

**Paris Committee on Capacity-building (PCCB)**  
**Call for submissions from Parties and non-Party stakeholders:**  
*2022 PCCB focus area*

‘Building capacity to facilitate the coherent implementation of nationally determined contributions in the context of national development plans and sustainable recovery’

### **Background**

The PCCB aims to address gaps and needs, both current and emerging, in implementing capacity-building in

- a) Enhancing coherence and coordination of capacity-building under the Convention;
- b) Identifying capacity gaps and needs, both current and emerging, and recommending ways to address them;
- c) Promoting awareness-raising, knowledge- and information-sharing and stakeholder engagement.

developing country Parties and further enhance capacity-building efforts. Current priority areas are:

To learn more about the work of the PCCB, you can access its annual reports and other documents [here](#).

### **Topics for submissions**

The PCCB annually focuses on an area related to enhanced technical exchange on capacity-building. It determined, in its 2021-2024 workplan, to make calls for submissions from Parties and non-Party stakeholders on the annual PCCB focus area.

### **Who can submit?**

The call is open to all UNFCCC Parties and non-Party stakeholders, such as public and private sector entities, government and non-government organizations, philanthropic organizations, academic and research organizations, international and regional organizations or initiatives, and UNFCCC constituted bodies.

### **How will the inputs be used?**

The inputs will feed into the PCCB's workplan activities in 2022, including a focus area day at the 4th Capacity-building Hub at COP 27, and envisaged regional activities and webinars. The inputs will also inform the design and preparations of the 11th Durban Forum on capacity-building to be held during the Bonn Climate Change Conference in June 2022. Responding to the request of the COP for the SBI to align the theme of the Durban Forum on capacity-building with the annual focus area of the PCCB, the PCCB has been working to ensure alignment between discussions at the annual Durban Forum and the work of the PCCB related to its annual focus area.

### **Submissions form**

We thank you in advance for filling out this template with concise, evidence-based information and for referencing all relevant sources. There are 2 sections in this template:

- *Details about your organization*

- *Guiding questions about implementing NDCs and national development plans in developing countries in a coherent manner, while supporting a sustainable recovery*

**Further information:**

You are welcome to provide any other information that your organization thinks would highlight suggestions made in response to this call for submissions.

**Address for submission:** [pccb@unfccc.int](mailto:pccb@unfccc.int)

**Deadline for submissions:** 25 February 2022

*Please only fill out sections that are relevant to the work of your organization. Please note that no section is mandatory.*

**Organization or entity name:**

National Hydrometeorological Service of the Ministry of Ecology and Natural Resources of the Republic of Azerbaijan

**Type of organization:**

*Please choose as appropriate:*

- |  |   |
|--|---|
| <input type="checkbox"/> Intergovernmental organization                  | <input type="checkbox"/> Development bank / financial institution   |
| <input type="checkbox"/> UN and affiliated organization                  | <input type="checkbox"/> Non-governmental organization              |
| <input type="checkbox"/> International network, coalition, or initiative | <input type="checkbox"/> Research organization                      |
| <input type="checkbox"/> Regional network, coalition, or initiative      | <input type="checkbox"/> University/education/training organization |
| <input type="checkbox"/> Public sector entity                            | <input type="checkbox"/> Private sector entity                      |
| <input type="checkbox"/> Development agency                              | <input checked="" type="checkbox"/> Other (Please specify) _____    |

**Organization Location**

City: Baku

Country: Azerbaijan

**Scale of operation:**

- |  |  |
|--|--|
| <input type="checkbox"/> Global              | <input type="checkbox"/> Regional      |
| <input type="checkbox"/> Local               | <input type="checkbox"/> Subregional   |
| <input checked="" type="checkbox"/> National | <input type="checkbox"/> Transboundary |

**City(ies)/Country(ies) of operation (if appropriate):**

The Republic of Azerbaijan, all regions

## The annual PCCB focus area

At its fifth meeting in June 2021, the PCCB agreed on the following focus area for 2022:

***‘Building capacity to facilitate the coherent implementation of nationally determined contributions (NDCs) in the context of national development plans and sustainable recovery’***

The Paris Agreement aims to strengthen the global response to the threat of climate change through the implementation of NDCs and national development plans, in the context of sustainable development and efforts to eradicate poverty. This presents ample opportunities for synergies and the PCCB, with its strong mandate to engage with other bodies under and outside the Convention, is well positioned to promote coherence in achieving climate and development objectives.

Building closely on the PCCB’s 2021 focus area on building capacity to facilitate coherent implementation of NDCs in the context of national development plans, the 2022 focus area is dedicated to the question of how this process can support a sustainable recovery from the COVID-19 pandemic.

The COVID-19 pandemic accelerated multiple crises, and solutions for economic recovery efforts need to be responsive to the climate emergency and facilitate a transition to a greener, fairer, and more sustainable world, and capacity-building is a key enabler for this.

The [PCCB’s work on its 2021 focus area](#) contributed to an enhanced understanding of the key barriers and capacity-building needs and gaps hindering the coherent implementation of NDCs and national development plans, as well as of existing solutions. Through this call for submissions, **the PCCB seeks to contribute to a better understanding of how the coherent implementation of NDCs and national development plans can be aligned with and support a sustainable recovery.** What good practices and lessons learned exist with regard to aligning NDC implementation and national development planning with recovery efforts that are focused on sustainability and what are the major capacity-building needs and gaps in this area?

**To facilitate coherent NDC implementation and planning in developing countries that are aligned with and support a sustainable recovery, in your experience, what are:**

*the key interventions?*

-Capacity building of key stakeholders involved in implementation of the NDC targets. -Identifying areas of potential alignment or inconsistency between the NDC and this national sustainable development plans and processes. -Identifying, establishing and empowering the institutions that are key in implementation of NDCs in national and local level.

*the enabling conditions?*

NDCs investment and implementation plan. Adaptation and mitigation measures for implementation enhanced NDCs, Policies that are targeted to implement NDC targets

*the key institutional barriers?*

Lack of the institutional, human and information capacities. Gaps in the climate change related legislation, need on implementing new policies and adopting new technologies

*the capacity gaps and capacity-building needs?*

Financial capacity of implementing institution. Technical capacity of stakeholders.

*the knowledge and skills priorities?*

Understanding of long-term sector implications of the Paris Agreement. Identification of links between mitigation targets and SDGs. Skills on providing a scenario as guided by the IPCC AR6 approach to

demonstrating successful progress

**How can existing capacity-building efforts be improved and what kind of new or additional capacity-building efforts are needed to ensure that coherent NDC implementation and planning in developing countries are aligned with and support a sustainable recovery? Who should be the target recipients of such capacity-building?**

*At the subnational level:*

*At subnational level an effective NDC establishment with higher (tier 2.3)*

*At the national level:*

Governmental, non-governmental organizations and civil organizations, research institutions, private sector, local communities

*At the regional level:*

At regional level these activities will be a significant value of the relevant cooperation in the South Caucasus.

**Good case studies, best practices, tools and methodologies, lessons learned, or examples of support:**

*Please describe any that build capacity to facilitate coherent NDC implementation and planning in developing countries that are aligned with and support a sustainable recovery*

For successful coordination climate change-related activities in terms of achieving NDC goals in Azerbaijan new composition of the State Commission on Climate Change and the relevant working group consisting of representatives of relevant organizations under the coordination of the MENR was stated by the Decree No. 560 of the President of the Republic of Azerbaijan dated March 11, 2020. The Action Plan of Working Group was approved by the degree of Deputy Prime minister dated October 03, 2020. The action plan includes the measures on improvement of GHGs Inventory and MRV system, mitigation and adaptation measures in different sectors. For the first time in the history of preparation of the national communications there was used LEAP software analysis for mitigation measures and projection of GHGs till 2030 and beyond. There's being prepared LT-LEDS and National Adaptation Plan that enable benchmarking of the current and future efforts in order to achieve the goals in the updated NDC document that's being finished and will be submitted in 2022.
