

WEBINAR: Tracking NDC Progress under the
BTR in the Caribbean - Leveraging NDC Registry
and Tracking Platforms, 9 April 2026

Reporting on progress made in implementing and achieving NDCs

Tugba Icmeli, Transparency Division, UNFCCC
CGEsupport@unfccc.int; ETFsupport@unfccc.int

United Nations
Climate Change Secretariat

Paris Agreement Goals

Mitigation

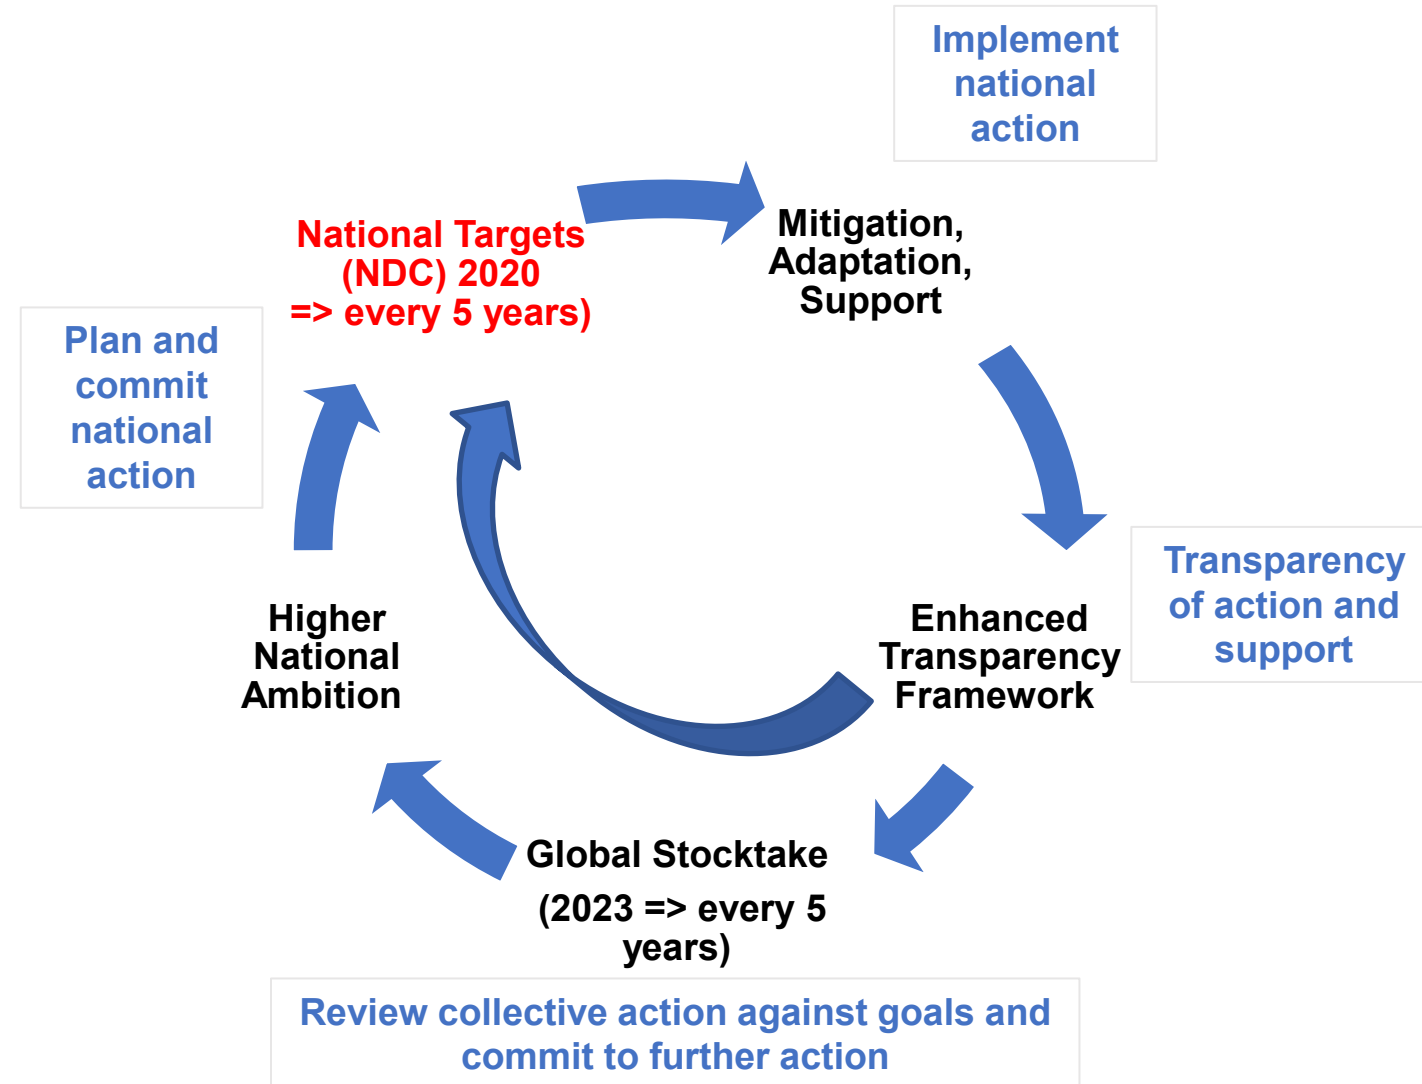

keep temperature increase to well below 2 °C and 1.5 °C

Adaptation

increase the ability to adapt and foster resilience

Finance flows consistent with path to low GHG emissions and resilient development

Ambition Cycle

Preparation and communication

Decision 4/CMA.1, Annex 1

Information to facilitate clarity, transparency and understanding

NDC

- I. Quantifiable information on reference point
- II. Time frames/periods for implementation
- III. Scope and coverage
- IV. Planning processes
- V. Assumptions, methodologies
- VI. Fair & ambitious
- VII. *Contribution towards Convention and Paris Agreement goals*

Tracking and accounting

Decision 4/CMA.1, Annex 2

Accounting guidance

NDC

- I. Accounting methodologies and metrics
- II. Ensuring methodological consistency
- III. Scope and coverage
- IV. Completeness (including all categories of emissions and removals)
- V. Explanation on exclusion of categories

Reporting on progress

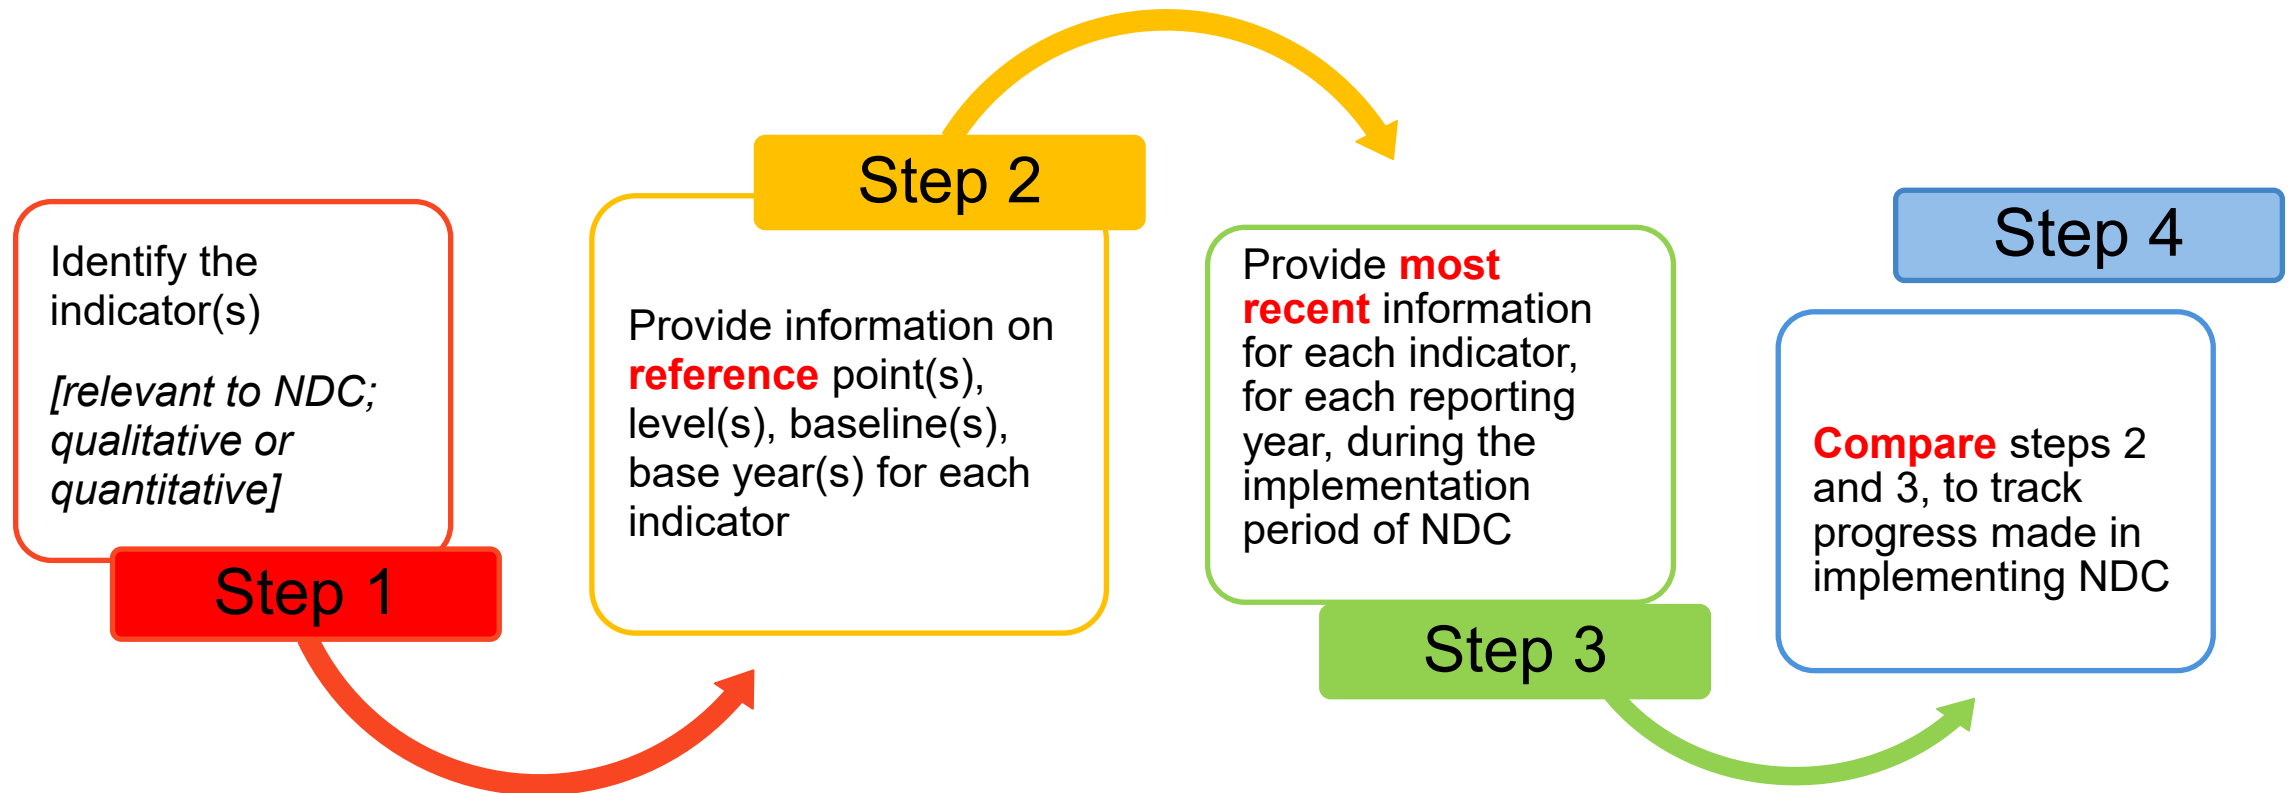

Decision 18/CMA.1 & Annex Decision 5/CMA.3 & Annexes

MPGs

Respective BTR chapter (+CTFs)

- A. National circumstances and institutional arrangements
- B. Description of NDC
- C. Information necessary to track progress made in implementing and achieving NDC
- D. Mitigation PAMs, including co-benefits
- E. Summary of GHG emissions and removals
- F. Projections of GHG emissions and removals
- G. Other information

Overview of steps for Parties to track progress of NDCs by indicators:

- *For the first BTR that contains information on the end year of NDC, provide assessment of whether target is achieved.*

| Type of NDC goal | Relevant indicators (and units) |
|---|---|
| Emission reduction or limitation target relative to a base year | <p>GHG emissions</p> <ul style="list-style-type: none"> As reported in the national GHG inventory adapted to the specific scope of the target (e.g., gases and sectors covered) (kt CO₂ eq0) If applicable, including use of market-based mechanisms (ITMOs) |
| Emission reduction target below a projected BAU level | <p>Relationship (e.g., difference in %) between</p> <ul style="list-style-type: none"> GHG emissions in the BAU target year (%) Sector specific GHG emissions (e.g., gases and sectors covered), including use of market-based mechanisms (%) |
| Peaking Target | <p>GHG emissions in all years leading to the current year</p> <ul style="list-style-type: none"> As reported in the national GHG inventory adapted to the specific scope of the target (e.g., gases and sectors covered) (kt CO₂ eq) If applicable, including use of market-based mechanisms (ITMOs) |
| Renewable Energy | <ul style="list-style-type: none"> Percent of electricity generated by source (%) Total generation by source (Gwh) Installed capacity by source (MW) |
| Energy Efficiency | <ul style="list-style-type: none"> Total energy demand or consumption (GWh) Energy intensity of the economy (TJ/unit of GDP) |
| Forest cover | <ul style="list-style-type: none"> Share of land covered by forest (%) Area covered by forest (ha) / Area restored or reforested (ha) Forest stock (m3) CO₂ sequestered per year (t.CO2.eq) |

- Parties with both unconditional and conditional targets in their NDC may revise the relevant tables to describe conditional targets.
- Information needs to match with **NDC/ICTU**, ensure consistency or explain changes/updates.
- Each Party **with an NDC that consists mitigation co-benefits** from adaptation actions and economic diversification plans, **shall** provide information on domestic policies and measures implemented to address social and economic consequences of response measures.
- Some of the **information areas may not be relevant to your NDC** or sometimes there are additional matters to consider. i.e. coverage of GHGs and sectors in your NDC, use or not use of ITMOs, etc.
- Where a flexibility is applied, information on capacity constraints and self-determined improvements need to be elaborated in the BTR.

Reporting

Biennial Transparency Report

- I. GHG inventory (*all shall + FX*)+CRTs
- II. **Progress in NDCs (*all shall + FX*)+CTFs**
- III. Adaptation (*all should*)
- IV. Support provided & mobilized (*developed shall*)+CTFs
- V. Support needed & received (*developing should*)+CTFs

Review

Technical Expert Review

- I. Consistency of information reported
- II. **Consideration of progress with and achievement of NDC**
- III. Support provided (*developed shall, and other Parties at their discretion*)
- IV. Climate change impacts and adaptation (**VOLUNTARY**)
- V. Identification of improvements
- VI. Identification of capacity building needs

Consideration

Facilitative, multilateral consideration of progress

- **Scope: To consider Party's efforts under "Article 9" and "implementation and achievement of its NDC"**
- Online Q&A
- In session presentation and Q&A (*all shall*)

- ✓ Modalities, procedures and guidelines (MPGs) for the ETF; [decision 18/CMA.1 and its annex](#)
- ✓ Common reporting tables and common tabular formats for reporting information under ETF; [decision 5/CMA.3, annexes I-III](#)
- ✓ Reviews on a voluntary basis of the adaptation information; [decision 9/CMA.4](#)

Thank you.
Questions, reflections?
