NMA Platform

The NMA Platform is designed to record and exchange information on non-market approaches under Article 6, paragraph 8, of the [Paris Agreement](#). It is established in accordance with [decision 8/CMA.4](#) and enables participating Parties and non-Party stakeholders to identify, develop and implement non-market approaches. The platform includes information on finance, technology and capacity-building support available or provided for these initiatives.

Non-market approaches under Article 6.8 support Parties' climate efforts by promoting mitigation and adaptation ambition. They aim to enhance participation from the public and private sectors, as well as civil society organizations, in implementing [nationally determined contributions](#). They also create opportunities for coordination across different climate instruments and institutional frameworks.

Each non-market approach is identified voluntarily by participating Parties, involves more than one participating Party and does not involve the transfer of mitigation outcomes. Initiatives must support the achievement of host Parties' nationally determined contributions, align with the [eleventh preambular paragraph](#) of the Paris Agreement and minimize any potential negative environmental, economic or social impacts.

For any queries, contact nma-platform@unfccc.int.

Sustainable Business of Adaptation for Resilient Urban future (SUBARU) initiative

[Submitting Country:](#) Japan

[Participating Parties:](#) Cambodia (host), Nepal (host), Philippines (host), Viet Nam (host)

[Focus area:](#) Adaptation, resilience and sustainability

[Sector:](#) Cities, settlements and infrastructure.

[Support Needed:](#)

[Support Provided:](#) Technology development and transfer, Capacity-building

SUBARU initiative aims to promote development of climate resilient cities in the Asia-Pacific region through collaboration between Ministry of Economy, Trade and Industry (METI) Japan and UN-Habitat Regional Office for Asia and Pacific. This initiative will promote the contributions of Japanese private sector to solve adaptation issues in cities.

Support providers

↑ Up from 8 at GCNMA 6

A support provider is any entity providing finance, technology development and transfer, and/or capacity-building for non-market approaches

NMA Platform

The NMA Platform is designed to record and exchange information on non-market approaches under Article 6, paragraph 8, of the Paris Agreement. It is established in accordance with decision 8/CMA.4 and enables participating Parties and non-Party stakeholders to identify, develop and implement non-market approaches. The platform includes information on finance, technology and capacity-building support available or provided for these initiatives.

Non-market approaches under Article 6.8 support Parties' climate efforts by promoting mitigation and adaptation ambition. They aim to enhance participation from the public and private sectors, as well as civil society organizations, in implementing nationally determined contributions. They also create opportunities for coordination across different climate instruments and institutional frameworks.

Each non-market approach is identified voluntarily by participating Parties, involves more than one participating Party and does not involve the transfer of mitigation outcomes. Initiatives must support the achievement of host Parties' nationally determined contributions, align with the eleventh preambular paragraph of the Paris Agreement and minimize any potential negative environmental, economic or social impacts.

For any queries, contact nma-platform@unfccc.int.
