Subject: SBM016 annotated agenda and related annexes

Dear Secretariat,

On behalf of SustainCERT, please find below our input on the agenda of the 16th meeting of the SB.

SustainCERT is commending and supporting the work of the Secretariat, the SB and all Parties involved. We would like to recommend that the SB considers relevant rule changes required to enable adoption of digital monitoring, reporting and verification (D-MRV). D-MRV offers the potential to drive scale with integrity at lower costs. To unlock its full potential, D-MRV requires changes in (non-exhaustive) project cycle, validation & verification requirements or registry functionality. The potential of digitisation and the changes required to ensure its adoption should become a standing item on the SB agenda. We remain available should you require further details about changes required.

Regards,

Marion Verles
