Subject: Input to SB003 annotated agenda and related annexes.

I have found in the Annotated agenda:

“6 Action: The Supervisory Body may wish to consider the allocation of funds for the year 2023 Article 6.4 Resource Allocation Plan.”

HOWEVER, the COP is continued as usual as platform of dialogues and discussions. What were the actions that brought to curb climate change so far? Resources were/are pledged at every COP, but little was released and implemented. Climate change is accelerating much more than our acceleration of action to meet the Paris Agreement. With this lagging speed to act, can the world achieve carbon neutrality by 2030? I have fears towards this end!! Have your say on this issues during your discussions please.
