

## **List of activities from the Co-Chairs proposal to develop 6-year workplan of the forum and its KCI**

1. Preparation of KCI annual reports
2. Mid-term review of the workplan fifty-sixth sessions of the subsidiary bodies (June 2022)
3. Review functions, work programme and modalities of the forum at fifty-ninth session of SB (November 2023)
4. Prepare for the technical assessment, synthesis report on the information for global stocktake (scheduled for 2023)
5. Development of strategy for communication and outreach
6. Sector-specific case studies on the impacts of implementation of response measures on economic diversification and transformation and just transition, including experiences and challenges on assessments and analysis with a view to promoting economic diversification and transformation, improve resilience and increase private sector investment flow. (Sectors identified by Parties tourism, agriculture, energy, waste, forestry, transport, maritime, health)
7. Exchange of experience, best practices and lessons learnt on assessing the impacts of the implementation of response measures in supporting economic diversification and transformation including on capacity building from relevant international organizations, academia, civil society, governments, private sector.
8. Understanding economic diversification and transformation as it relates to: (a) financing and technical needs; (b) the role of technology and innovation; (c) increasing private sector investment flows; (d) trends and mitigation of stranded assets; and (e) divestment policies
9. Understanding how governments and subnational players can assess the economic impacts of potential new industries and businesses resulting from the implementation of Paris Agreement.
10. Improving Parties' knowledge and developing a process for understanding relevant policy issues of concern to Parties in facilitating economic diversification and transformation
11. Identifying and analysing response measures targeting production and consumption and quantifying their impacts, especially on Parties' prospects of achieving economic transformation, inclusive growth and poverty reduction.
12. Preparing guidelines for economic diversification and transformation, including means to mobilize support (inter alia, finance, technology and capacity building), to address relevant policy issues of concern to Parties and barriers to economic diversification and transformation.

13. Exchange of experiences, best practices and strategies on just transition focusing on challenges and opportunities to facilitate the creation of decent work and quality jobs from the implementation of low greenhouse gas emission policies and strategies in the context of sustainable development, from relevant international organizations, academia, civil society, governments and the private sector.
14. Exploring ways and means on how just transition and economic diversification and transformation can inform the preparation and implementation of nationally determined contributions.
15. Prepare guidelines to assist Parties in developing a framework on just transition of workforce and the creation of decent work and quality jobs in specific sectors, including the mobilization of finance to support the transition, foster policy coherence, training and retraining systems for workers affected by the impact of the implementation of response measures.
16. Sharing and understanding of successes and challenges of establishing mutually beneficial partnerships on creation of decent work and quality jobs in domestic development and use of renewable energy technologies towards creating inclusive growth of green value chains across countries.
17. Regional and/or country case studies on just transition of work force and creation of decent work and quality jobs focusing on gender-responsiveness, approaches to embed just transition and job creation in low carbon, climate-resilient development planning with a view to minimize the negative impacts and maximize the positive impacts.
18. Understanding and measuring the impacts of transitioning strategies, including support needs, on employment and the creation of decent work and quality jobs.
19. Experiences and best practices on the role of financial and fiscal instruments in managing energy system transformation from fossil fuel to green energy.
20. Exchanging lessons learnt, best practices on analysis and assessment of positive and negative impacts of the implementation of response measures by businesses, countries and regions.
21. Identify and assess the impacts of the implementation of response measures on gender, local communities and indigenous people, co-benefits, economic transformation initiatives, and youth and vulnerable groups.
22. Assessing and analyzing the strengths and weaknesses of the existing reporting structures and cooperation among Parties on the impacts of the implementation of response measures, including exchanging experiences and best practices.
23. Develop guidance for assessing the environmental, social and economic impacts of mitigation policies and actions, including the use of existing tools and methodologies.

24. Modelling and assessing the impacts of the implementation of response measures focusing on (a) methods, assessment and examples of modelling tools and (b) data requirement and challenges.
25. Developing new partnerships and enhancing existing cooperation, with academia, intergovernmental organizations, private sector, civil society in the development and use of modelling tools.
26. Facilitate (a) the exchange of information and guidelines developed by relevant organizations and (b) capacity building workshops and regional training programmes by relevant partners, on tools and methodologies for assessing the impacts of the implementation of response measures.
