<u>Report-back: Group #1 – Provision of financial and technical support</u>

Best practices and lessons learnt

- •Fundamental shift in policy and planning at national and subnational level
- •Transparency creates certainty

Challenges and gaps

- •Quantifying adaptation costs in both data and methodologies
- •Marrying bottom up approaches to promote ownership, political will with top-down approach needed for integration of the science

Actions/collaborations required to replicate the best practices and overcome the challenges

- •Holistic view, with ministries of finance and planning. Bottom up process helps ambition
- •Understanding what is going on by non-state actors to align incentives for them.
- •Vulnerability assessments scaled up for accessing adaptation finance

Possible actions for consideration by the COP

• Different elements to goals - focus on impact, adaptation goal, disinvestment goal
