

Building a Just Transition in Egypt through Carbon Footprint, MRV, ESG Capacity Building and Green Jobs

1. *Name of proposing Party or organization.*

The Volunteer Team Foundation for Humanitarian Action (VTFHA)

2. *Brief description of the proposed study:*

This case study will examine Egypt's experience in supporting a just transition through workforce capacity building, carbon footprint management, MRV systems, ESG implementation and green skills development. Led by The Volunteer Team Foundation for Humanitarian Action (VTFHA), an accredited UNFCCC observer organization, in collaboration with the Institute of Sustainability and Carbon Footprint (ISCF), the study will document practical approaches that help public institutions, universities and private-sector organizations prepare for the low-carbon transition. The study will analyze how training, certification, technical assistance and stakeholder engagement contribute to creating decent green jobs, strengthening institutional capacities and supporting economic diversification. It will also assess the role of impact assessment tools, greenhouse gas accounting and climate governance in informing policy and investment decisions. Lessons learned, challenges, success factors and recommendations will be presented to support other African countries in designing practical pathways for just transition and sustainable economic transformation.

3. *United Nations region to be covered by the case study:*

Africa;

4. *Country or countries to be covered by the case study*

Egypt

5. *Area of the case study:*

Managing workforce transitions ;Policy planning to implementation pathways ;The design and implementation of economic diversification strategies ;The experience of countries on the use of impact assessment tools ;

6. *Expected duration for completion of the case study (in months):*

6 months

7. *Contribution of the submitting organization*

Technical inputs;Data;Authorship;Technical partnership with the Institute of Sustainability and Carbon Footprint (ISCF), including scientific expertise, capacity building, MRV, carbon footprint and ESG implementation.;

8. *Can the study be developed without financial support from the UNFCCC?*

No

9. *If no, please provide the estimated range of required financial support in USD (Please note that the UNFCCC is not a donor organization and has limited funding):*

25000

10. *Please provide the status of any preliminary work undertaken that could serve as a basis for the study, including a link to any available reports, if available.*

The Volunteer Team Foundation for Humanitarian Action (VTFHA), in technical collaboration with the Institute of Sustainability and Carbon Footprint (ISCF), has implemented climate action, carbon footprint, MRV, ESG and capacity-building initiatives across Egypt and the region. These activities provide a solid foundation for the proposed case study. The study will build on existing technical expertise, stakeholder engagement, training programmes and practical implementation experience in just transition, green jobs and economic diversification.
