

RACE TO ZERO

Dialogues

WHAT ARE THE RACE TO ZERO DIALOGUES?

The Race to Zero has set the overarching objective of mobilizing all actors towards net **zero emissions by 2050** at the latest. The **Climate Action Pathways** define the sector-specific plans that will unlock the systems transformations required to achieve this zero carbon future.

The Dialogues will showcase support for the main actions required to start on our transformation pathways. These ten pathways should be seen as the **'lanes' of the racetrack** in the Race to Zero: the fast tracks to the future. Each sector needs to run in its own lane – with its own opportunities and challenges – so that, **together, we can reach the finish line.**

WHAT IS THE RACE TO ZERO?

A **global campaign** to rally **leadership and support** from businesses, cities, regions, investors for a **healthy, resilient, zero carbon recovery** that prevents future threats, creates decent jobs, and unlocks inclusive, sustainable growth.

All members are committed to the same overarching goal: **achieving net zero emissions by 2050** at the very latest.

Nigel Topping

Gonzalo Muñoz

Led by the High-Level Climate Champions for Climate Action **Nigel Topping (COP26)** and **Gonzalo Muñoz (COP25)**, Race To Zero rallies actors outside of national governments to join the **Climate Ambition Alliance**, which was launched at the UNSG's Climate Action Summit 2019 by the President of Chile, Sebastián Piñera.

The objective is to **build momentum** around the shift to a decarbonized economy ahead of COP26, where governments must strengthen their contributions to the Paris Agreement. This will send governments a **resounding signal** that business, cities, regions and investors are **united** in meeting the Paris goals and creating a more **inclusive and resilient economy**.
