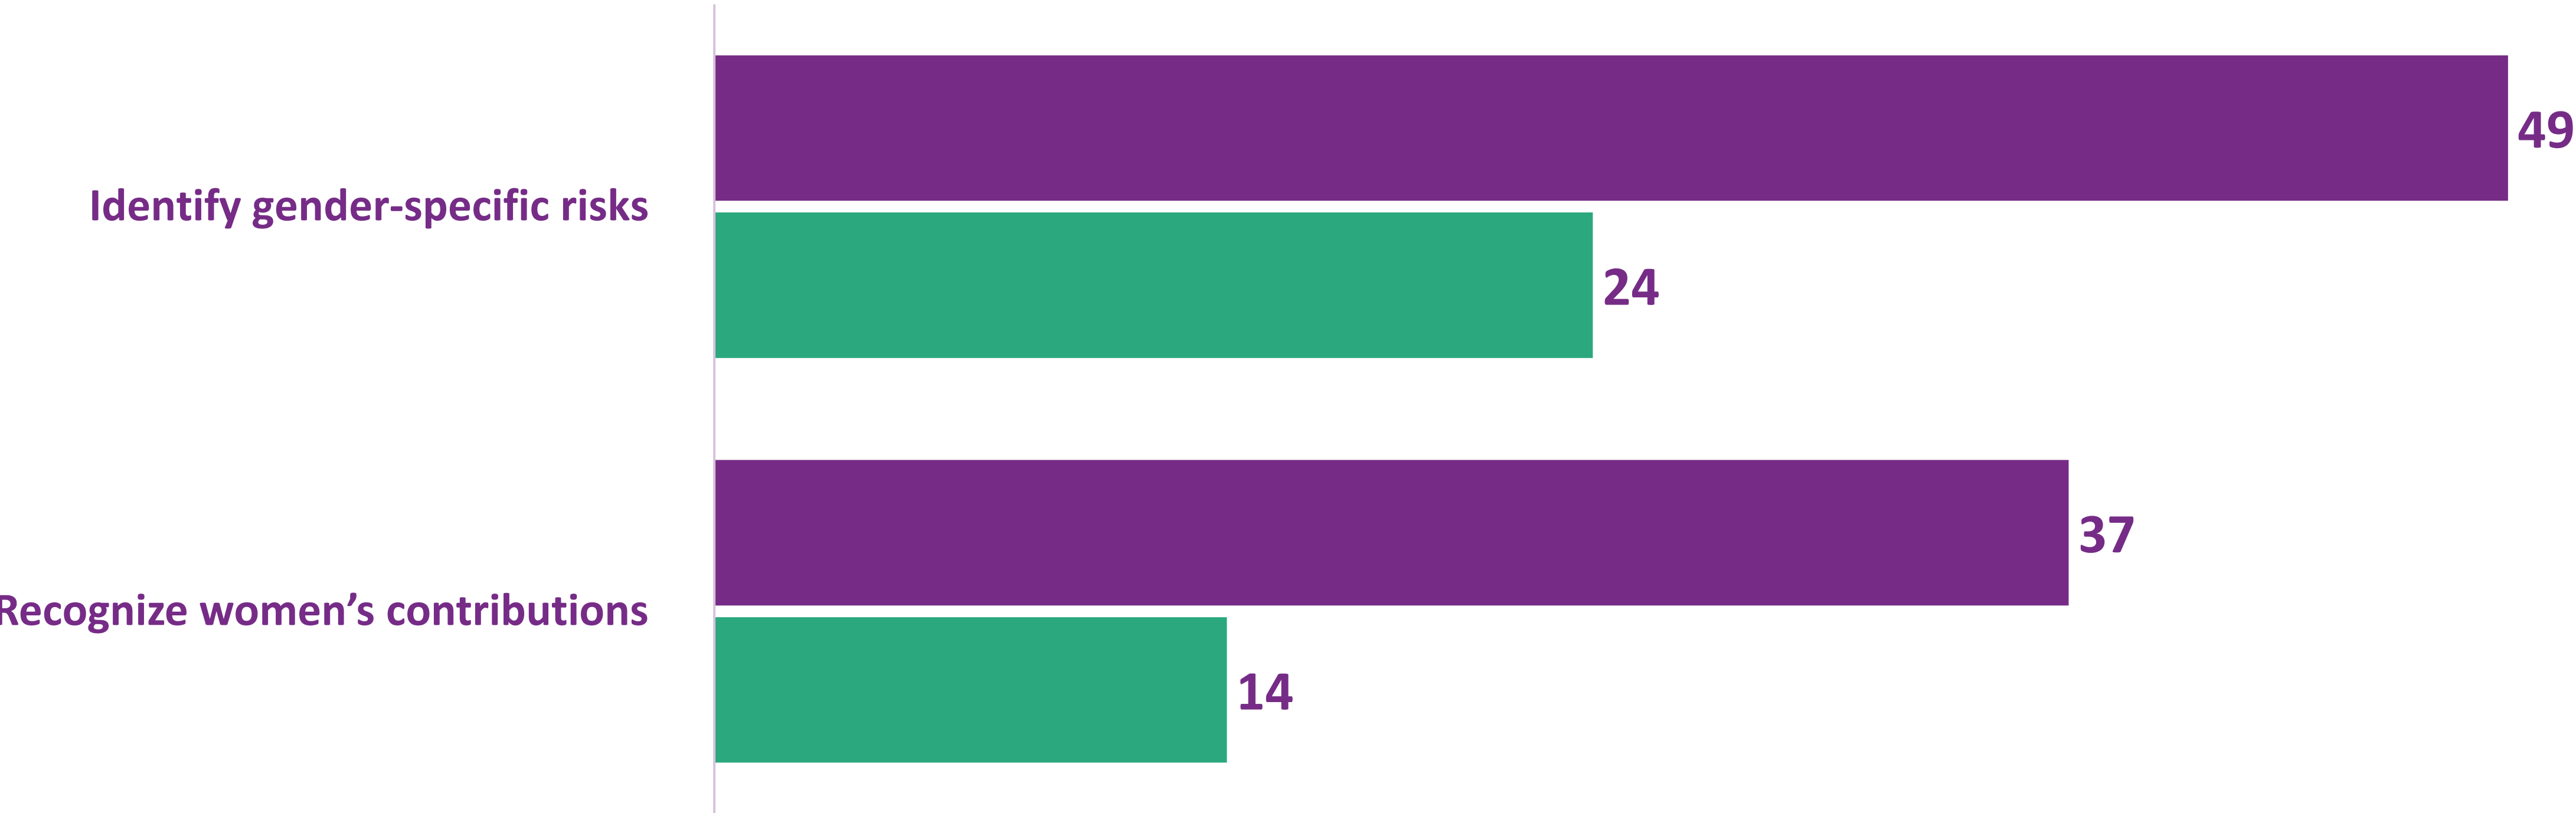

Gaps in how care is framed

How are gendered risks and contributions integrated in NDCs?

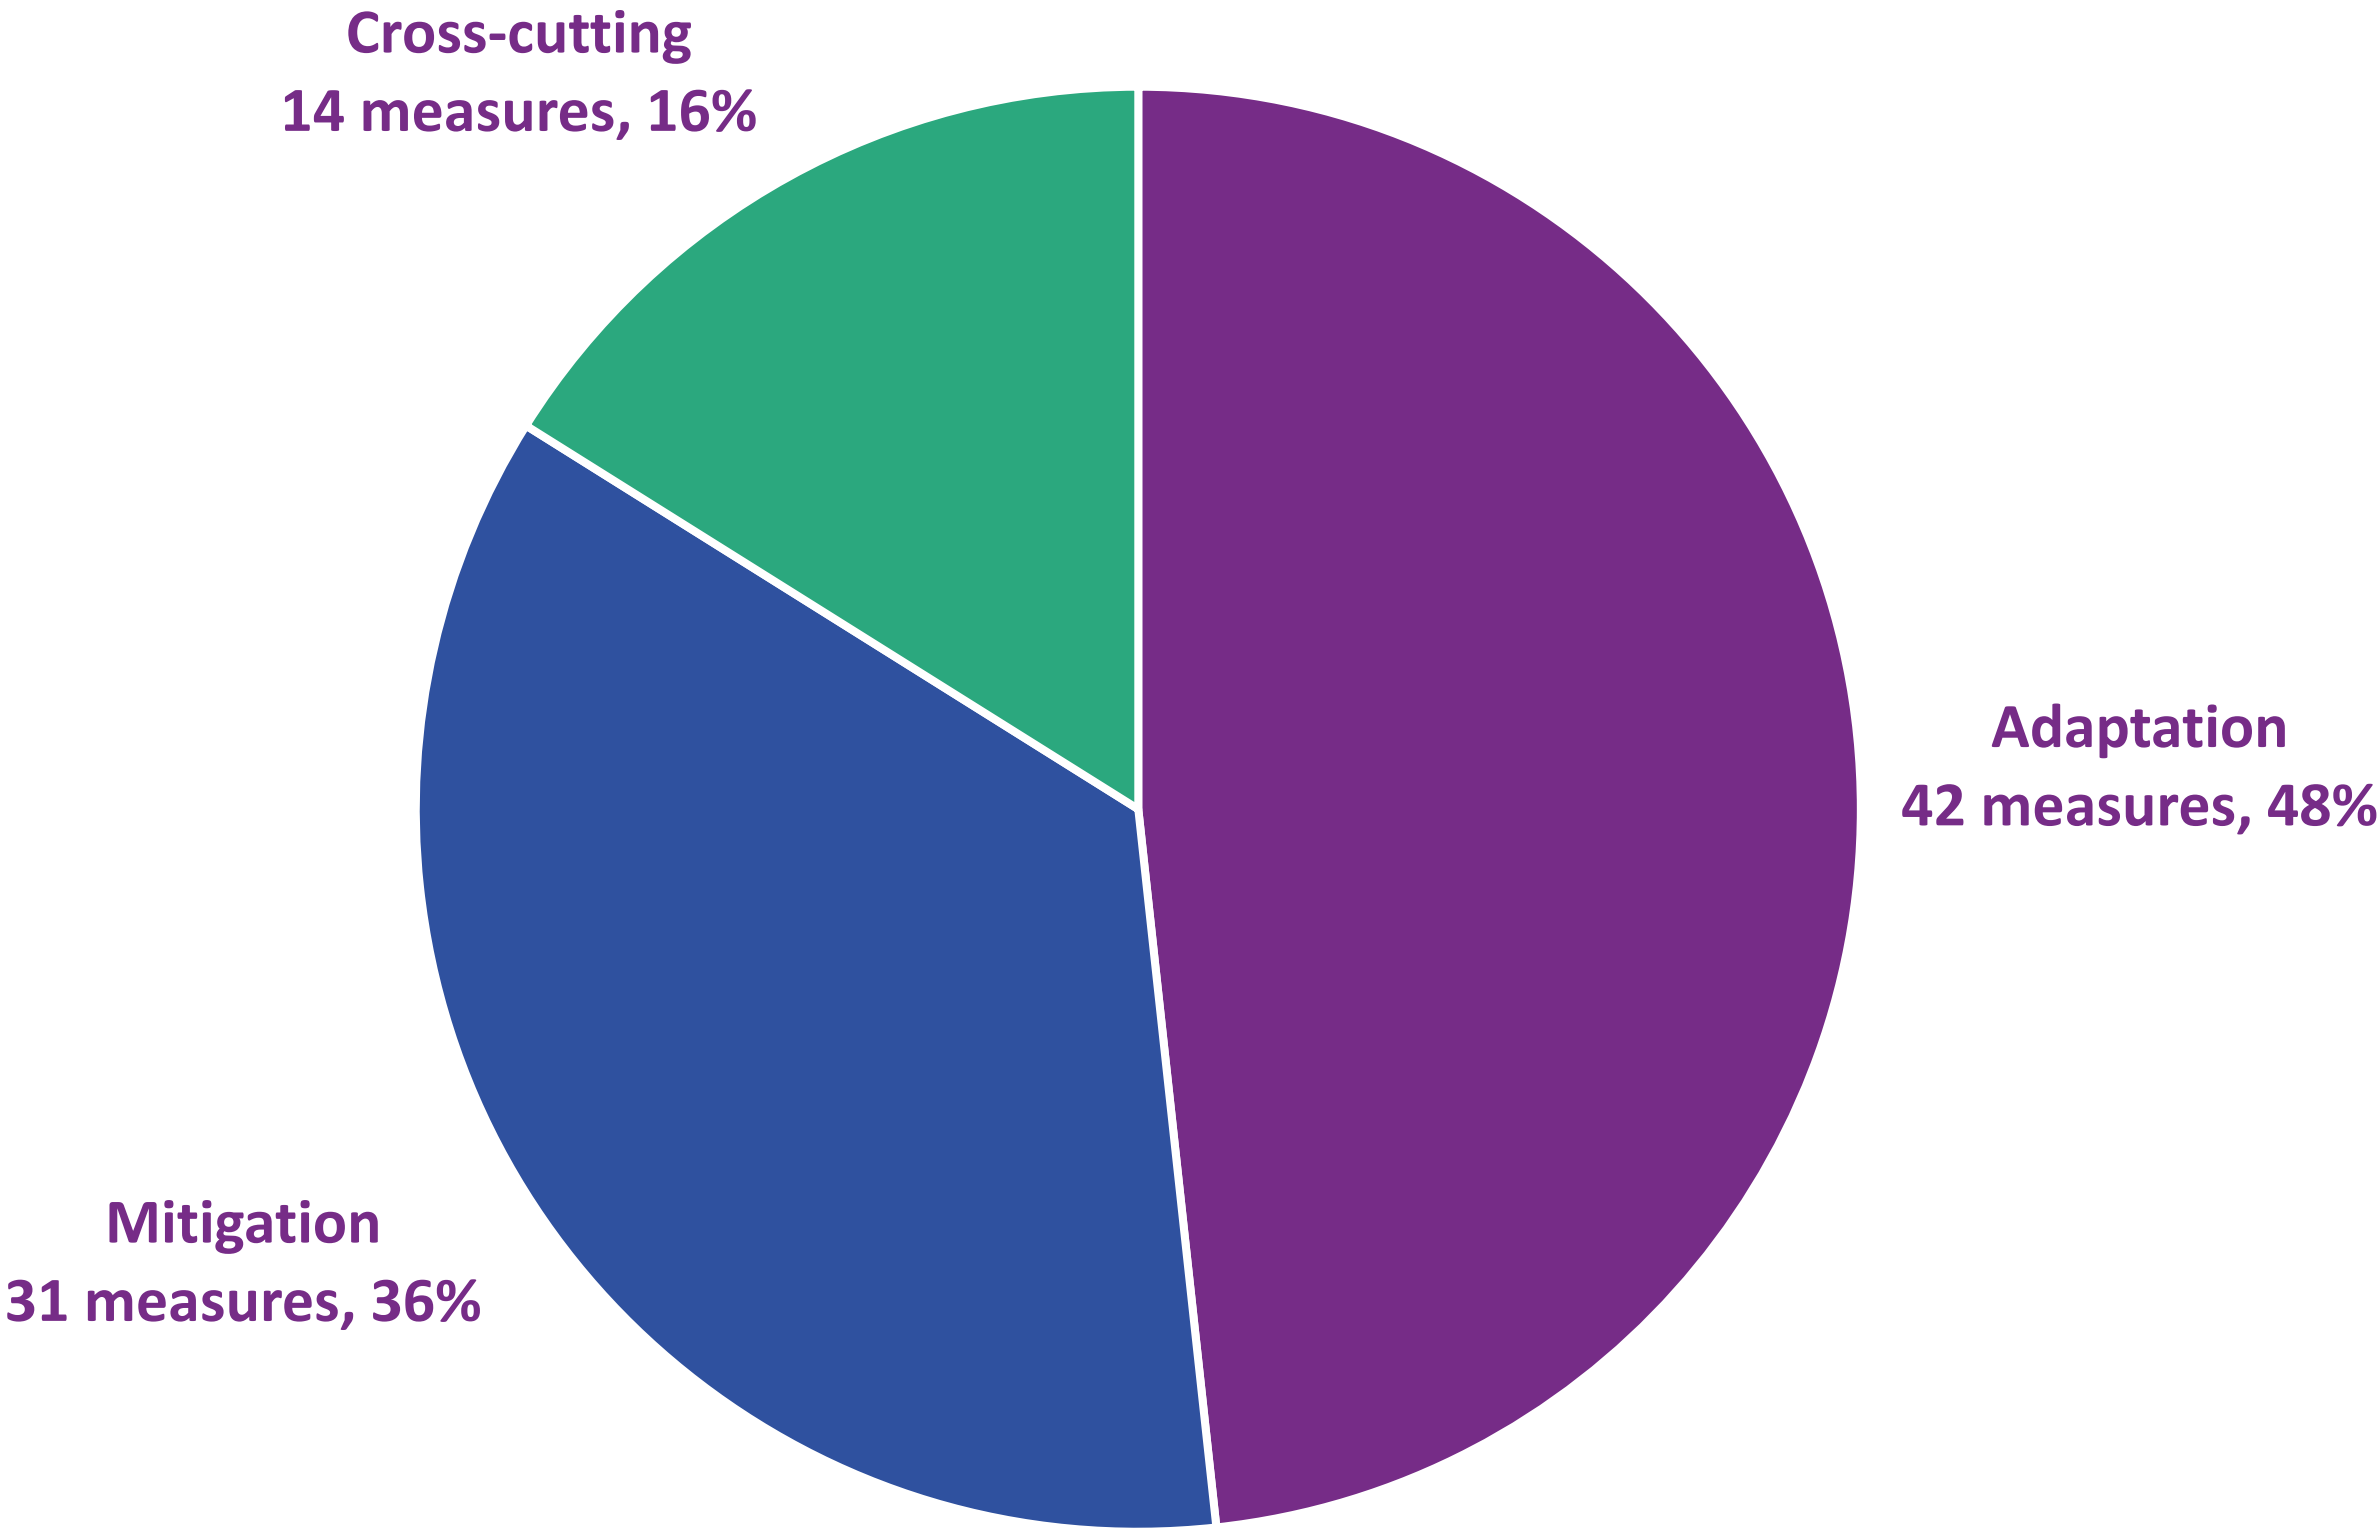

Number of countries that...

- In at least one gender dimension
- Specific to unpaid care

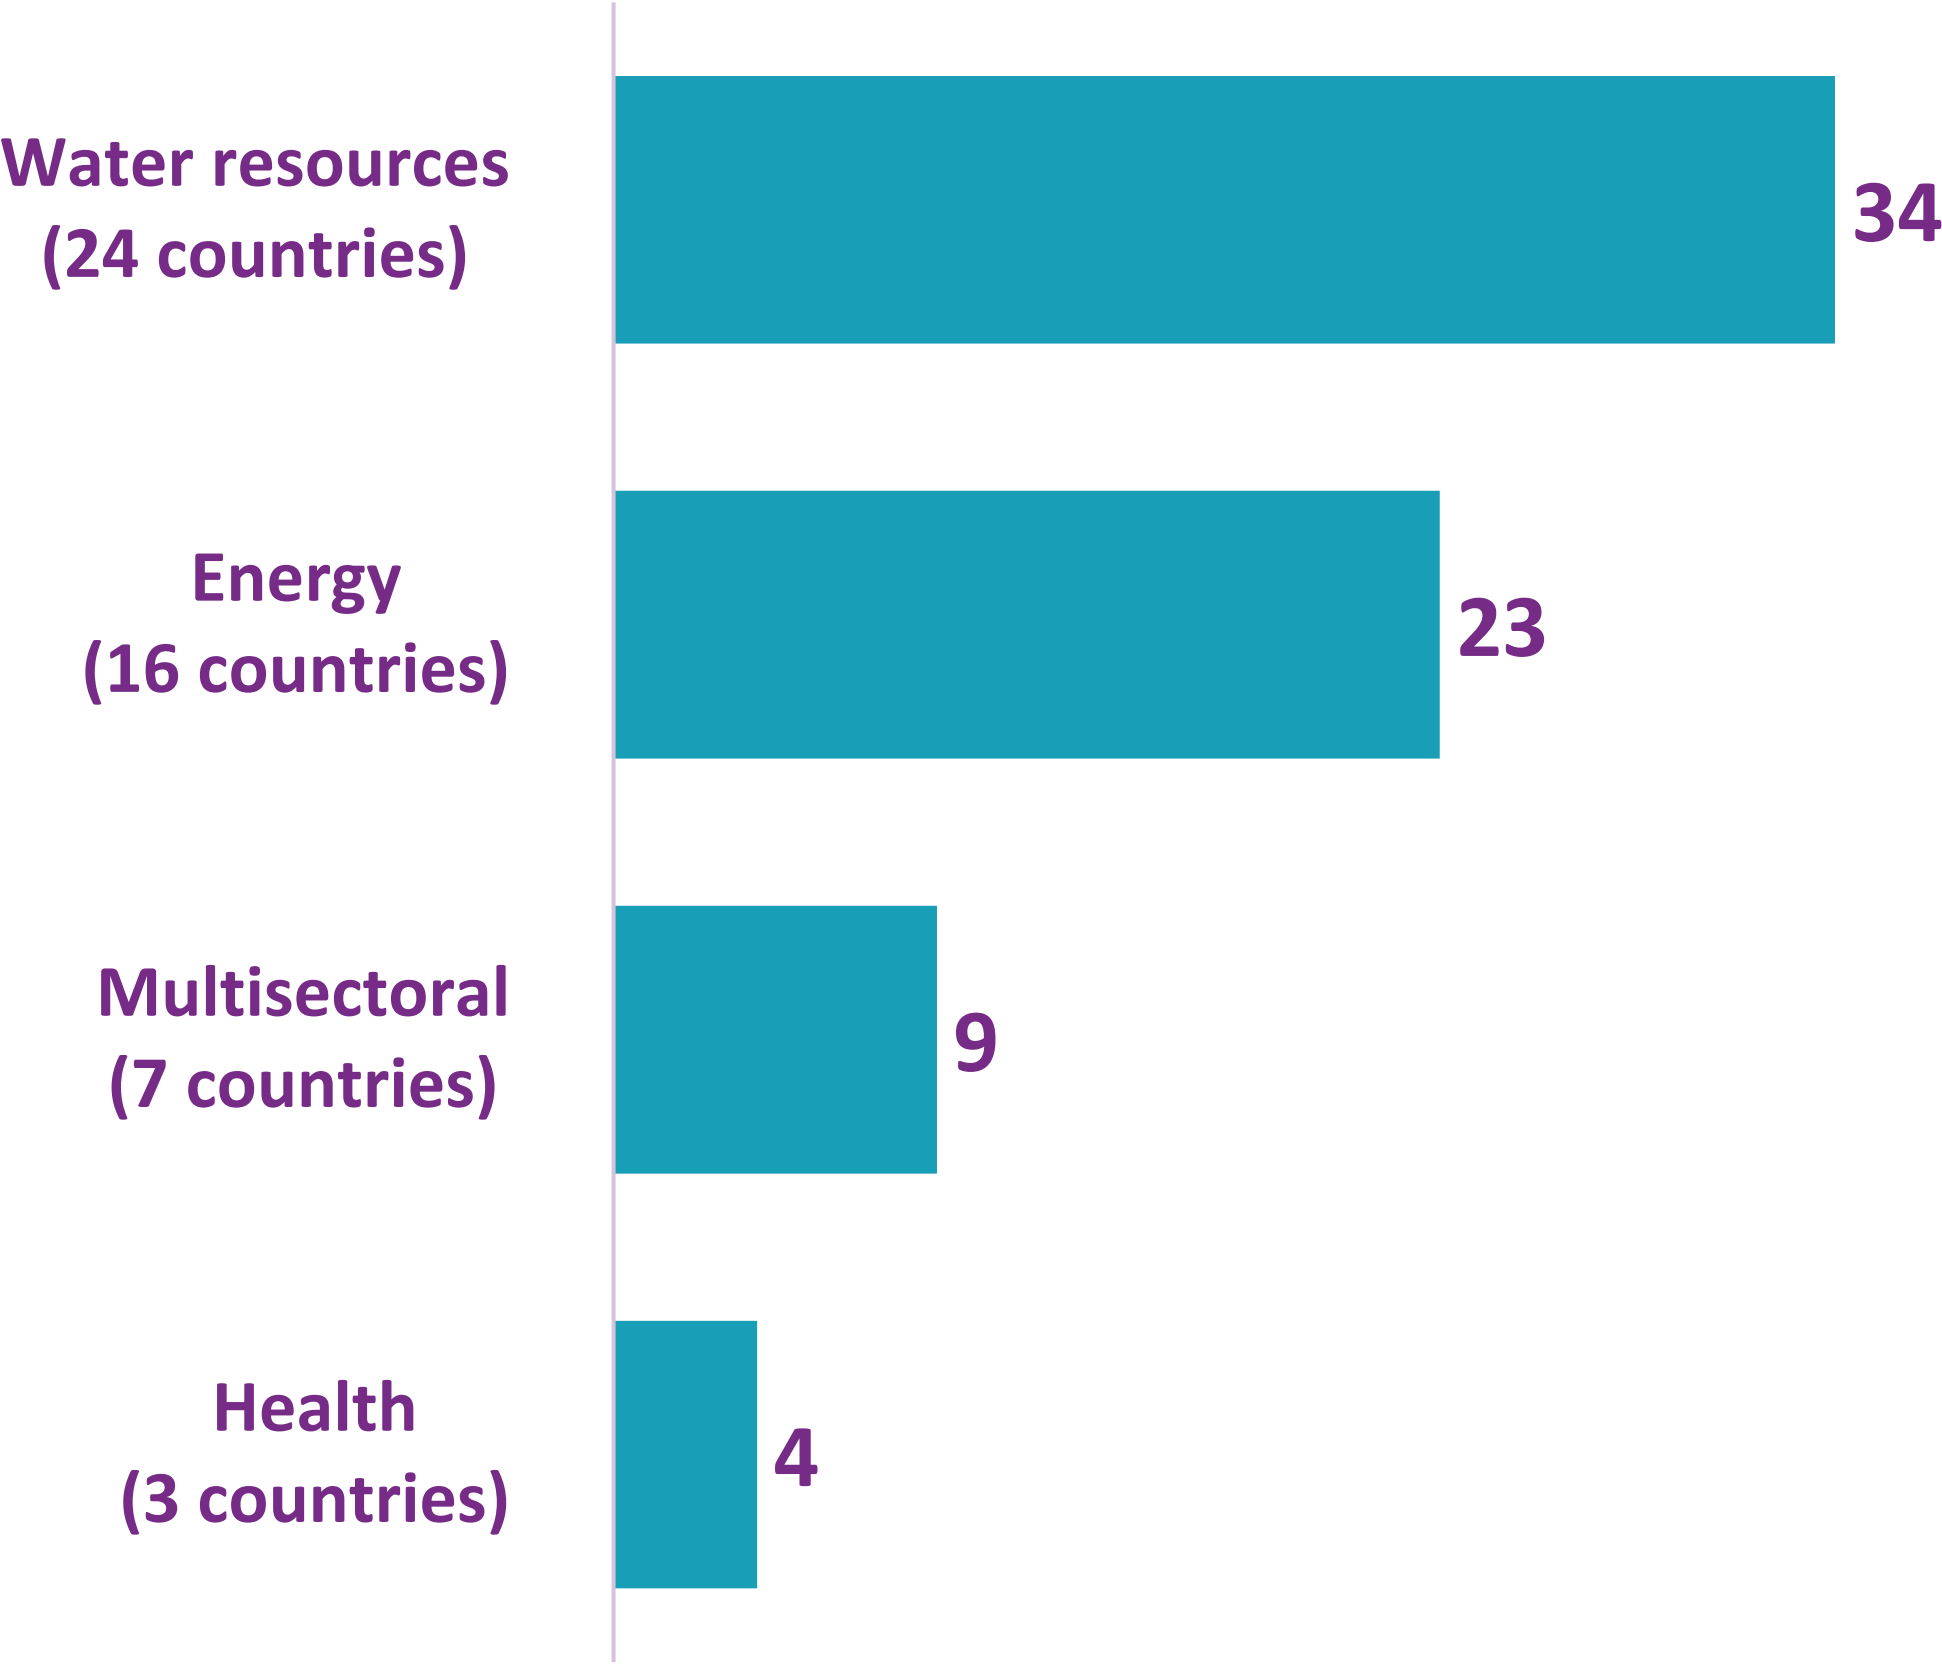

What care-related measures look like

Measures by climate policy area

Measures by sector

From commitment to implementation: Scorecard dashboard tool

Filter by country, gender dimension, climate policy area and sector

Read the NDC excerpt behind each commitment

Download the full dataset

Gender-responsive climate action database

Explore in more detail the gender commitments to action in NDCs 3.0 across countries.

Unpaid care work

Country	NDC excerpt	Gender dimension	Climate policy area	Sector
Eswatini	4.5 Water Sanitation and Hygiene Sector: Water Sanitation and Hygiene Outcome: Enhanced climate resilience and adaptive capacity of all communities and households by ensuring sustainable, equitable, and safely managed WASH services. Target: 100% access to basic water supply by 2035 Actions planned *Finalize and operationalize the National Water Supply, Sanitation and Hygiene Masterplan for the continued... view more	Unpaid care work Health	Adaptation	Water resources
Ethiopia	2.4 Adaptation: 2.4.8. Equity and Social Inclusion Social inclusion and gender equality are not afterthoughts but integral to Ethiopia's adaptation effort. The NDC 3.0 mainstreams gender across all actions and explicitly tracks indicators of women's participation and benefits. The Equity and social inclusion aspects are embedded in the NDC 3.0. Adaptation measures seek to reduce burdens on women, such as through... view more	Unpaid care work Health	Adaptation	Multisectoral

How can the Scorecard be used?

Global accountability

Strengthens monitoring under the **Belém Gender Action Plan**, especially its emerging priorities: **health, unpaid care and gender-based violence**. Feeds into **Biennial Transparency Reports** and the next **Global Stocktake**.

National policy influencing

In **Chile**, the methodology was applied to sectoral policies to **identify gender gaps** and develop **recommendations**.

NDC planning and finance

In **West and Central Africa**, the framework is informing **NDC planning, implementation and financing strategies**.

Thank you!
