NEW READINESS PROGRAMME

Key principles & changes

Key principles

- **Country-centered** approach to readiness → moving away from the DP-centric approach
- **Systems thinking** and **programming** approach → moving away from 'grant-by-grant', incremental approach
- **Effectiveness** (delivery), **simplicity** and **speed** (processing)

Major changes

Focus of readiness on **GCF pipeline origination** and **country ownership**

Strategic, medium-term planning of readiness support, over 4 years

Streamlined objectives & modalities for **simplification** of processes, **increased speed**, **ease** of access & **predictable** resources

COUNTRY-LED Programming

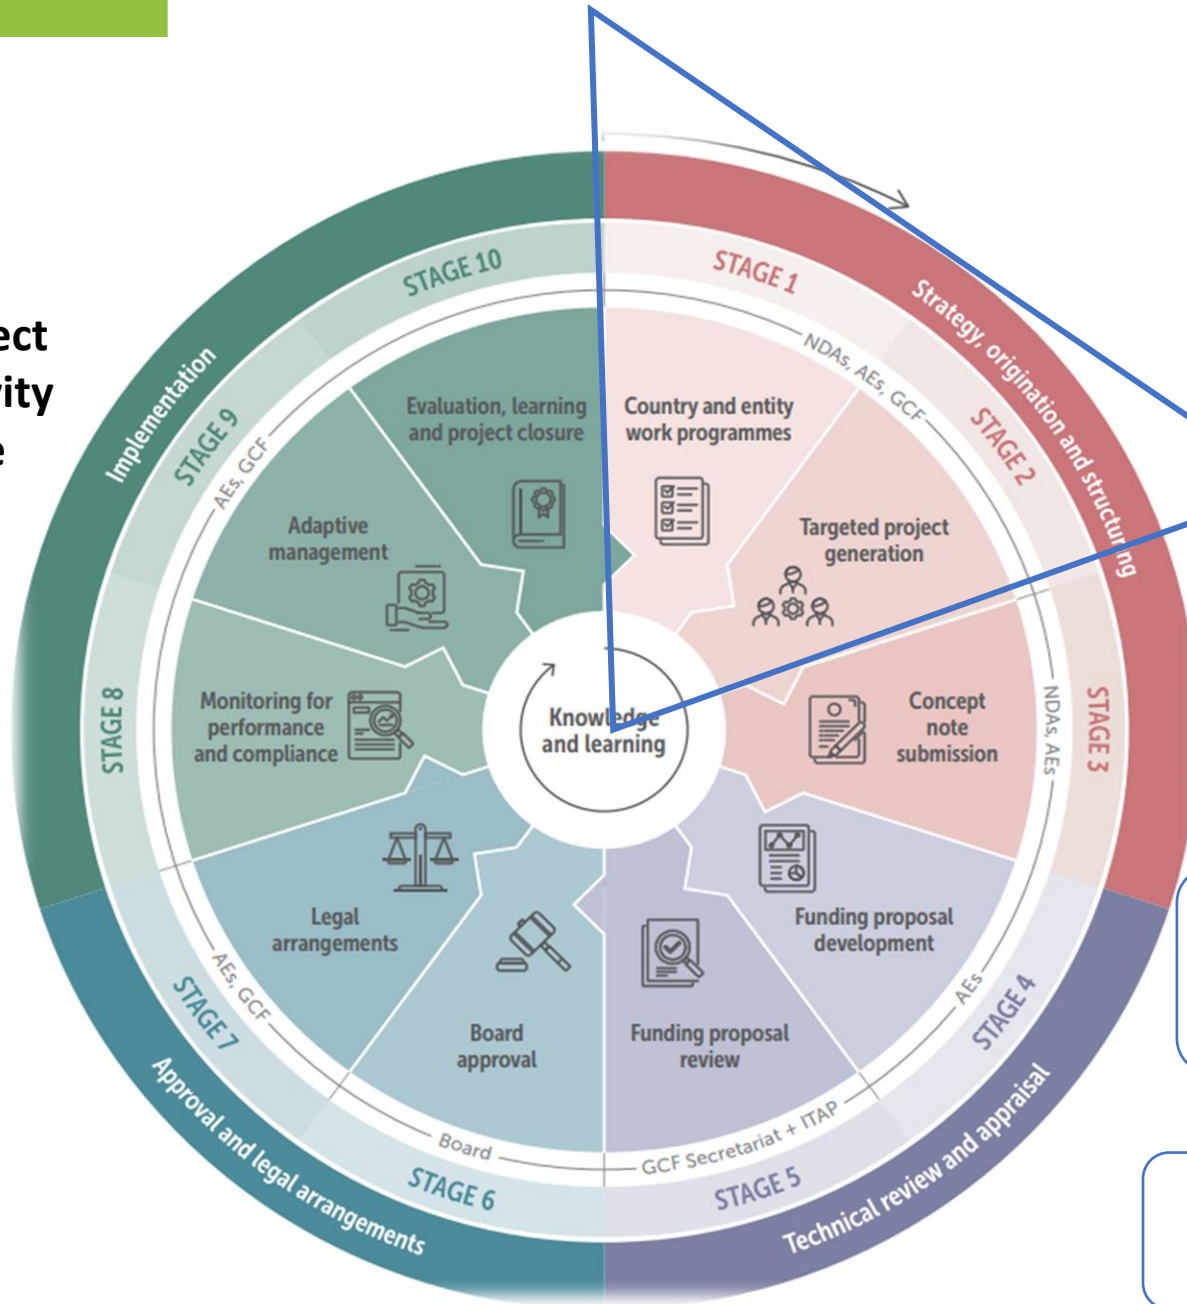

Integrated Readiness PROGRAMME(S)*

Competitive SELECTION of the **most suitable technical & financial offers**

country-centric approach

GCF
Project
activity
cycle

Readiness → Programming

Country programming and pipeline development is one process

Readiness is **deployed more intentionally** to support origination of GCF pipeline based on the Country Programme as the single origination point for GCF investments

Phasing out entity work programmes. Entity programming must originate from the Country Programme document
