

# SUMMARY OF DISCUSSIONS

---

## SESSION III (BREAKOUT GROUP 2) **TECHNOLOGY AND CAPACITY- BUILDING NEEDS**

# SUMMARY OF DISCUSSIONS: TECHNOLOGY AND CAPACITY-BUILDING NEEDS

---

- There is a disconnect between the UNFCCC and the situation on the ground.
- Some of the needs of stakeholders particularly of those from vulnerable and/or minority groups are not taken into account.
- Capacity building assessment should focus at the country level and this should steer international considerations.
- The methodology should not be done in silos: capacity building and technology development and transfer should be integrated with adaptation and mitigation considerations.

# SUMMARY OF DISCUSSIONS: TECHNOLOGY AND CAPACITY-BUILDING NEEDS

---

- TNA needs to be approached in an integrated matter and must be in line with the Conventions and International Agreements i.e. Paris Agreement.
- South-South corporation or peer-to-peer learning experience
- Mapping of the actors and resources for climate funding mechanisms
