

# CAPACITY-BUILDING KNOWLEDGE TO ACTION DAYS 2019-2020

Regional workshops for enhancing the capacity of researchers, policymakers, and civil society to talk to one another and strengthen the climate science-policy-action interface

United Nations Climate Change  
Paris Committee on Capacity-building

Poster session co-hosts

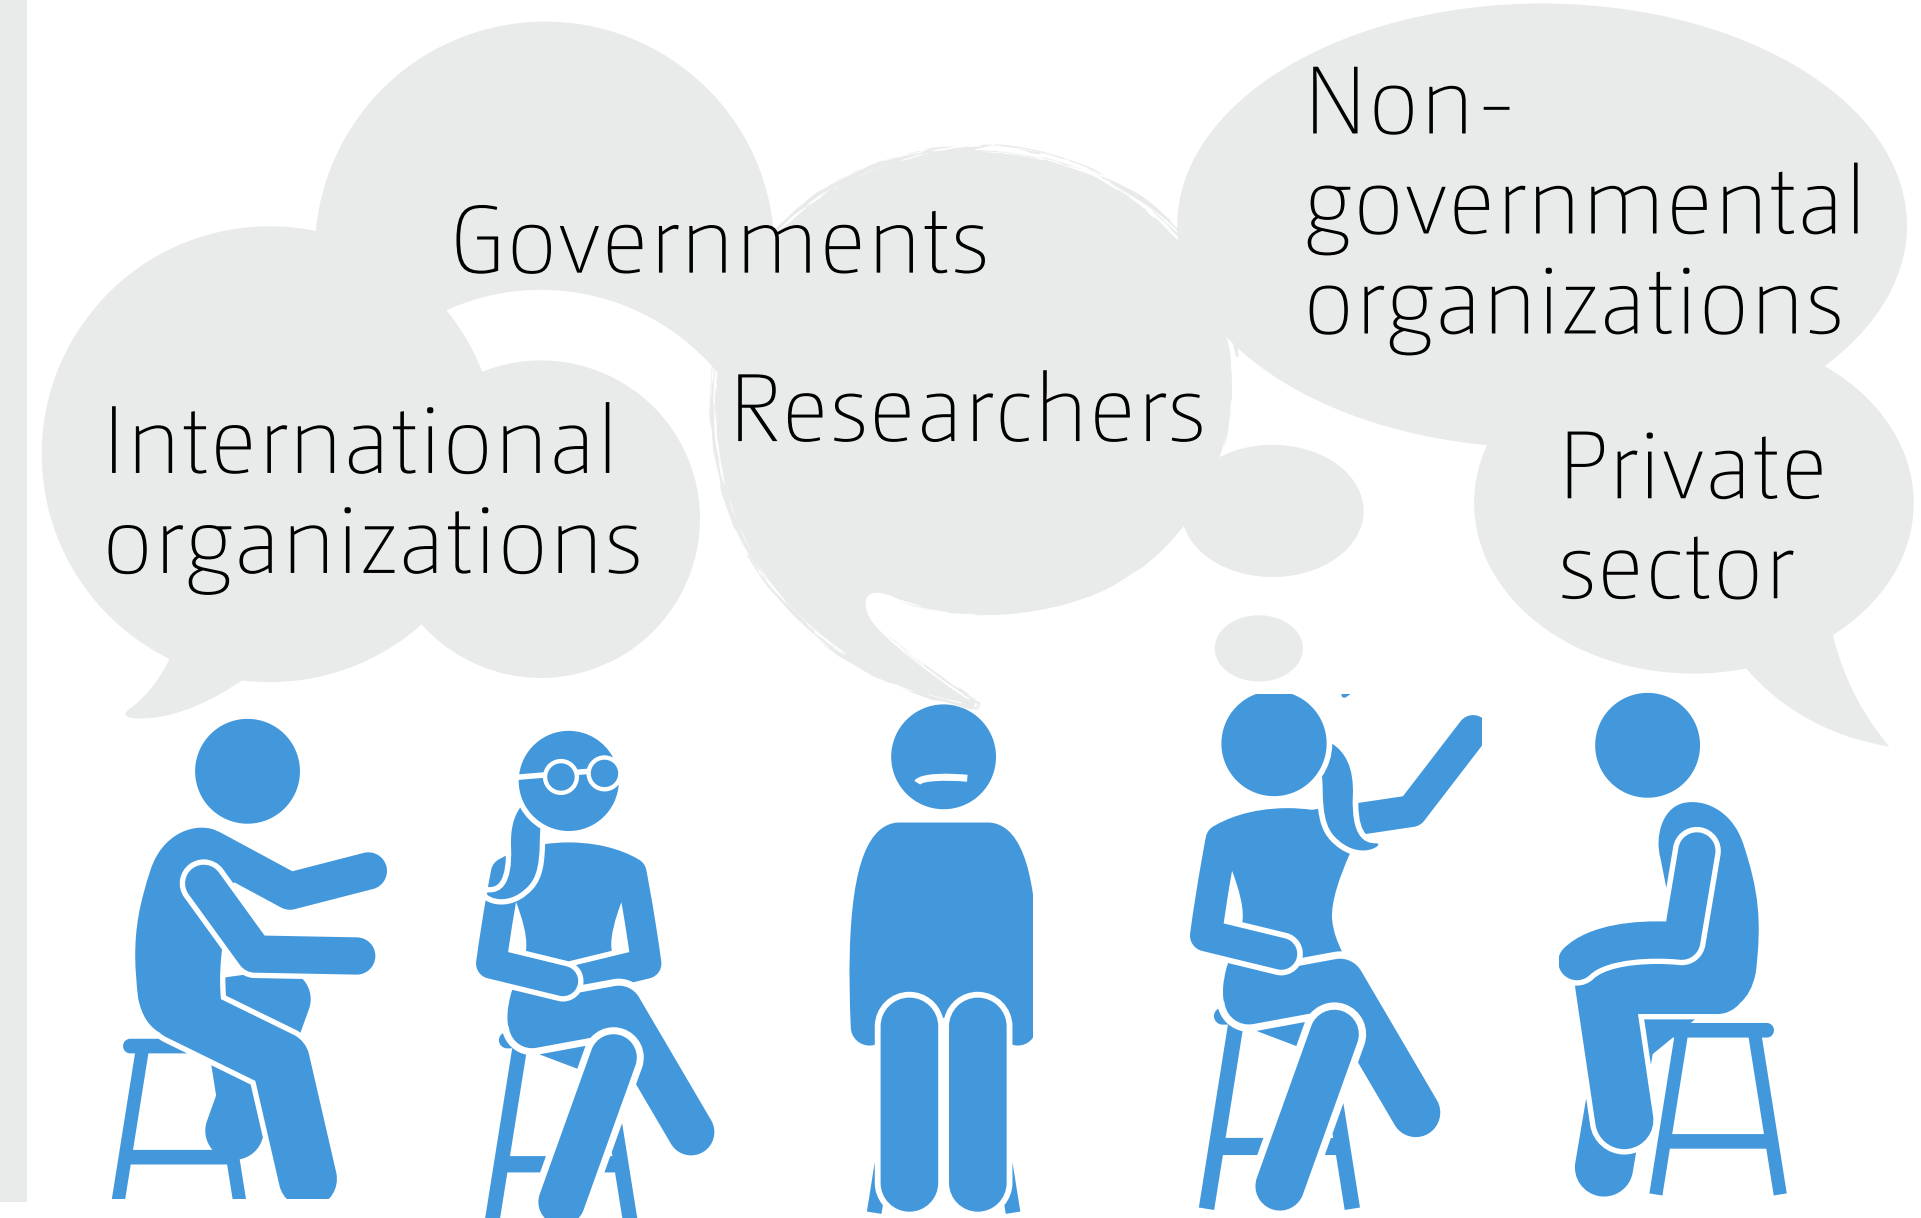

## CONTEXT

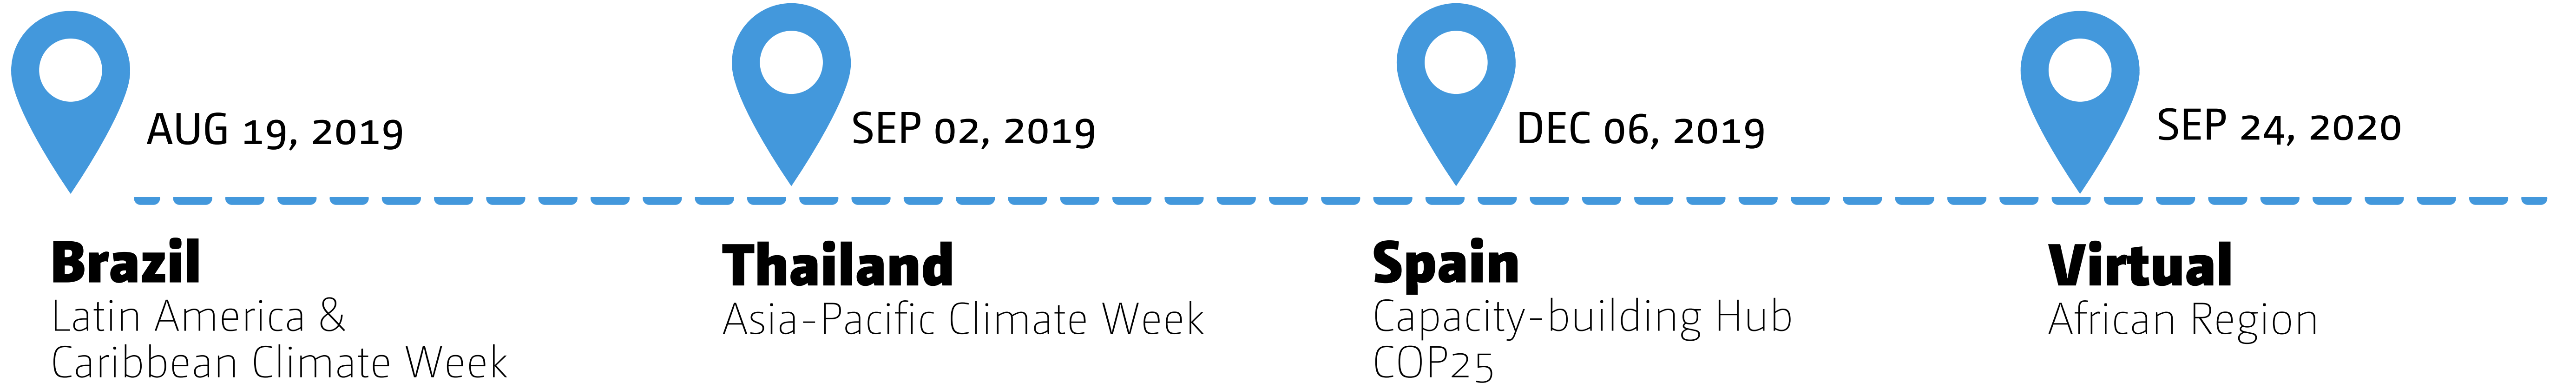

In pursuit of its [mission](#), the Paris Committee on Capacity-building (PCCB), together with a range of committed partners, co-designed this event series to shape cross-cutting dialogues and accelerate collaborative action at the national and regional levels.

The events enabled the exchange of national, regional, and international knowledge and experiences in identifying capacity gaps and needs for the design and implementation of National Adaptation Plans (NAPs) and Nationally Determined Contributions (NDCs), and explored how researchers, decision makers and civil society can work closer together, so that the real-world impact of research increases.

## STAKEHOLDERS

## TIMELINE

### Brazil

Latin America & Caribbean Climate Week

### Thailand

Asia-Pacific Climate Week

### Spain

Capacity-building Hub COP25

### Virtual

African Region

**3** Regional workshops

**150** Participants

**13** Discussion groups

**1** Thematic day at COP25

**10** Partners

## KEY FEATURES

### Diversity

Partnerships across regions, sectors & institutions

### Efficiency

Focused working groups

### Continuity

A process approach

### Active Learning

Iteration & feedback loops

### Dissemination

Transfer of lessons learned & knowledge-sharing

### Balance

Gender, geographical, & institutional balance

## KEY FINDINGS

Important capacity needs for universities, research institutions, governments, and civil society were identified at these Knowledge to Action Days:

Targeted communication of scientific findings to ensure effective contribution of universities to greater climate actions

Knowledge that has been deprioritized must gain prominence

Universities must be resilient institutions that actively engage in the socio-political context

The need for effective knowledge management & networking

The importance of funding, transdisciplinary & collective efforts

## FIND OUT MORE
