Regional Collaboration Centre Bangkok

July 2021

Regional Collaboration Centre – Bangkok Promoting Climate Action in Asia and the Pacific

Thank you for your participation at the Asia Pacific Climate Week!

TheThematic Sessionsof the <u>Asia Pacific Climate Week</u> have come to an end.The fourday eventheld from6to 9 Julyand hosted by the Government of Japan, in collaboration with our core partners and with support from the regional partners,brought together more than3700registered attendees from around the world for over 130 hours of virtual conference streaming.

At the wrap-up session, the core organizing partners leading the discussions on the three main thematic tracks and the COP 26 Presidency presented outcomes of the four days of the Asia Pacific Climate Week 2021 Thematic Sessions:

- The World Bank Group presented the national actions and economy-wide approaches, seeking synergies and shaping national planning for a sustainable, green recovery;
- The United Nations DevelopmentProgrammeprovided an overview of the integrated approaches for climate-resilient development, looking at how both climate risk and climate solutions are reshaping different sectors;
- TheUnitedNationsEnvironmentProgrammeprovided a summary of the discussions on seizing transformation opportunities that explore a reimagined future and the behaviors, technologies and financing needed to get there.
- The COP26 Presidency presented the outcome of the series of events convened on the UK's four goals for COP26–mitigation, adaptation, mobilisingfinance, and collaboration.

A dedicated session at the APCW2021High-LevelEventlater in the yearwill ensure that outcomes from the 2021 Virtual Thematic Sessions are captured and framed within the larger context of COP26.We would like to thank everyone who attendedAPCW2021 and helped make the conference a success. Your participation ensures diverse voices fromAsia Pacificare represented at COP 26, and the action showcased during the Week is inspirational! Please find the Press Release <u>here</u>

People all over the region are applying their ingenuity to climate problems – and coming up with solutions. Want to explore more? Click <u>here</u> and some suggested links on this page.

Building SMEs' Capacity on Climate Action: Experiences from Southeast Asia

On 8 July 2021, a side event was hosted at the APCW by UNFCCC/IGES Regional Collaboration Center (RCC Bangkok) in collaboration with ESCAP, IDRC and UNIDO. The side event highlighted why it is critical for SMEs to both find ways to mitigate emissions, and to be prepared to deal with future climate impacts to increase resilience and competitiveness in the market.

High-Level Champions and the Marrakech Partnership at Asia-Pacific Climate Week

During APCW and as part of their objectives of strengthening collaboration with national governments and broadening participation regionally, the <u>High-Level</u> <u>Champions</u> organized their second "**Implementation Lab**" on <u>accelerating</u>

the establishment of net-zero, resilient cement and steel plants and increasing the resilience of smallholder farmers in the Pacific with smart-agriculture innovations.

The Champions also collaborated with the <u>Technology Executive Committee</u> to host a deep- dive session on <u>unlocking green hydrogen's potential</u>. In addition, they convened various events on <u>Race to Resilience</u> and <u>Race to Zero</u> campaigns during the week to highlight regional perspectives.

You can watch a recording of this session here

UPCOMING EVENT

Mark Your Calendar: The First-ever NDC Partnership Youth Engagement Forum

The first ever <u>NDC Partnership</u> Youth Engagement Forum will bring together a wide array of perspectives on youth engagement within NDC processes and in implementation projects on the ground. It will highlight success stories and lessons learned to strengthen the active participation and support of young people in these critical dialogues across the Partnership. **The event will take place virtually on 26-28 July 2021.**

OPPORTUNITIES TO GET INVOLVED

Discussion: Race to Zero Consultation Process - What is the Future of the Race to Zero

Submit Your Response Here

<u>A year after launching the Race to Zero campaign</u>, we know where we're headed and what it takes to get there. But how to keep members on track to ensure they progress towards implementation and continually raise commitments.

The High-Level Champions have launched a 10-week *public consultation*, from **23 June until 3 September**, **18:00 ICT** in which we encourage you to submit written responses via the provided link. Submissions will be made public and open to discussion.

Come and Engage with the Indigenous Peoples and Local Communities in Building Climate Resilience

Indigenous peoples, local communities, Parties and other relevant contributors to the Local Communities and Indigenous People's <u>Platform (LCIPP)</u> are invited to share your experiences and engage with the work of the LCIPP through the portal's user-friendly ways to engage. The new portal highlights the crucial role of indigenous peoples and local communities in building a climate-resilient world. Please visit <u>here</u> to explore more.

For more information, contact the LCIPP Team at lcipp@unfccc.int

Registration Now Open: Join Leading Innovators in Fighting Climate Change at CLIMATHON 2021

REGISTER HERE

The World Green Economy Organization (WGEO), in collaboration with UAE Ministry of Climate Change and Environment and Ideanco, is hosting the prominent Climate Change Challenge — **CLIMATHON 2021**, which will take place from 2 – 12 October, across nine cities to transform challenges into opportunities by creating the future and accelerating the formation of future jobs.

<u>CLIMATHON 2021</u> works closely with innovators worldwide to find global, impactful solutions for the world's significant challenges around air pollution, mobility, and agribusiness. Such solutions provided by the innovators will be incubated and developed further at the Ideanco Lab to form resilient climate startup(s) and create future jobs in climate change. WGEO will hostCLIMATHON 2021during World Green EconomySummit (WGES) at EXPO 2020 in Dubai, UAE. People worldwide will come together to connect, share ideas, learn, and innovate

The Marrakech Partnership Climate Action Pathways are Updated!

The <u>*Climate Action Pathways*</u> are being updated! The Pathways set out sectoral visions for a 1.5oC, climate-resilient world by 2050 and change levers to transform the economy and society.

The <u>High-Level Champions</u> and the <u>Marrakech Partnership</u> have focused on strengthening cross-cutting aspects (e.g. just transition, gender-responsiveness, and resilience). This month also sees the launch of the **Finance Pathway** for private finance. If you want to track the action, give the <u>Global Climate Action Portal</u> a visit.

Join Us at the Training in Adapting and Building Resilience – CASTT Adaptation Academy!

A new Adaptation Academy to support developing countries in adapting and building resilience to the impacts of climate change has been launched at APCW 2021 - The <u>CASTT Adaptation Academy</u>.

The Adaptation Academyis geared toward experts in developing countries who are preparing their climate vulnerability and adaptation assessments as part of their reporting for the Enhanced Transparency Framework (<u>*ETF*</u>) under the <u>*Paris Agreement*</u>.

The training programme for the Asia and the Pacific region will be held online from 11 to 15 October 2021. Read more <u>here</u>

Recommended Reading: Discussion Paper on Three Common Challenges in National Reporting in Developing Countries under the Paris Agreement

Solutions for three common challenges in national reporting in developing countries under the Paris Agreement

> Tempden Marun¹⁷, Chia Umenya¹, Takahi Mennolo¹, Tambiko Hattar¹ 'Dimbi edi Dingy Ane, KES 'Wadati UR Reserv and Canadong Ca, Int. 'Dimbi edi Dingy Ca, Int.

Highlights

Transitioning to the Enhanced Transparency Frankwork (ETE) under the Paris Agreement (PAL requires developing countries to inhere their nutriceal inporting systems to be more performance of the performance of the performance of the performance executive when perparing their nutriceal reporting. These challenges are: 10 and are released reported to an accurate more than an accurate more and reports and reported to an accurate participation of the performance and reports and 3 additional in confirming data and released to remove these Astes. (MA)

For each challenge, we developed a list of potential solutions in the short and long term hand on a questionnaire survey. Toleware the next, we the Asian Transparency Workshop, further feedback was received on which practical solutions participants result prefer in considerations of their majocitive committeens. Earnal on their preference, we identified econometade solutions as good practices in the short and long term such as developing a unitarial legit freework, subjerger a mean constraining institutions, appointing a facult protein establishing university canculation contranguement, appointing a facult protein and developing measurement, reporting and verification (MEN quedience for MAL).

We then identified three factors underplansing countries' performance for subulators EMGsecol Accountability and Statubatiding. Countries expressed a preference for colorisons that can utilize extrang initiations (Mitchieng), invesses responsibilities of interver statubations while transports barneoids (accountability), and enhances long-term device), capacity countability. We consider these underlying factors to be important to telecomp paratical additions to additions. These common full-lenges as well as full-lings as a statubating input the additions to additions these common full-lenges as well as full-lings as a statubating provide statubation to additional periodicy and the statubation provides registering status. The addition periodicy status statesythening their radical reporting systems to successfully implement the EIP.

The Institute of Global Environmental Strategies (*IGES*) has published a new paper titled: "Solutions for three common challenges in national reporting in developing countries under the Paris Agreement". The objective of this paper is to provide good practices as recommended solutions to address the common challenges that developing countries often encounter when preparing national reporting (e.g., BURs, NCs). Countries aiming to build and strengthen their national reporting systems to transition to the enhanced transparency framework (ETF) can learn from these existing proven practices.
