

Identification of Key Priorities and Strategies for Mobilizing and Accessing Climate Finance

Island States in the Indian Ocean Climate Finance Mobilization and Access Strategy Workshop

Session 5

Malé, Maldives, 4 March 2020

Guiding questions

Priority areas for common climate finance action

- Should the focus sectors be for those sectors which have historically received less (as they seem to need more targeted strategies)?
- Based on the priority activities identified, what would be the ideal source of finance (including blended financing arrangements)?

Actions to enhance mobilization access to climate finance

- Which activities should capacity building focus on?
- What are the specific types of institutions (domestic and international) that have to be engaged in addition to the Ministry of Environment/Climate Change?
- What kind of policies could incentivize climate finance mobilization?

Strategic frameworks

- In addition to the 2 above, what are other cross-cutting elements that have to be emphasized in the Strategy?

Thank you!
