

Paris Committee on Capacity-building (PCCB)
Call for submissions from Parties and non-Party stakeholders:
2022 PCCB focus area

‘Building capacity to facilitate the coherent implementation of nationally determined contributions
in the context of national development plans and sustainable recovery’

Background

The PCCB aims to address gaps and needs, both current and emerging, in implementing capacity-building in developing country Parties and further enhance capacity-building efforts. Current priority areas are:

- a) Enhancing coherence and coordination of capacity-building under the Convention;
- b) Identifying capacity gaps and needs, both current and emerging, and recommending ways to address them;
- c) Promoting awareness-raising, knowledge- and information-sharing and stakeholder engagement.

To learn more about the work of the PCCB, you can access its annual reports and other documents [here](#).

Topics for submissions

The PCCB annually focuses on an area related to enhanced technical exchange on capacity-building. It determined, in its 2021-2024 workplan, to make calls for submissions from Parties and non-Party stakeholders on the annual PCCB focus area.

Who can submit?

The call is open to all UNFCCC Parties and non-Party stakeholders, such as public and private sector entities, government and non-government organizations, philanthropic organizations, academic and research organizations, international and regional organizations or initiatives, and UNFCCC constituted bodies.

How will the inputs be used?

The inputs will feed into the PCCB's workplan activities in 2022, including a focus area day at the 4th Capacity-building Hub at COP 27, and envisaged regional activities and webinars. The inputs will also inform the design and preparations of the 11th Durban Forum on capacity-building to be held during the Bonn Climate Change Conference in June 2022. Responding to the request of the COP for the SBI to align the theme of the Durban Forum on capacity-building with the annual focus area of the PCCB, the PCCB has been working to ensure alignment between discussions at the annual Durban Forum and the work of the PCCB related to its annual focus area.

Submissions form

We thank you in advance for filling out this template with concise, evidence-based information and for referencing all relevant sources. There are 2 sections in this template:

- *Details about your organization*
- *Guiding questions about implementing NDCs and national development plans in developing countries in a coherent manner, while supporting a sustainable recovery*

Further information:

You are welcome to provide any other information that your organization thinks would highlight suggestions made in response to this call for submissions.

Address for submission: pccb@unfccc.int

Deadline for submissions: 25 February 2022

Please only fill out sections that are relevant to the work of your organization. Please note that no section is mandatory.

Organization or entity name:

SLYCAN Trust

Type of organization:

Please choose as appropriate:

- | | |
|--|---|
| <input type="checkbox"/> Intergovernmental organization | <input type="checkbox"/> Development bank / financial institution |
| <input type="checkbox"/> UN and affiliated organization | <input checked="" type="checkbox"/> Non-governmental organization |
| <input type="checkbox"/> International network, coalition, or initiative | <input checked="" type="checkbox"/> Research organization |
| <input type="checkbox"/> Regional network, coalition, or initiative | <input type="checkbox"/> University/education/training organization |
| <input type="checkbox"/> Public sector entity | <input type="checkbox"/> Private sector entity |
| <input type="checkbox"/> Development agency | <input type="checkbox"/> Philanthropic organization |
| | <input type="checkbox"/> Other (Please specify) _____ |

Organization Location

City: Colombo

Country: Sri Lanka

Scale of operation:

- | | |
|--|---|
| <input checked="" type="checkbox"/> Global | <input checked="" type="checkbox"/> Regional |
| <input checked="" type="checkbox"/> Local | <input checked="" type="checkbox"/> Subregional |
| <input checked="" type="checkbox"/> National | <input type="checkbox"/> Transboundary |

City(ies)/Country(ies) of operation (if appropriate):

The organization focuses on international level, as well as on countries in Asia, Africa and Europe at in country level. Some of the countries include Sri Lanka, Niger, Ghana, Germany.

The annual PCCB focus area

At its fifth meeting in June 2021, the PCCB agreed on the following focus area for 2022:

‘Building capacity to facilitate the coherent implementation of nationally determined contributions (NDCs) in the context of national development plans and sustainable recovery’

The Paris Agreement aims to strengthen the global response to the threat of climate change through the implementation of NDCs and national development plans, in the context of sustainable development and efforts to eradicate poverty. This presents ample opportunities for synergies and the PCCB, with its strong mandate to engage with other bodies under and outside the Convention, is well positioned to promote coherence in achieving climate and development objectives.

Building closely on the PCCB’s 2021 focus area on building capacity to facilitate coherent implementation of NDCs in the context of national development plans, the 2022 focus area is dedicated to the question of how this process can support a sustainable recovery from the COVID-19 pandemic.

The COVID-19 pandemic accelerated multiple crises, and solutions for economic recovery efforts need to be responsive to the climate emergency and facilitate a transition to a greener, fairer, and more sustainable world, and capacity-building is a key enabler for this.

The [PCCB’s work on its 2021 focus area](#) contributed to an enhanced understanding of the key barriers and capacity-building needs and gaps hindering the coherent implementation of NDCs and national development plans, as well as of existing solutions. Through this call for submissions, **the PCCB seeks to contribute to a better understanding of how the coherent implementation of NDCs and national development plans can be aligned with and support a sustainable recovery.** What good practices and lessons learned exist with regard to aligning NDC implementation and national development planning with recovery efforts that are focused on sustainability and what are the major capacity-building needs and gaps in this area?

To facilitate coherent NDC implementation and planning in developing countries that are aligned with and support a sustainable recovery, in your experience, what are:

the key interventions?

Identifying key sectors and interventions that are priorities for climate action as well as sustainable recovery. Enhancing the inter-ministerial and inter-sectoral coordination for scaling up climate and development actions with a focus on just and sustainable recovery. Capacity-building of key actors from the government as well as other stakeholder groups for integrating NDCs and development planning and taking into consideration sustainable recovery. Development of local-level planning processes that incorporate NDCs, sustainable development, and key appropriate interventions identified through community-led and multi-stakeholder driven processes.

the enabling conditions?

An ecosystem which has integrated climate action into planning processes on all levels. Climate literacy among key stakeholders at all levels and capacities on how climate action and NDC related planning processes can be integrated into national and local levels; Scaled up finance for capacity building on the integration of NDCs into planning processes related to just recovery at all levels, including international and regional; participatory and inclusive processes which take into consideration the insights and voices of all stakeholders, especially those vulnerable to the impacts of climate change.

the key institutional barriers?

Need for enhanced technical expertise; need for enhanced coordination between climate action, development planning and recovery from COVID19; need for resources including finance for capacity building on the thematic focus area(s); evidence and research for planning processes related to the 3 thematic areas

the capacity gaps and capacity-building needs?

the knowledge and skills priorities?

Click or tap here to enter text.

How can existing capacity-building efforts be improved and what kind of new or additional capacity-building efforts are needed to ensure that coherent NDC implementation and planning in developing countries are aligned with and support a sustainable recovery? Who should be the target recipients of such capacity-building?

At the subnational level:

Integration of NDCs into local level planning and management, including in actions of government officials of local administrative subdivisions, field and extension officers, data collection and research institutions, and non-governmental stakeholders on the local level involved in policy and planning processes on climate change and sustainable development.

At the national level:
